Ronald Hudkins, 2018-11-18 The scientist who announced the solution to the last challenge in the building of the elevator tether is treated as a world hero. Meanwhile the head of the military starts receiving data that suggests something else is going on in our outer atmosphere and begins researching deeper. It is discovered that there are aliens in orbit around the planet. The military also discovered that these aliens had contacted the hero scientist while he was performing duties at the ISS. They suspect that the meeting was related to the tether and the advanced technological information exchange had a deeper and subsequent evil meaning. It dawns on a handful of scientists and military members that the aliens could use the tether and the climbing machine to overcome their inability for their cargo craft to penetrate Earth's atmosphere and come down once the first payload is brought up. Will the launch happen? Are the aliens preparing to come down the tether? What is the end game really on either side of the developing situation?
