## **Machines With A Purpose:**

*Machines with a Purpose* H. H. Rosenbrock, 1990 There is at present a widespread unease about the direction in which our technology is taking us apparently against our will Advances continue to damage the environment and reduce human work to the trivial mechanical repetition of actions which have no human meaning Attempts to design technology which complements rather than rejects human skills are all too often frustrated by the current scientific belief that man is a machine and what is more that he can contribute nothing that cannot equally well be contributed by a machine This challenging and stimulating book refutes four centuries of science based on strictly causal explanations It shows that man and nature can be viewed as machines with a purpose and that the advancement of technology can be to the benefit and not the detriment of the human race and the environment
