Combinatorial Scientific Computing Uwe Naumann, Olaf Schenk, 2012-01-25 Combinatorial Scientific Computing explores the latest research on creating algorithms and software tools to solve key combinatorial problems on large scale high performance computing architectures It includes contributions from international researchers who are pioneers in designing software and applications for high performance computing systems The book offers a state of the art overview of the latest research tool development and applications It focuses on load balancing and parallelization on high performance computers large scale optimization algorithmic differentiation of numerical simulation code sparse matrix software tools and combinatorial challenges and applications in large scale social networks The authors unify these seemingly disparate areas through a common set of abstractions and algorithms based on combinatorics graphs and hypergraphs Combinatorial algorithms have

long played a crucial enabling role in scientific and engineering computations and their importance continues to grow with the demands of new applications and advanced architectures By addressing current challenges in the field this volume sets the stage for the accelerated development and deployment of fundamental enabling technologies in high performance scientific computing

Parallel Computing: Fundamentals, Applications and New Directions E.H. D'Hollander,G.R. Joubert,Frans Peters,Ulrich Trottenberg,1998-07-22 This volume gives an overview of the state of the art with respect to the development of all types of parallel computers and their application to a wide range of problem areas The international conference on parallel computing ParCo97 Parallel Computing 97 was held in Bonn Germany from 19 to 22 September 1997 The first conference in this biannual series was held in 1983 in Berlin Further conferences were held in Leiden The Netherlands London UK Grenoble France and Gent Belgium From the outset the aim with the ParCo Parallel Computing conferences was to promote the application of parallel computers to solve real life problems In the case of ParCo97 a new milestone was reached in that more than half of the papers and posters presented were concerned with application aspects This fact reflects the coming of age of parallel computing Some 200 papers were submitted to the Program Committee by authors from all over the world The final programme consisted of four invited papers 71 contributed scientific industrial papers and 45 posters In addition a panel discussion on Parallel Computing and the Evolution of Cyberspace was held During and after the conference all final contributions were refereed Only those papers and posters accepted during this final screening process are included in this volume The practical emphasis of the conference was accentuated by an industrial exhibition where companies demonstrated the newest developments in parallel processing equipment and software Speakers from participating companies presented papers in industrial sessions in which new developments in parallel computing were reported
