Radiocarbon After Four Decades Ervin Taylor,Austin Long,Renee S. Kra,2013-03-09 Radiocarbon After Four Decades An Interdisciplinary Perspective commemorates the 40th anniversary of radiocarbon dating The volume presents discussions of every aspect of this dating technique as well as chronicles of its development and views of future advancements and applications All of the 64 authors played major roles in establishment development or application of this revolutionary scientific tool The 35 chapters provide a solid foundation in the essential topics of radiocarbon dating Historical Perspectives The Natural Carbon Cycle Instrumentation and Sample Preparation Hydrology Old World Archaeology New World Archaeology Earth Sciences and Biomedical Applications **The Changing Carbon Cycle** John R. Trabalka,David E. Reichle,2013-03-09 The United States Government cognizant of its responsibilities to future generations has been sponsoring research for nine years into the causes effects and potential impacts of increased concentrations of carbon dioxide CO in the atmosphere Agencies such as the National Science Foundation National Oceanic and Atmospheric Administration and the U S Department of Energy DOE cooperatively spent about 100 million from FY 1978 through FY 1984 directly on the study of CO The DOE as the 2 lead government agency for coordinating the government s research efforts has been responsible for about 60% of these research efforts William James succinctly defined our purpose when he stated science must be based upon irreducible and stubborn facts Scientific knowledge can and will reduce the present significant uncertainty surrounding our understanding of the causes effects and potential impacts of increasing atmospheric CO₂ We have come far during the past seven years in resolving some underlying doubts and in narrowing the ranges of disagreement Basic concepts have become less murky Yet much more must be accomplished more irreducible and stubborn facts are needed to reduce the uncertainties so that we can improve our knowledge base Uncertainty can never be reduced to zero However with a much improved knowledge base we will be able to learn understand and be in a position to make decisions **Treatise on Geochemistry** ,2013-10-19 This extensively updated new edition of the widely acclaimed Treatise on Geochemistry has increased its coverage beyond the wide range of geochemical subject areas in the first edition with five new volumes which include the history of the atmosphere geochemistry of mineral deposits archaeology and anthropology organic geochemistry and analytical geochemistry In addition the original Volume 1 on Meteorites Comets and Planets was expanded into two

separate volumes dealing with meteorites and planets respectively These additions increased the number of volumes in the Treatise from 9 to 15 with the index appendices volume remaining as the last volume Volume 16 Each of the original volumes was scrutinized by the appropriate volume editors with respect to necessary revisions as well as additions and deletions As a result 27% were republished without major changes 66% were revised and 126 new chapters were added In a many faceted field such as Geochemistry explaining and understanding how one sub field relates to another is key Instructors will find the complete overviews with extensive cross referencing useful additions to their course packs and students will benefit from the contextual organization of the subject matter Six new volumes added and 66% updated from 1st edition The Editors of this work have taken every measure to include the many suggestions received from readers and ensure comprehensiveness of coverage and added value in this 2nd edition The esteemed Board of Volume Editors and Editors in Chief worked cohesively to ensure a uniform and consistent approach to the content which is an amazing accomplishment for a 15 volume work 16 volumes including index volume

Cosmic Winds and the Heliosphere J. R. Jokipii,C. P. Sonett,Mark S. Giampapa,2018-01-30 Until the advent of space physics astrophysical plasmas could be studied only using ground based observations Although observational methods have advanced over recent decades the merging of heliospheric physics with astrophysics is far from complete due to the vastly different techniques employed by astronomers and space physicists That astrophysical plasmas can be studies directly is a major advance in astrophysical research The solar wind from the Sun is only one of many examples of solar winds but it provides scientists with a basis for understanding how these formerly disparate disciplines are related Cosmic Winds and the Heliosphere is a comprehensive sourcebook on conceptually correlated topics in astrophysical winds and heliospheric physics The contributors review the various kinds of winds such as solar wind winds of cataclysmic variables and winds from pulsating stars They then examine the physics of wind origin and physical phenomena in winds including heliospheric shocks magnetohydrodynamic turbulence and kinetic phenomena A final section considers interactions with surrounding media with contributions ranging from studies of the interstellar cloud surrounding the solar system to considerations of solar wind interaction with comets Prepared to the scrupulous standards of the University of Arizona Space Science Series Cosmic Winds and the Heliosphere is an essential volume for astronomers and space physicists

Climate: Present, Past and Future (Routledge Revivals) H. H. Lamb,2013-09-05 First published in 1977 the second volume of Climate Present Past and Future covers parts 3 and 4 of Professor Hubert Lamb s seminal and pioneering study of climatology Part 3 provides a survey of evidence of types of climates over the last million years and of methods of dating that evidence Through

the earlier stages of the Earth's development the book traces what is known of the various geographies presented by the drifting continents and indicates what can be learnt about climatic regimes and the causes of climatic change From the last ice age to the present our knowledge of the succession of climates is summarized indicating prevailing temperatures rainfalls wind and ocean current patterns where possible Part 4 considers events during the fifteen years prior to the book's initial publication leading on to the problems of estimating the most probable future course of climatic development and the influence of Man's activities on climate Alongside the reissue of volume 1 this Routledge Revival will be essential reading for anyone interested in both the causes and workings of climate and in the history of climatology itself

Encyclopedia of Quaternary Science Cary Mock, 2013-03-25 The second revised edition of the Encyclopedia of Quaternary Science Four Volume Set provides both students and professionals with an up to date reference work on this important and highly varied area of research There are lots of new articles and many of the articles that appeared in the first edition have been updated to reflect advances in knowledge since 2006 when the original articles were written The second edition will contain about 375 articles written by leading experts around the world This major reference work is richly illustrated with more than 3 000 illustrations most of them in colour Research in the Quaternary sciences has advanced greatly in the last 10 years especially since topics like global climate change geologic hazards and soil erosion were put high on the political agenda This second edition builds upon its award winning predecessor to provide the reader assured quality along with essential updated coverage Contains 357 broad ranging articles 4310 pages written at a level that allows undergraduate students to understand the material while providing active researchers with a ready reference resource for information in the field Facilitates teaching and learning The first edition was regarded by many as the most significant single overview of Quaternary science ever yet Editor in Chief Scott Elias has managed to surpass that in this second edition by securing even more expert reviews whilst retaining his renowned editorial consistency that enables readers to navigate seamlessly from one unfamiliar topic to the next

Radiocarbon Dating R.E. Taylor, Ofer Bar-Yosef, 2016-06-03 This volume is a major revision and expansion of Taylor's seminal book Radiocarbon Dating An Archaeological Perspective It covers the major advances and accomplishments of the ^{14}C method in archaeology and analyzes factors that affect the accuracy and precision of ^{14}C based age estimates In addition to reviewing the basic principles of the method it examines ^{14}C dating anomalies and means to resolve them and considers the critical application of ^{14}C data as a dating isotope with special emphasis on issues in Old and New World archaeology and late Quaternary paleoanthropology This volume again a benchmark for ^{14}C dating critically reflects on the method and data that underpins in so many cases the validity of the chronologies used to understand the prehistoric archaeological record

Carbon Cycles and Climate Jerry S. Olson, Linda J. Allison, Bobbie-Neal Collier, 1980 This partially annotated bibliography contains the first 1000 references from a computerized file of literature on the global ecological implications of carbon cycles and climatic changes Many early citations originated from the Biogeochemical

Ecological Information Center established at Oak Ridge National Laboratory in 1968 and from profiles of computerized files such as Government Research Abstracts GRA and Biological Abstracts BA Later citations have been extracted from the open literature through 1978 and early 1979 from government reports and impact statements and from profiles of GRA BA and the Energy Data Base of the Department of Energy Technical Information Center Oak Ridge Tennessee The subject categories covered by this bibliography may be divided into two main topics carbon cycling and climate system analysis Volume I contains an introduction and overview Volume 2 contains an alphabetical by author listing of citations Volume 3 provides indexes for author organization corporate authority keywords or free index terms taxonomic category subject category Chemical Abstracts codes Biological Abstracts codes crosscode and COSATI Weekly Government Abstracts codes concentrated with permuted title words

Maximum Entropy and Bayesian Methods P.F. Fougère, 2012-12-06 This volume represents the proceedings of the Ninth Annual MaxEnt Workshop held at Dartmouth College in Hanover New Hampshire on August 14 18 1989 These annual meetings are devoted to the theory and practice of Bayesian Probability and the Maximum Entropy Formalism The fields of application exemplified at MaxEnt 89 are as diverse as the foundations of probability theory and atmospheric carbon variations the 1987 Supernova and fundamental quantum mechanics Subjects include sea floor drug absorption in man pressures neutron scattering plasma equilibrium nuclear magnetic resonance radar and astrophysical image reconstruction mass spectrometry generalized parameter estimation delay estimation pattern recognition heave responses in underwater sound and many others The first ten papers are on probability theory and are grouped together beginning with the most abstract followed by those on applications The tenth paper involves both Bayesian and MaxEnt methods and serves as a bridge to the remaining papers which are devoted to Maximum Entropy theory and practice Once again an attempt has been made to start with the more theoretical papers and to follow them with more and more practical applications Papers number 29 30 and 31 by Kesaven Seth and Kapur represent a somewhat different perhaps even unorthodox viewpoint and are included here even though the editor and indeed many in the audience at Dartmouth disagreed with their content I feel that scientific disagreements are essential in any developing field and often lead to a deeper understanding

Late Quaternary Environmental Change in North-west Europe: Excavations at Holywell Coombe, South-east England R. Preece, D.R. Bridgland, 2012-12-06 Holywell Coombe an embayment in the chalk scarp overlooking Folkestone Kent was designated a geological Site of Special Scientific Interest in 1985 because it contains richly fossiliferous Late Quaternary sediments providing a unique archive of the last 13 000 years The construction of the Channel Tunnel across the Holywell Coombe SSSI brought about a major rescue excavation funded by Eurotunnel that set an important precedent in Earth Science conservation This multidisciplinary investigation has added enormously to our understanding of the environment and natural history of the Late glacial and Holocene The climatic complexity of the Late glacial is recorded in the nature of the sediments the fossils recovered from them and the soils developed within them From the Neolithic and

especially during the Early Bronze Age the slopes were destabilized as a result of forest clearance leading to the accumulation of hillwash Archaeological excavations in the hillwash have revealed evidence of prehistoric occupation and agricultural activity in the coombe Eurotunnel also funded biological surveys of the local terrestrial and aquatic habitats Combining these with the fossil evidence it has been possible to document the pedigree of our present fauna and flora providing one of the most detailed and comprehensive studies of its kind With contributions from eminent Quaternary scientists from several countries this work will be an important resource for researchers lecturers and postgraduate students in Quaternary sciences geology geography biology ecology and archaeology as well as for government bodies concerned with nature conservation and environmental protection
