Fatigue and Fracture Mechanics Gary R. Halford, Joseph P. Gallagher, 2000 **Pressure Vessel And Piping Technology - Proceedings Of The Seminar** John Shing Tai Cheung, Lin Seng Ong, 1993-05-11 This last decade has seen remarkable growth in the Asian Pacific region in the off shore oil petrochemical power and process industries and the rapid change in these fields requires constant updating and reappraisal of the available and new technologies The proceedings of the seminar will contain papers from representatives from many countries to address current technological issues and discuss engineering development and operating experiences The proceedings will therefore greatly benefit those who wish to learn about the new developments in the areas of application of pressure vessels and piping technology

Proceedings of the ASME Pressure Vessels and Piping Conference--2006: Materials and fabrication ,2007 *Comprehensive Structural Integrity* Ian Milne, R. O.

Ritchie, B.L. Karihaloo, 2003-07-25 The aim of this major reference work is to provide a first point of entry to the literature for the researchers in any field relating to structural integrity in the form of a definitive research reference tool which links the various sub disciplines that comprise the whole of structural integrity. Special emphasis will be given to the interaction between mechanics and materials and structural integrity applications. Because of the interdisciplinary and applied nature of the work it will be of interest to mechanical engineers and materials scientists from both academic and industrial backgrounds including bioengineering, interface engineering and nanotechnology. The scope of this work encompasses but is not restricted to fracture mechanics, fatigue, creep, materials dynamics, environmental degradation, numerical methods, failure mechanisms and damage mechanics, interfacial fracture and nano technology, structural analysis, surface behaviour and heart valves. The structures under consideration include pressure vessels and piping, off shore structures, gas installations and pipelines, chemical plants, aircraft, railways, bridges, plates and shells, electronic circuits, interfaces, nanotechnology, artificial organs, biomaterial prostheses, cast structures, mining and more. Case studies will form an integral part of the work. **NDE in Relation to Structural Integrity for Nuclear and Pressurised Components** Gyoujin Cho, 1999-03-12 The proceedings of a conference organised by the European Commission Joint Research Centre Institute of Advanced Materials. The conference was held in Amsterdam, the Netherlands, in October 1998 and covered all aspects of this highly important subject including links between structural integrity requirements and NDE performance. The development of performance demonstration qualification for NDE systems and experience of their application in practice feature prominently. Development of improved NDE systems, new methods of NDE and methods for assessing NDE performance such as modelling are also included. **Journal of Pressure Vessel Technology**, 1985 **ANCILLARY EQUIPMENT AND ELECTRICAL EQUIPMENT - Volume I**, 2010-12-03 Ancillary Equipment and Electrical Equipment is a component of Encyclopedia of Water Sciences Engineering and Technology Resources in the global Encyclopedia of Life Support Systems (EOLSS) which is an integrated compendium of twenty-one Encyclopedias.
