Computing Machinery

*Advancing Computing as a Science & Profession*

March 30–April 3, 2025  
Boston, MA, United States

# ASPLOS'25

Proceedings of the 30th ACM International Conference on  
**Architectural Support for Programming  
Languages and Operating Systems, Volume 2**

Sponsored by:

**ACM SIGOPS, ACM SIGPLAN, and ACM SIGARCH**

In cooperation with: **ACM SIGBED**

General Chairs:

**Lieven Eeckhout (Ghent University, Belgium)**

**Georgios Smaragdakis (TU Delft, Netherlands)**

**Katali Liang (TU Delft, Netherlands)**

Program Chairs:

**Adrian Sampson (Cornell University, USA)**

**Martha Kim (Columbia University, USA)**

**Christopher J. Rossbach (University of Texas at Austin, USA)**

Publication Chair:

**Xulong Tang (University of Pittsburgh, USA)**

# Proceedings Second International Conference On Architectural Support For

**Richard Zurawski**

## **Proceedings Second International Conference On Architectural Support For:**

*Proceedings Second International Conference on Information Processing* L. M. Patnaik, 2013-12-30 The proceedings features several key note addresses in the areas of advanced information processing tools This area has been recognized to be one of the key five technologies poised to shape the modern society in the next decade It aptly focuses on the tools and techniques for the development of Information Systems Emphasis is on pattern recognition and image processing software engineering mobile ad hoc networks security aspects in computer networks signal processing and hardware synthesis optimization techniques data mining and information processing Proceedings of the Twenty-Second International Conference on Architectural Support for Programming Languages and Operating Systems Yunji Chen, 2017-04-08 ASPLOS 17 Architectural Support for Programming Languages and Operating Systems Apr 08 2017 Apr 12 2017 Xi an China You can view more information about this proceeding and all of ACM's other published conference proceedings from the ACM Digital Library <http://www.acm.org/dl> *Proceedings (of The) Second International Conference on Architectural Support for Programming Languages and Operating Systems (ASPLOS II), October 5-8, 1987, Palo Alto, California, 1987*

**Proceedings Second International Conference on Architectural Support for Programming Languages and Operating Systems (ASPLOS II), 1987** *ASPLOS II, 1987 Emphasizing Distributed Systems*, 2000-06-29 As the computer industry moves into the 21st century the long running *Advances in Computers* is ready to tackle the challenges of the new century with insightful articles on new technology just as it has since 1960 in chronicling the advances in computer technology from the last century As the longest running continuing series on computers *Advances in Computers* presents those technologies that will affect the industry in the years to come In this volume the 53rd in the series we present 8 relevant topics The first three represent a common theme on distributed computing systems using more than one processor to allow for parallel execution and hence completion of a complex computing task in a minimal amount of time The other 5 chapters describe other relevant advances from the late 1990s with an emphasis on software development topics of vital importance to developers today process improvement measurement and legal liabilities Longest running series on computers Contains eight insightful chapters on new technology Gives comprehensive treatment of distributed systems Shows how to evaluate measurements Details how to evaluate software process improvement models Examines how to expand e commerce on the Web Discusses legal liabilities in developing software a must read for developers Programming Language Pragmatics Michael Scott, 2009-03-23 *Programming Language Pragmatics Third Edition* is the most comprehensive programming language book available today Taking the perspective that language design and implementation are tightly interconnected and that neither can be fully understood in isolation this critically acclaimed and bestselling book has been thoroughly updated to cover the most recent developments in programming language design including Java 6 and 7 C 0X C 3 0 F Fortran 2003 and 2008 Ada 2005 and Scheme R6RS A new chapter on run time program management covers virtual

machines managed code just in time and dynamic compilation reflection binary translation and rewriting mobile code sandboxing and debugging and program analysis tools Over 800 numbered examples are provided to help the reader quickly cross reference and access content This text is designed for undergraduate Computer Science students programmers and systems and software engineers Classic programming foundations text now updated to familiarize students with the languages they are most likely to encounter in the workforce including including Java 7 C C 3 0 F Fortran 2008 Ada 2005 Scheme R6RS and Perl 6 New and expanded coverage of concurrency and run time systems ensures students and professionals understand the most important advances driving software today Includes over 800 numbered examples to help the reader quickly cross reference and access content Computer Architecture John L. Hennessy, David A. Patterson, 2017-11-23 Computer Architecture A Quantitative Approach Sixth Edition has been considered essential reading by instructors students and practitioners of computer design for over 20 years The sixth edition of this classic textbook from Hennessy and Patterson winners of the 2017 ACM A M Turing Award recognizing contributions of lasting and major technical importance to the computing field is fully revised with the latest developments in processor and system architecture The text now features examples from the RISC V RISC Five instruction set architecture a modern RISC instruction set developed and designed to be a free and openly adoptable standard It also includes a new chapter on domain specific architectures and an updated chapter on warehouse scale computing that features the first public information on Google s newest WSC True to its original mission of demystifying computer architecture this edition continues the longstanding tradition of focusing on areas where the most exciting computing innovation is happening while always keeping an emphasis on good engineering design Winner of a 2019 Textbook Excellence Award Texty from the Textbook and Academic Authors Association Includes a new chapter on domain specific architectures explaining how they are the only path forward for improved performance and energy efficiency given the end of Moore s Law and Dennard scaling Features the first publication of several DSAs from industry Features extensive updates to the chapter on warehouse scale computing with the first public information on the newest Google WSC Offers updates to other chapters including new material dealing with the use of stacked DRAM data on the performance of new NVIDIA Pascal GPU vs new AVX 512 Intel Skylake CPU and extensive additions to content covering multicore architecture and organization Includes Putting It All Together sections near the end of every chapter providing real world technology examples that demonstrate the principles covered in each chapter Includes review appendices in the printed text and additional reference appendices available online Includes updated and improved case studies and exercises ACM named John L Hennessy and David A Patterson recipients of the 2017 ACM A M Turing Award for pioneering a systematic quantitative approach to the design and evaluation of computer architectures with enduring impact on the microprocessor industry **Sustainable Futures With Life Cycle Assessment in Industry 5.0** Wongmahesak, Kittisak, Karim, Fazida, Wongchestha, Nititorn, 2025-05-08 As Industry 5.0 prioritizes human centric

sustainable and resilient production life cycle assessment plays a crucial role in evaluating environmental impacts across industries By integrating life cycle assessment businesses can make data driven decisions to reduce waste optimize resource use and minimize carbon footprints This approach supports the transition toward circular economies ensuring that technological advancements align with ecological responsibility As sustainability becomes a global priority life cycle assessment empowers industries policymakers and consumers to drive meaningful change toward a more sustainable future Sustainable Futures With Life Cycle Assessment in Industry 5 0 explores life cycle assessment in Industry 5 0 emphasizing sustainable production resource optimization and environmental impact reduction Through expert insights and case studies it provides a comprehensive guide for integrating life cycle assessment into next generation industrial practices to drive sustainability and innovation Covering topics such as recommendation systems community product marketing and currency exchange rates this book is an excellent resource for economists business leaders computer scientists professionals researchers scholars academicians and more

**Inventive Computation Technologies** S. Smys,Robert Bestak,Álvaro Rocha,2019-11-02 With the intriguing development of technologies in several industries along with the advent of ubiquitous computational resources there are now ample opportunities to develop innovative computational technologies in order to solve a wide range of issues concerning uncertainty imprecision and vagueness in various real life problems The challenge of blending modern computational techniques with traditional computing methods has inspired researchers and academics alike to focus on developing innovative computational techniques In the near future computational techniques may provide vital solutions by effectively using evolving technologies such as computer vision natural language processing deep learning machine learning scientific computing and computational vision A vast number of intelligent computational algorithms are emerging along with increasing computational power which has significantly expanded the potential for developing intelligent applications These proceedings of the International Conference on Inventive Computation Technologies ICICT 2019 cover innovative computing applications in the areas of data mining big data processing information management and security

**Approximate Computing Techniques** Alberto Bosio,Daniel Ménard,Olivier Sentieys,2022-06-10 This book serves as a single source reference to the latest advances in Approximate Computing AxC a promising technique for increasing performance or reducing the cost and power consumption of a computing system The authors discuss the different AxC design and validation techniques and their integration They also describe real AxC applications spanning from mobile to high performance computing and also safety critical applications

**Delay and Disruption Tolerant Networks** Aloizio Pereira da Silva,Scott Burleigh,Katia Obraczka,2018-09-04 Delay and Disruption Tolerant Networks DTNs are networks subject to arbitrarily long lived disruptions in connectivity and therefore cannot guarantee end to end connectivity at all times Consequently DTNs called for novel core networking protocols since most existing Internet protocols rely on the network s ability to maintain end to end communication between participating nodes This book presents the fundamental

principles that underline DTNs It explains the state of the art on DTNs their architecture protocols and applications It also explores DTN s future technological trends and applications Its main goal is to serve as a reference for researchers and practitioners

*Embedded Systems Handbook* Richard Zurawski,2018-09-03 Considered a standard industry resource the Embedded Systems Handbook provided researchers and technicians with the authoritative information needed to launch a wealth of diverse applications including those in automotive electronics industrial automated systems and building automation and control Now a new resource is required to report on current developments and provide a technical reference for those looking to move the field forward yet again Divided into two volumes to accommodate this growth the Embedded Systems Handbook Second Edition presents a comprehensive view on this area of computer engineering with a currently appropriate emphasis on developments in networking and applications Those experts directly involved in the creation and evolution of the ideas and technologies presented offer tutorials research surveys and technology overviews that explore cutting edge developments and deployments and identify potential trends This first self contained volume of the handbook Embedded Systems Design and Verification is divided into three sections It begins with a brief introduction to embedded systems design and verification It then provides a comprehensive overview of embedded processors and various aspects of system on chip and FPGA as well as solutions to design challenges The final section explores power aware embedded computing design issues specific to secure embedded systems and web services for embedded devices Those interested in taking their work with embedded systems to the network level should complete their study with the second volume Network Embedded Systems

**Embedded Systems Handbook 2-Volume Set** Richard Zurawski,2018-10-08 During the past few years there has been an dramatic upsurge in research and development implementations of new technologies and deployments of actual solutions and technologies in the diverse application areas of embedded systems These areas include automotive electronics industrial automated systems and building automation and control Comprising 48 chapters and the contributions of 74 leading experts from industry and academia the Embedded Systems Handbook Second Edition presents a comprehensive view of embedded systems their design verification networking and applications The contributors directly involved in the creation and evolution of the ideas and technologies presented offer tutorials research surveys and technology overviews exploring new developments deployments and trends To accommodate the tremendous growth in the field the handbook is now divided into two volumes New in This Edition Processors for embedded systems Processor centric architecture description languages Networked embedded systems in the automotive and industrial automation fields Wireless embedded systems Embedded Systems Design and Verification Volume I of the handbook is divided into three sections It begins with a brief introduction to embedded systems design and verification The book then provides a comprehensive overview of embedded processors and various aspects of system on chip and FPGA as well as solutions to design challenges The final section explores power aware embedded computing design issues specific to secure embedded systems and web

services for embedded devices Networked Embedded Systems Volume II focuses on selected application areas of networked embedded systems It covers automotive field industrial automation building automation and wireless sensor networks This volume highlights implementations in fast evolving areas which have not received proper coverage in other publications Reflecting the unique functional requirements of different application areas the contributors discuss inter node communication aspects in the context of specific applications of networked embedded systems

**Memory Systems and Pipelined Processors** Harvey G. Cragon,1996 Memory Systems and Pipelined Processors

**Computer Security** Matt Bishop,2018-11-27 The Comprehensive Guide to Computer Security Extensively Revised with Newer Technologies Methods Ideas and Examples In this updated guide University of California at Davis Computer Security Laboratory co director Matt Bishop offers clear rigorous and thorough coverage of modern computer security Reflecting dramatic growth in the quantity complexity and consequences of security incidents Computer Security Second Edition links core principles with technologies methodologies and ideas that have emerged since the first edition s publication Writing for advanced undergraduates graduate students and IT professionals Bishop covers foundational issues policies cryptography systems design assurance and much more He thoroughly addresses malware vulnerability analysis auditing intrusion detection and best practice responses to attacks In addition to new examples throughout Bishop presents entirely new chapters on availability policy models and attack analysis Understand computer security goals problems and challenges and the deep links between theory and practice Learn how computer scientists seek to prove whether systems are secure Define security policies for confidentiality integrity availability and more Analyze policies to reflect core questions of trust and use them to constrain operations and change Implement cryptography as one component of a wider computer and network security strategy Use system oriented techniques to establish effective security mechanisms defining who can act and what they can do Set appropriate security goals for a system or product and ascertain how well it meets them Recognize program flaws and malicious logic and detect attackers seeking to exploit them This is both a comprehensive text explaining the most fundamental and pervasive aspects of the field and a detailed reference It will help you align security concepts with realistic policies successfully implement your policies and thoughtfully manage the trade offs that inevitably arise Register your book for convenient access to downloads updates and or corrections as they become available See inside book for details

**The Compiler Design Handbook** Y.N. Srikant,Priti Shankar,2002-09-25 The widespread use of object oriented languages and Internet security concerns are just the beginning Add embedded systems multiple memory banks highly pipelined units operating in parallel and a host of other advances and it becomes clear that current and future computer architectures pose immense challenges to compiler designers challenges th

**Proceedings of the ... ACM SIGPLAN Symposium on Principles & Practice of Parallel Programming** ,1993

[Architecture and Methods for Flexible Content Management in Peer-to-Peer Systems](#) Udo Bartlang,2010-04-11 At times when the IT manager s best friend is systems consolidation which is

a euphemism for centralisation it may come somewhat as a surprise for you that this book investigates decentralisation in the context of content management systems It may seem quite obvious that content will and should be managed by the party who creates and owns the content and hence should be held in a somewhat centralised and managed location However over the past few years we have been witnesses of some important trends and developments which call for novel ways of thinking about content management and maybe even broader about computer systems in general First ongoing business globalization creates natural distribution of information at a corporate level as well as decentralization of control over business resources and business processes Changing alliances with partners require flexible architectures for content management that can adapt to changing constellations roles and access rights Second the need for outsourcing and resource efficiency has brought about concepts of virtualization recently culminating in the cloud computing buzzword Virtualization of content management services requires extremely scalable and flexible underlying information and communication architectures These kinds of solutions are theoretically and practically impossible to implement based on centralized client server architectures Third we are currently experiencing a dramatic shift in the roles of consumers in the Internet The times have gone when quality content was only delivered by publishers and news agencies Wikis and other Web 2.0 tools empower consumers to produce and publish their personal content

**Ambient Intelligence** Giuseppe Riva, 2005 The metaphor of Ambient Intelligence AmI tries to picture a vision of the future where all of us will be surrounded by intelligent electronic environments and this ambient has claims to being sensitive and responsive to our needs Ambient Intelligence without invasion of privacy represents a long term vision for the EU Information Society Technologies Research programme A strong multidisciplinary and collaborative approach is a key requirement for large scale technology innovation and the development of effective applications Up to now most of the books and papers related to AmI focus their analysis on the technology potential only An important feature of this volume is the link between the technology through the concepts of ubiquitous computing and intelligent interface and the human experience of interacting in the world through a neuropsychological vision centred on the concept of presence Presence the sense of being there is the experience of projecting one's mind through media to other places people and designed environments The combination of recent discoveries in cognitive neuroscience which make it possible to acquire a better understanding of the human aspects of presence and the breakthroughs at the level of the enabling technologies make it increasingly possible to build novel systems based on this understanding The goal of this volume is to assess the technologies and processes that are behind the AmI vision in order to help the development of state of the art applications More in detail this volume aims at supporting researchers and scientists interested in the understanding and exploiting the potential of AmI

Proceedings Second International Conference On Architectural Support For: Bestsellers in 2023 The year 2023 has witnessed a remarkable surge in literary brilliance, with numerous engrossing novels captivating the hearts of readers worldwide. Lets delve into the realm of popular books, exploring the engaging narratives that have charmed audiences this year. Proceedings Second International Conference On Architectural Support For : Colleen Hoover's "It Ends with Us" This poignant tale of love, loss, and resilience has captivated readers with its raw and emotional exploration of domestic abuse. Hoover skillfully weaves a story of hope and healing, reminding us that even in the darkest of times, the human spirit can triumph. Proceedings Second International Conference On Architectural Support For : Taylor Jenkins Reid's "The Seven Husbands of Evelyn Hugo" This intriguing historical fiction novel unravels the life of Evelyn Hugo, a Hollywood icon who defies expectations and societal norms to pursue her dreams. Reid's captivating storytelling and compelling characters transport readers to a bygone era, immersing them in a world of glamour, ambition, and self-discovery. Proceedings Second International Conference On Architectural Support For : Delia Owens' "Where the Crawdads Sing" This captivating coming-of-age story follows Kya Clark, a young woman who grows up alone in the marshes of North Carolina. Owens weaves a tale of resilience, survival, and the transformative power of nature, captivating readers with its evocative prose and mesmerizing setting. These popular novels represent just a fraction of the literary treasures that have emerged in 2023. Whether you seek tales of romance, adventure, or personal growth, the world of literature offers an abundance of captivating stories waiting to be discovered. The novel begins with Richard Papan, a bright but troubled young man, arriving at Hampden College. Richard is immediately drawn to the group of students who call themselves the Classics Club. The club is led by Henry Winter, a brilliant and charismatic young man. Henry is obsessed with Greek mythology and philosophy, and he quickly draws Richard into his world. The other members of the Classics Club are equally as fascinating. Bunny Corcoran is a wealthy and spoiled young man who is always looking for a good time. Charles Tavis is a quiet and reserved young man who is deeply in love with Henry. Camilla Macaulay is a beautiful and intelligent young woman who is drawn to the power and danger of the Classics Club. The students are all deeply in love with Morrow, and they are willing to do anything to please him. Morrow is a complex and mysterious figure, and he seems to be manipulating the students for his own purposes. As the students become more involved with Morrow, they begin to commit increasingly dangerous acts. The Secret History is a brilliant and thrilling novel that will keep you wondering until the very end. The novel is a cautionary tale about the dangers of obsession and the power of evil.

### **Proceedings Second International Conference On Architectural Support For Introduction**

Proceedings Second International Conference On Architectural Support For Offers over 60,000 free eBooks, including many classics that are in the public domain. Open Library: Provides access to over 1 million free eBooks, including classic literature and contemporary works. Proceedings Second International Conference On Architectural Support For Offers a vast collection of books, some of which are available for free as PDF downloads, particularly older books in the public domain.

Proceedings Second International Conference On Architectural Support For : This website hosts a vast collection of scientific articles, books, and textbooks. While it operates in a legal gray area due to copyright issues, its a popular resource for finding various publications. Internet Archive for Proceedings Second International Conference On Architectural Support For : Has an extensive collection of digital content, including books, articles, videos, and more. It has a massive library of free downloadable books. Free-eBooks Proceedings Second International Conference On Architectural Support For Offers a diverse range of free eBooks across various genres. Proceedings Second International Conference On Architectural Support For Focuses mainly on educational books, textbooks, and business books. It offers free PDF downloads for educational purposes. Proceedings Second International Conference On Architectural Support For Provides a large selection of free eBooks in different genres, which are available for download in various formats, including PDF. Finding specific Proceedings Second International Conference On Architectural Support For, especially related to Proceedings Second International Conference On Architectural Support For, might be challenging as theyre often artistic creations rather than practical blueprints. However, you can explore the following steps to search for or create your own Online Searches: Look for websites, forums, or blogs dedicated to Proceedings Second International Conference On Architectural Support For, Sometimes enthusiasts share their designs or concepts in PDF format. Books and Magazines Some Proceedings Second International Conference On Architectural Support For books or magazines might include. Look for these in online stores or libraries. Remember that while Proceedings Second International Conference On Architectural Support For, sharing copyrighted material without permission is not legal. Always ensure youre either creating your own or obtaining them from legitimate sources that allow sharing and downloading. Library Check if your local library offers eBook lending services. Many libraries have digital catalogs where you can borrow Proceedings Second International Conference On Architectural Support For eBooks for free, including popular titles. Online Retailers: Websites like Amazon, Google Books, or Apple Books often sell eBooks. Sometimes, authors or publishers offer promotions or free periods for certain books. Authors Website Occasionally, authors provide excerpts or short stories for free on their websites. While this might not be the Proceedings Second International Conference On Architectural Support For full book , it can give you a taste of the authors writing style. Subscription Services Platforms like Kindle Unlimited or Scribd offer subscription-based access to a wide range of Proceedings Second International Conference On Architectural Support For eBooks, including some popular titles.

### **FAQs About Proceedings Second International Conference On Architectural Support For Books**

1. Where can I buy Proceedings Second International Conference On Architectural Support For books? Bookstores:

- Physical bookstores like Barnes & Noble, Waterstones, and independent local stores. Online Retailers: Amazon, Book Depository, and various online bookstores offer a wide range of books in physical and digital formats.
2. What are the different book formats available? Hardcover: Sturdy and durable, usually more expensive. Paperback: Cheaper, lighter, and more portable than hardcovers. E-books: Digital books available for e-readers like Kindle or software like Apple Books, Kindle, and Google Play Books.
  3. How do I choose a Proceedings Second International Conference On Architectural Support For book to read? Genres: Consider the genre you enjoy (fiction, non-fiction, mystery, sci-fi, etc.). Recommendations: Ask friends, join book clubs, or explore online reviews and recommendations. Author: If you like a particular author, you might enjoy more of their work.
  4. How do I take care of Proceedings Second International Conference On Architectural Support For books? Storage: Keep them away from direct sunlight and in a dry environment. Handling: Avoid folding pages, use bookmarks, and handle them with clean hands. Cleaning: Gently dust the covers and pages occasionally.
  5. Can I borrow books without buying them? Public Libraries: Local libraries offer a wide range of books for borrowing. Book Swaps: Community book exchanges or online platforms where people exchange books.
  6. How can I track my reading progress or manage my book collection? Book Tracking Apps: Goodreads, LibraryThing, and Book Catalogue are popular apps for tracking your reading progress and managing book collections. Spreadsheets: You can create your own spreadsheet to track books read, ratings, and other details.
  7. What are Proceedings Second International Conference On Architectural Support For audiobooks, and where can I find them? Audiobooks: Audio recordings of books, perfect for listening while commuting or multitasking. Platforms: Audible, LibriVox, and Google Play Books offer a wide selection of audiobooks.
  8. How do I support authors or the book industry? Buy Books: Purchase books from authors or independent bookstores. Reviews: Leave reviews on platforms like Goodreads or Amazon. Promotion: Share your favorite books on social media or recommend them to friends.
  9. Are there book clubs or reading communities I can join? Local Clubs: Check for local book clubs in libraries or community centers. Online Communities: Platforms like Goodreads have virtual book clubs and discussion groups.
  10. Can I read Proceedings Second International Conference On Architectural Support For books for free? Public Domain Books: Many classic books are available for free as they're in the public domain. Free E-books: Some websites offer free e-books legally, like Project Gutenberg or Open Library.
