Rainfall Simulation Runoff And Soil Erosion Catena Supplement 4:

Soil Erosion Danilo Godone, Silvia Stanchi, 2011-11-21 Soil erosion affects a large part of the Earth surface and accelerated soil erosion is recognized as one of the main soil threats compromising soil productive and protective functions. The land management in areas affected by soil erosion is a relevant issue for landscape and ecosystems preservation. In this book we collected a series of papers on erosion not focusing on agronomic implications but on a variety of other relevant aspects of the erosion phenomena. The book is divided into three sections: i various implications of land management in arid and semiarid ecosystems; ii erosion modeling and experimental studies; iii other applications e.g. geoscience engineering. The book covers a wide range of erosion related themes from a variety of points of view: assessment, modeling, mitigation, best practices etc. Catena Supplement, 1988.

Environmental Management Handbook, Second Edition - Six Volume Set Sven Erik Jorgensen, Brian D. Fath, 2022-07-30 Bringing together a wealth of knowledge the Handbook of Environmental Management Second Edition gives a comprehensive overview of environmental problems, their sources, their assessment, and their solutions. Through in-depth entries and a topical table of contents, readers will quickly find answers to questions about pollution and management issues. This six-volume set is a reimagining of the award-winning Encyclopedia of Environmental Management published in 2013 and features insights from more than 500 contributors, all experts in their fields. The experience, evidence, methods, and models used in studying environmental management is presented here in six stand-alone volumes arranged along the major environmental systems. Features of the new edition: The first handbook that demonstrates the key processes and provisions for enhancing environmental management. Addresses new and cutting-edge topics on ecosystem services, resilience, sustainability, food-energy-water nexus, socio-ecological systems, and more. Provides an excellent basic knowledge on environmental systems, explains how these systems function, and offers strategies on how to best manage them. Includes the most important problems and solutions facing environmental management today.

Monitoring and Modelling Dynamic Environments Alan P. Dykes, Mark Mulligan, John Wainwright, 2015-09-28 The Times Obituaries 4 August 2008 reported that John Thornes was one of the most eminent and influential physical geographers of his generation. John's keen interest in understanding landform processes and evolution was furthered through a variety of methods and informed across a range of disciplinary boundaries. In particular, he pushed for better integration of monitoring, theoretical, and simulation modelling, field and laboratory experimentation, and remote sensing techniques. Although dominated by an interest in the Mediterranean region and problems of land degradation, his research activities ranged across a number of time scales and with other environmental perspectives. This collection of papers reflects this wide range of John's interests through the recent work of scientists and professionals most strongly influenced by his rigorous training or leadership. The thematic focus of the book, which runs through all of the main contributions, is the integration of different methodologies and the application of this approach to improved understanding of natural systems and the development of appropriate strategies.

for environmental and resource management Short overviews of John s contributions to geomorphological research are also presented to provide context for the origins of this book

Managing Soils and Terrestrial Systems Brian D. Fath, Sven Erik Jorgensen, 2020-07-29 Bringing together a wealth of knowledge Environmental Management Handbook Second Edition gives a comprehensive overview of environmental problems their sources their assessment and their solutions Through in depth entries and a topical table of contents readers will quickly find answers to questions about environmental problems and their corresponding management issues This six volume set is a reimagining of the award winning Encyclopedia of Environmental Management published in 2013 and features insights from more than 400 contributors all experts in their field The experience evidence methods and models used in studying environmental management are presented here in six stand alone volumes arranged along the major environmental systems Features The first handbook that demonstrates the key processes and provisions for enhancing environmental management Addresses new and cutting edge topics on ecosystem services resilience sustainability food energy water nexus socio ecological systems and more Provides an excellent basic knowledge on environmental systems explains how these systems function and offers strategies on how to best manage them Includes the most important problems and solutions facing environmental management today In this third volume Managing Soils and Terrestrial Systems the general concepts and processes of the geosphere with its related soil and terrestrial systems are introduced It explains how these systems function and provides strategies on how to best manage them It serves as an excellent resource for finding basic knowledge on the geosphere systems and includes important problems and solutions that environmental managers face today This book practically demonstrates the key processes methods and models used in studying environmental management

Agricultural Nonpoint Source Pollution A. Giorgini, F. Zingales, 2013-10-22 This volume contains most of the scientific contributions to the workshop Prediction of

Agricultural Nonpoint Source Pollution Model Selection and Application held in Venice in the historic Ca Vendramin Calergi in June 1984 Other contributions of specialists who were not able to attend the workshop have also been included in an attempt to make the work more complete It is hoped that this collection will be useful to planners who operate in the field of agricultural diffuse source pollution since several contributions are state of the art presentations and others are specialized studies by American and European researcher

Geomorphology of Desert Environments Anthony J. Parsons, A. D. Abrahams, 2009-03-20 About one third of the Earth's land surface experiences a desert climate and this area supports approximately 15% of the planet's population This percentage continues to grow and with this growth comes the need to acquire and apply an understanding of desert geomorphology Such an understanding is vital in managing scarce and fragile resources and in mitigating natural hazards This authoritative reference book is comprehensive in its coverage of the geomorphology of desert environments and is arranged thematically It begins with an overview of global deserts proceeds through treatments of weathering hillslopes rivers piedmonts lake basins and aeolian surfaces and concludes with a discussion of the role of climatic change Written by a team of international authors all of whom are active in the field the chapters cover the spectrum of desert geomorphology

Fundamentals of Geomorphology Roger John Rice, 1988
Geomorphology of Upland Peat Martin Evans, Jeff Warburton, 2011-03-29 The Geomorphology of Upland Peat offers a detailed synthesis of existing literature on peat erosion incorporating new research ideas and data from two leading experts in the field Presents the most detailed and current work to date Written in a style that is both intelligent and accessible Fully illustrated with original drawings and photographs Relevant and information for a broad audience working on organic sediments in various environments

Farmers' Indicators for Soil Erosion Mapping and Crop Yield Estimation in Central Highlands of Kenya Barrack O. Okoba, 2005 Crop yield losses were closely correlated to soil erosion indicators as well as to soil erosion status

Environmental Issues in the Mediterranean John B. Thornes, John Wainwright, 2004-03 The Mediterranean has been subject to changing human settlement and land use patterns for millennia This book reviews both physical and social aspects of this region in relation to its environment

Land Degradation Anthony Chisholm, Anthony H. Chisholm, Robert Dumsday, 1987 This book presents a broad multi disciplinary perspective on the challenge of problems of degrading land

Ecological Aspects of Soil and Land Preservation Pasko, Olga Anatolievna, Lebedeva, Nadezhda Anatolievna, 2024-07-16 Agricultural lands worldwide are deteriorating becoming acidic and losing essential humus content This impacts global food quality and nutrition Causes include extreme natural events and harmful human activities like deforestation The consequences are stark shrinking agricultural land reduced fertility lower crop yields and increased costs Developing nations face food shortages population decline and shortened life expectancy The urgency demands international cooperation legislation and technological advancements Ecological Aspects of Soil and Land Preservation delves into this critical issue emphasizing the need for collective action and sustainable solutions Ecological

Aspects of Soil and Land Preservation serves as a resource for scholars students and professionals committed to addressing the crisis This book collects summarizes and analyzes the latest information on agricultural land and forest degradation Beyond that it introduces groundbreaking hypotheses theories and solutions enriching the scientific community s understanding The objective is clear to be an informative resource that not only sheds light on the problem but also catalyzes actionable solutions *FRDA Report* ,1994 **Soil Survey and Land Evaluation** ,1983 *Arid and Semi-arid Environments* Aaron Yair,Simon M. Berkowicz,1989 **Soil Erosion and Conservation** R. P. C. Morgan,2009-02-05 Soil Erosion and Conservation provides a comprehensive treatment of the processes of soil erosion the methods that can be used for their control and the issues involved in designing and implementing soil conservation programmes Features of the third edition of this internationally recognised textbook include New material on gully erosion tillage practices erosion risk assessment use of erosion models incentives for farmers and land users and community approaches to erosion control Updated sections on the mechanics of wind erosion soil erodibility use of vegetation in erosion control traditional soil conservation measures socio economic issues and the role of government Describes the methods used to assess the risk of erosion and predict rates of soil loss Outlines the social economic political and institutional constraints on implementing soil protection measures Covers erosion and its control for agriculture grazing forestry mining land road banks pipeline corridors and recreation Provides worldwide coverage of the success and failure of erosion control using material from Europe Africa Australia America and Asia An Instructor manual CD ROM for this title is available Please contact our Higher Education team at HigherEducation.wiley.com for more information [Water Encyclopedia, Oceanography; Meteorology; Physics and Chemistry; Water Law; and Water History, Art, and Culture](#) Jay H. Lehr,2005-06 Volume 1 outlines water supply infrastructure The requirements for supplying water to a home a city or a factory can be very different Experts in these fields explain the nuances of the details involved in maintaining adequate quantity and quality for these different consumers Waste water management can be of even greater concern yet its management can follow similar paths when compared to sophisticated water supply treatment Both the physics and chemistry of these fields are fully covered Volume 2 deals with the big picture of regional water supplies how they become contaminated how they can be protected and how they can best serve the surrounding populations and industries Significant focus is placed upon the natural chemistry of available water supplies and its biological impacts Case studies from regions around the world offer an excellent picture of the world s water resources *Impacts of Biomass Harvesting on Soil Disturbance and Surface Soil Erosion at Sella Creek in Interior British Columbia* P. R. Commandeur,Mark E. Walmsley,Pacific Forestry Centre,1993 Numerous studies have documented the soil disturbance effects of ground based harvesting systems Biomass harvesting in the form of the additional recovery of woody materials normally left on site has the potential for increasing the levels of soil disturbance The objective of this study was to document the impact of biomass harvesting by rubber tired skidders on soils namely soil disturbance and surface soil erosion

An increase in soil disturbance in the form of skid trails skidroads and deep and very deep gouges was observed on the biomass harvested plots compared to the conventionally harvested plots Erosion bridges indicated more soil movement on the biomass than the conventional plots Soil erosion volumes trapped behind sediment dams located at the base of the plots were greater on the biomass plots average of 0.38 m³ over 1.77 years than on the conventional plots average of 0.22 m³ However the unharvested plots also recorded accumulation of material where in fact no mineral soil erosion occurred average of 0.15 m³ This was the result of vegetation growth and decay and the accumulation of organic matter Adjusted average erosion values of 0.78 m³ ha year for the biomass plots and 0.37 m³ ha year for the conventional plots are comparable to data obtained from studies conducted on clearcut and burned sites in the Oregon Cascades These erosion figures are considered moderate and numerous site factors help explain this observed response Rainfall simulation experiments conducted at the site indicated that infiltration rates on skidroads and fireguards are generally greater than 1.5 cm hour Rainfall intensities 15 minute duration that exceed 1.5 cm hour are expected to occur with a return period of about 1 year at the study site Spring snow melt rates may exceed infiltration capacities especially along compacted low infiltration areas such as skidroads Some overland flow and surface soil erosion is expected to occur elsewhere under similar conditions as those found at the study site Recommendations are given regarding the measurement techniques used in this study
