Manifesting Power Gender And The Interpretation Of Power In Archaeology:

Manifesting Power Tracy L. Sweely, 1999 Publisher description Manifesting Power confronts the relationship between gender and power within prehistoric and historic societies It addresses the extent to which our reconceptions of the nature of power and of relations between the sexes are rooted in our own experience of western society and argues that both conditions and perceptions may have been quite different among peoples of the past This collection includes nine innovative chapters which draw on data from a range of periods and areas By looking at the evidence for gender distinctions both from archaeological sites and from ethnographic observation the contributors explore what these distinctions can reveal about power relationships in general They argue that the evidence often does not point to the existence of hierarchical gender relationships and explore the forms of power available to women among the Maya and Aztec and in prehistoric Denmark Alaska and the southeastern United States **Handbook of Gender in Archaeology** Sarah M. Nelson, 2006 First reference work to explore the research on gender in archaeology **Signs of Power** Jon L. Gibson, Philip J. Carr, 2004-05-11 By focusing on the first instances of mound building pottery making fancy polished stone and bone as well as specialized chipped stone artifacts and their widespread exchange this book explores the sources of power and organization among Archaic societies **Ungendering Civilization** K. Anne Pyburn, 2004 Nine papers examines a specific body of archaeological data from societies including Minoan Crete ancient Zimbabwe and the Maya in order to discuss the role of women in the evolution of states **Race and Practice in Archaeological Interpretation** Charles E. Orser, Jr., 2013-04-19 Scholars who investigate race a label based upon real or perceived physical differences realize that they face a formidable task The concept has been contested and condoned debated and denied throughout modern history Presented with the full understanding of the complexity of the issue Race and Practice in Archaeological Interpretation concentrates on the archaeological analysis of race and how race is determined in the archaeological record Most archaeologists even those dealing with recent history have usually avoided the subject of race yet Charles E Orser Jr contends that its study and its implications are extremely important for the science of archaeology Drawing upon his considerable experience as an archaeologist and using a combination of practice theory as interpreted by Pierre Bourdieu and spatial theory as presented by Henri Lefebvre Orser argues for an explicit archaeology of race and its interpretation The author reviews past archaeological usages of race including a case study from early nineteenth century Ireland and explores the way race was used to form ideas about the Mound Builders the Celts and Atlantis He concludes with a proposal that historical archaeology cast as modern world archaeology should take the lead in the archaeological analysis of race because its purview is the recent past that period during which our conceptions of race developed T&T Clark Handbook of Anthropology and the Hebrew Bible Emanuel Pfoh, 2022-12-15 This handbook presents an overview of the main approaches from social and cultural anthropology to the Hebrew Bible Since the late 19th century biblical scholarship has addressed issues and themes related to

biblical stories from a perspective which could now be considered socio anthropological It is however only since the 1960s that biblical scholars have started to produce readings and incorporate analytical models drawn directly from social anthropology to widen the interpretive scope of the social and historical data contained in the biblical sources The handbook is arranged into two main thematic parts Part 1 assesses the place of the Bible in social anthropology examines the contribution of ethnoarchaeology to the recovery of the social world of Iron Age Palestine and offers insights from the anthropology of the Mediterranean for the interpretation of the biblical stories Part 2 provides a series of case studies on anthropological themes arising in the Hebrew Bible These include kinship and social organisation death cultural and collective memory and ritualism Contributors also examine how the biblical stories reveal dynamics of power and authority gender and honour and shame and how socio anthropological approaches can reveal these narratives and deepen our knowledge of the human societies and cultural context of the texts Bringing together the expertise of scholars of the Hebrew Bible and Biblical Archaeology this ethnographic introduction prompts new questions into our understanding of anthropology and the Bible

Spencer-Wood, 2012-12-09 In many facets of Western culture including archaeology there remains a legacy of perceiving gender divisions as natural innate and biological in origin This belief follows that men are naturally pre disposed to public intellectual pursuits while women are innately designed to care for the home and take care of children In the interpretation of material culture accepted notions of gender roles are often applied to new findings the dichotomy between the domestic sphere of women and the public sphere of men can color interpretations of new materials In this innovative volume the contributors focus explicitly on analyzing the materiality of historic changes in the domestic sphere around the world Combining a global scope with great temporal depth chapters in the volume explore how gender ideologies identities relationships power dynamics and practices were materially changed in the past thus showing how they could be changed in the future Ambiguous Images Kelley Hays-Gilpin, 2004 What does rock art say about gender and how can our understanding of gender shape the way that we view rock art A significant contribution to the relatively unexplored field of gender in rock art this volume contains a wealth of information for archaeologists anthropologists and art historians interested in past gender systems Hays Gilpin argues that art is at once a product of its physical and social environment and at the same time a tool of influence in shaping behavior and ideas within a society Taking this stance rock art is shown to be very often one of the strongest lines of evidence available to scholars in understanding ritual practices gender roles and ideological constructs of prehistoric peoples Subsequently issues of representation and the people who made these forms of art are also discussed **The Bible, Gender, and Sexuality:**
