Kumar, Hossein Samiei, 1993-09-01 This paper discusses three important extensions to the developing country scenario and adjustment model used in the World Economic Outlook exercises First the model is augmented to include fiscal and monetary sectors and now explicitly captures links among government policy investment output and inflation Second the external sector is modified to allow domestic demand factors to influence imports as well as allowing flexibility in the financing of imports Third the model system is extended to the group of net creditor countries and for the oil exporters within this group oil exports are modeled separately The revised model is estimated for each of the 95 developing countries and parameter estimates for each of the main equations are presented The paper also reports the results of four simulation exercises to illustrate how the new model system may be used to quantify the effects of changes in domestic policies and in the external environment **Macroeconomic Interactions Between the North and South** David A. *Brexit and the Political Economy of Ireland* Paul Teague, 2021-05-03 The UK's departure from the EU has profoundly affected the politics and economics of Northern Ireland Brexit has shattered a political accommodation that was

taking shape in the region that involved nationalism and unionism refraining from aggressively pursuing their own objectives or making excessive demands on each other Economically it has made the task of building an innovative economy in the region immeasurably more difficult Without radical change Northern Ireland is destined to be an economic outhouse of an under performing UK economy This book represents the first systematic study of the impact of Brexit on the political and economic future of Northern Ireland and Ireland It provides a detailed assessment of the consequences of the Belfast Agreement and highlights how Brexit imperils the advances that have been made since its signing in 1998 It makes a dispassionate assessment of the changes that may be necessary to create a stronger Northern Ireland economy On the one hand demands for the immediate unification of Ireland that are now being made loudly and persistently by nationalists and republicans are considered too precipitous The two economies on the island are not yet ready for Irish unity On the other hand the book argues the case for a radical reorientation of the Northern Ireland economy through the incremental creation of an all Ireland economy The book cuts through the rhetoric that characterizes so much discussion about the Northern Ireland economy and provides a hard headed appraisal of not only its structure and performance but also the economic feasibility of Irish unity

**Inter-Korean Relations** S. Kim, 2004-09-17 In post cold War thinking North Korea was expected to collapse and be absorbed into a single Korean state by the democratic regime in South Korea Fifteen years later this has not happened and June 2000 saw a summit making the warmest inter Korean relations yet Over that time period the two Korean states found instead new mechanisms and methods for interacting with each other on the level of de facto if not yet completely de jure sovereign states and have begun to

overcome some of the shadows cast by the partition and violent war that befell the peninsula following World War II This book examines the origins dynamics and impacts of these multi level relations between North and South Korea situating them variously as two incomplete nation states as a single national entity and within a larger international environment The Contributors demonstrate how inter Korean relations have fostered new forms of conflict management and reconciliation on the peninsula
