Role Of Subject Knowledge In The Early Years:

The Role of Subject Knowledge in the Early Years of Schooling Carol Aubrey, 2022-11-21 Originally published in 1994 the aim of the authors was to provide a comprehensive introduction to recent advances in research which had been made in learning and teaching in the early years of schooling at the time Emphasis is placed on how subject knowledge is constructed or acquired and the organization of teaching to promote the learner's active construction of meaning through the integration of new knowledge with existing understanding The National Curriculum is founded in subject knowledge though little examination appears to have been made of this in terms of how subject matter is transformed into the content of teaching that young children can understand It this remains for the teacher to develop instruction through the creation of a curriculum content and sequence which both reflects and advances the structure of existing forms of representation problem solving and knowledge which the child brings to the school The whole thrust of the book challenges the conventional early years ideology with its emphasis on child centred concrete and empirical approaches to learning with a view of teaching which is concerned with making sense of children's understanding and allowing their active construction of knowledge and information processing to develop expertise in context *The Role of Subject Knowledge in the Early Years of Schooling* Carol Aubrey, 1994

National Curriculum In The Early Years Dr Theo Cox, Theo Cox, 2014-05-01 The child centred principles of early years education which emphasize play and holistic learning are being challenged by the implementation of a subject based National Curriculum The contributors to this book explore this challenge and offer some ways of meeting it practically and productively Issues covered include pedagogical issues such as the cross curricular topic based teaching teacher's attitudes to subject knowledge assessment issues including baseline assessment at the age of five and parental attitudes to the National Curriculum and its content at Key Stage 1

Researching the Early Years Continuum Pat Broadhead, 1996 Makes a case for considering the years from birth to eight as a continuum of development and learning The text draws on research undertaken by nursery and primary teachers in conjunction with LEAs and by HE staff **Learning in the Early Years 3-7** Jeni Riley, 2007-06-26 This second edition book is a welcome contribution to the early years literature base providing much needed information and a somewhat innovative response concerning how effectively to translate the Early Years Foundation Stage into practice Early Years This second edition of Learning in the Early Years has been fully updated to bring it in line with the Statutory Framework for the Early Years Foundation Stage The presentation and style is very readable and accessible and as such the book provides an excellent resource for students and experienced early years practitioners alike Early Years Update Praise for the First Edition It was a joy to read this book This book provides a wealth of ideas for reflection as well as guidance to promote knowledge and skills essential in early years teaching Dario Pellegrini Educational Psychologist I found it hard to put it down I particularly liked the way it followed through into Key Stage 1 Who Minds An important contribution to difficult work Elizabeth Quintero The Steinhardt School of Education

contemporary issues that practitioners and students on placement may encounter in their everyday work deepening reflective thinking and practice through ongoing and continuing professional development With practical guidance to help the reader reflect on their own practice this text offers invaluable support to early years practitioners looking to develop their career and achieving higher qualification at both undergraduate and at Master s level The book is a must for students on early years courses including early childhood studies initial teacher training and early years teacher status

Children's Mathematics Elizabeth Carruthers, Maulfry Worthington, 2006-08-30 In Case Study 5 a grassroots Children s Mathematics Network group the initiative supported the participants in their professional change by giving them a space for the detailed and joint consideration of children s mathematical thinking Another significant feature of this initiative is its focus on careful consideration and analysis of children s mathematics and the ways in which professionals can support and encourage the children s mathematical thinking and reasoning The standard of the mathematical understanding thinking and reasoning that the displays revealed was far higher than the specified curriculum objectives for children of this age Researching Effective CPD in Mathematics Education RECME project NCETM 2009 The review also plays great score by play based learning of a mathematical nature and makes specific recommendations regarding early mark making as a precursor to abstract mathematical symbolism Section 115 features children s mathematical graphics and emphasises The role of mark making in children s cognitive development is set out in the taxonomy Carruthers and Worthington 2006 The report recommends that local authorities leaders managers and head teachers should provide a culture with a significant focus on mathematical mark making and a learning environment that encourages children to choose to use their own mathematical graphics to support their mathematical thinking and processes The Williams Maths Review DCSF 2008 At the very heart of the success of the book is the authors ability to see mathematics through young children s eyes by listening to and reflecting on the constant efforts made by children to make sense of their world This is a liberating book which proposes that the teaching of mathematics could and should be a highly creative and enjoyable process Branwen Llewelyn Jones Early Years Consultant at PACE Ltd TACTYC Ground breaking To single out any one chapter would be unfair because there is something thought provoking and inspirational throughout If you want to expand your understanding upwards and outwards then get a copy soon Times Educational Supplement I first read Children s Mathematics Making Marks Making Meaning a couple of years ago and it had an immediate impact on my own thinking and teaching and the work I do with trainee teachers I m sure you will find it compelling reading too I think it has the potential to change in a fundamental way how we think about early mathematical development Lynne McClure Editor Math Coordinator s File Mathematics Association In their exceptionally readable and informative book Children s Mathematics Making Marks Making Meaning Carruthers and Worthington 2006 draw attention to one of the main goals of early years teaching that is to help children make links between the mathematics they have already encountered and continue to engage with at home and the more abstract mathematics of the school These

authors suggest that by encouraging children to represent mathematical ideas in their own ways and crucially by talking to the pupils about the marks they have made we are given a window onto their thinking that may otherwise be inaccessible Liz Pumphrey NRICH This book draws on the authors many years of teaching children aged three to eight years and also on their extensive research with children in the home nursery and school The authors explain the development and range of young children s mathematical marks and visual representations showing how children make mental connections between their own early marks and subsequent abstract mathematical symbolism and go on to develop their own written methods Combining theory and practice this acclaimed book demonstrates how children s own mathematical graphics are highly creative and show deep levels of thinking The authors show how this is the key to success in school mathematics and to higher levels of achievement The authors are winners of TACTYC s 2003 Jenefer Joseph Award for the Creative Arts 3 8 awarded for their innovative work with children on mathematical graphics **Early Years Science Education** Mike Watts, Alison

Silby, 2020-04-28 The educational provision for early years is growing and changing across many parts of the world not least in the UK While this book leans heavily on the mounting literature on early child development in its broadest sense physically emotionally linguistically its central focus lies squarely on the growth of children s scientific thinking and activities Written by educators this book is based both on formal educational research and professional practice in action The authors describe children s science concept development their curiosity driven exploration emergent ecological literacy their learning through science play the assessment of early learning the role of parents and practitioners within early education contexts and some question the very basis of the science being taught Illustrations and examples of practice are not confined to the UK though the messages to be derived from each chapter have application way beyond the immediate context This book was originally published as a special issue of Early Child Development and Care Education in Early Childhood Sue Robson, 2012-11-12

This work designed to be used as a basic textbook for student teachers taking B Ed and PGCE initial training courses provides an accessible but rigorous treatment of early childhood education integrating ideas and practice acts as a springboard for students further study arose out of the concerns and needs expressed by students themselves and has been written from a well known centre for early childhood studies Practitioner examples are included throughout together with selected readings A Practical Guide to Teaching Reading in the Early Years Ann Browne, 1998-09-28 This is a clear jargon free analysis of current national curriculum and national literacy strategy documents combined with sensible and creative suggestions for implementing them the activities are imaginative consistent and true to the author s ideal of a full and empowering critical literacy for all children Times Educational Supplement Friday Magazine A Practical Guide to Teaching Reading in the Early Years meets the needs of student teachers on undergraduate and postgraduate teachers training courses It addresses the English National Curriculum for Teacher Training as well as covering the curriculum requirements for young children It will also be relevant **Contemporary Issues in the Early Years** Gillian Pugh, Bernadette

Duffy, 2009-11-25 Written and edited by leading practitioners and researchers in early childhood this new edition of Pugh and Duffy's highly regarded book provides a critical examination of key issues in the field. The fifth edition is extensively revised to emphasise the role of multi-agency working in responding effectively to the needs of children and families. Written with the new Early Years Foundation Stage and the Early Years Professional Status requirements in mind, the new edition of this best-selling book includes fully updated coverage of policy and research practice and workforce issues as well as four brand new chapters on Children's Centres, Health services in the early years, Leading and working in multi-agency teams, Quality in early childhood education. This book is essential reading for students on early childhood studies courses, PGCEs and early years foundation degrees and multi-agency team workers in early childhood services provision. Dr Gillian Pugh is Visitor Professor at the Institute of Education and former chief executive of Coram Family. Bernadette Duffy is Head of Centre at Thomas Coram Centre for Children and Families in Camden.

Understanding Science Teachers' Professional Knowledge Growth Michel Grangeat, 2015-12-09 Science education has to be improved in order to become more responsive to the needs of society confronted with a rapidly changing world. Bringing science teaching up to a higher level is a key factor in this endeavour. The authors of this book think about teachers as part of the immediate and large communities and systems in which they function. They consider the development of teachers' professional knowledge as a continuous process that depends on the communities they are committed to and participate in, the discipline they are teaching, the social context in which they perform, the instruments made available in their environment and their day-to-day classroom experience. From this perspective, each teacher learns in an individual way but cannot learn without relying on their colleagues and other partners. Such professional knowledge is partly tacit and explicit and thus possessed by teachers, experts and researchers. Coordinating activity theory and models of pedagogical content knowledge (PCK), the book provides a better understanding of the growth of science teacher professional knowledge. The chapters are organised around shared perspectives and themes and based on research findings. The emerging model can inform pre-service teacher educators, researchers and students. The book results from exchanges and symposia during international conferences ECER ESERA and from a two-day seminar held at Université Grenoble Alpes in March 2015.
