Sparse Grids and Applications - Miami 2016 Jochen Garcke, Dirk Pflüger, Clayton G. Webster, Guannan Zhang, 2018-06-20 Sparse grids are a popular tool for the numerical treatment of high dimensional problems. Where classical numerical discretization schemes fail in more than three or four dimensions, sparse grids in their different flavors are frequently the method of choice. This volume of LNCSE presents selected papers from the proceedings of the fourth workshop on sparse grids and applications and demonstrates once again the importance of this numerical discretization scheme. The articles present recent advances in the numerical analysis of sparse grids in connection with a range of applications including computational chemistry, computational fluid dynamics and big data analytics to name but a few.

This text introduces the concepts and principles of mobile agents, provides an overview of mobile agent technology and focuses on applications in networking and distributed computing.

Innovative Research and Applications in Next-Generation High Performance Computing Hassan, Qusay F., 2016-07-05 High performance computing (HPC) describes the use of connected computing units to perform complex tasks. It relies on parallelization techniques and algorithms to synchronize these disparate units in order to perform faster than a single processor could alone. Used in industries from medicine and research to military and higher education, this method of computing allows for users to complete complex data intensive tasks. This field has undergone many changes over the past decade and will continue to grow in popularity in the coming years. Innovative Research Applications in Next Generation High Performance Computing aims to address the future challenges, advances and applications of HPC and related technologies. As the need for such processors increases, so does the importance of developing new ways to optimize the performance of these supercomputers. This timely publication provides comprehensive information for researchers, students in ICT programs, developers, military and government organizations and business professionals.
