Process Of Child Therapy

Steven Tuber, Jane Caflisch

Process Of Child Therapy:

The Process of Child Therapy Group for the Advancement of Psychiatry. Committee on Child Psychiatry, 1982 **Change Processes in Child Psychotherapy** Stephen R. Shirk, Robert L. Russell, 1996-08-02 This groundbreaking work advances a developmental perspective on both the basic processes of therapeutic change and the classification of childhood problems offering a novel approach to the search for effective treatments for children Generating a new flow of ideas between clinical practice and empirical research the volume revitalizes basic modalities such as psychodynamic play and cognitive therapies by identifying the core ingredients that enhance and retard the processes of change The authors also demonstrate the limitations of utilizing diagnostic labels as the basis for assessing treatment efficacy arguing instead for an integrative approach that links methods of intervention with a case relevant analysis of the child's emotional interpersonal and cognitive development This book will appeal to clinical and school psychologists psychiatrists social workers and other clinicians working with children as well as researchers in the field It also serves as a text in graduate level courses on child treatment and child psychopathology **Personal Process in Child-Centred Play Therapy** David Le Vay, Elise Cuschieri, 2022-09-02 Personal Process in Child Centred Play Therapy provides a very specific exploration of the play therapy process from the personal perspective of the play therapist This volume examines the personal challenges opportunities losses and gains and numerous obstacles that one has to negotiate through the course of both training to become a play therapist and working as a qualified clinician with children who have complex life difficulties The book aims to offer a forum within which the role function and process of the personal within play therapy can be explored Bringing together a number of experienced play therapists the book shares often deeply personal accounts of their experience of training and clinical practice Chapters challenge the unspoken therapist taboos of shame childhood trauma vulnerability and grief shining a light on the more hidden areas of therapist experience Clinical issues around the unconscious process are also explored but once again from the personal position of the play therapist rather than the child With a unique and distinct perspective on the therapeutic process this book is specifically intended for both trainee and experienced play therapists but will be relevant to all psychotherapists involved in working therapeutically with children and young people *Counselling Children* Kathryn Geldard, David Geldard, 2008 In this Third Edition of their bestselling text Kathryn Geldard and David Geldard provide a practical introduction to the principles and practices required for successful counseling to show that working with young people can be both challenging and effective The Third Edition has been completely revised and updated and includes two new chapters The book is divided into three main parts covering How to understand the young client as a person The proactive approach of working with young people The counseling skills and strategies needed Assessing Change in Psychoanalytic Psychotherapy of Children and Adolescents Judith Trowell, John Tsiantis, 2018-06-14 This book draws together work from across Europe by leading clinical researchers who have been looking into the effectiveness of psychoanalytic

interventions They are mostly time limited brief non intensive ways of working so are applicable in many settings and can therefore be generalised to other clinical teams The populations worked with are diverse and often present mainstream services with refractory clinical problems so an applied psychoanalytic approach is well worth trying given the evidence presented in this volume There is in addition an excellent theoretical chapter on the issues of such clinical research from Stephen Shirk which merits consideration by those wishing to evaluate their own work This book is an important contribution to services for child and adolescent mental health With increasing family distress and concerns about inadequate parenting family breakdown and troublesome adolescents it will help to ensure the full menu of interventions is retained in these times of financial restraint

Starting Treatment With Children and Adolescents Steven Tuber,Jane Caflisch,2011-03-07 In Starting Treatment With Children and Adolescents clinicians will get a clear sense of how other therapists actually work early in their training and how to best manage an early therapy session They ll also be guided through an exploration of common questions such as How else could I have handled that situation What other paths could I have tried Where might those other paths have led What treatment strategies are most advantageous to my patients growth and to my own

A Comprehensive Guide to Child Psychotherapy and Counseling Christiane Brems,Christina H. Rasmussen,2018-08-08 Christiane Brems in collaboration with new coauthor Christina Rasmussen introduces prospective and practicing clinicians to theories and principles of applied clinical work with children ages three to twelve years The authors take an integrated approach to understanding children and their families using a biopsychosociocultural model for conceptualization and treatment planning Their methods are practical and compassionate as well as contextually grounded and individually tailored Chapters follow the logical development of clinicians mirroring the natural flow of work with children Coverage ranges from the importance of a beginning practitioner s introspection and of ethical and legal issues to a variety of intervention techniques and strategies and finally termination Case studies showcase individualized and mindful treatment for each child with whom a clinician works Outstanding Features of the Fourth Edition Essential attention to how clinicians self awareness can lead to positive therapeutic relationships with children and their families Thorough discussions of the biopsychosociocultural model for conceptualization and treatment planning Emphasis on intensive assessment prior to treatment planning to address the needs of each child and family A compelling practical exploration of mindfulness intervention with children The authors methodology addresses the profound effects of the larger environment and culture on children By adopting the authors integrated approach clinicians are better able to understand important and complicated aspects of a child s and family s life From there compassionate thoughtful and relevant intervention ensues

Mentalizing in Child Therapy Annelies Verheugt-Pleiter,Jolien Zevalkink,2021-06-22 Mentalizing in Child Therapy focuses on open ended psychotherapy for children with complex mental health issues and attachment problems It offers examples of personalized and integrated treatment that is firm in structure yet flexible in its focus Peter Fonagy foreword to first edition The book is

based on the systematic observation of the treatment of complex problems in children 4-12 years using a mentalizing therapeutic stance and a range of techniques to enhance mentalizing abilities and trust in other people incorporating aspects of the more relationship oriented and competence oriented treatments. In this updated edition the authors have elaborated on the topic of attention regulation having included Siegel's concept of the window of tolerance. They've also written more on the mentalizing abilities of the therapist, the importance of providing structure at the beginning of the treatment and the value of communication for developing epistemic trust. Featuring guidelines for clinical practitioners, this book is important for the clinical training of child psychotherapists as well as for professional child psychiatrists, child psychologists and other therapists working with four to 12 year old children experiencing significant developmental problems with mentalizing.
