Manipulation and Consent David J. Elkins, 1993 Sure says Elkins political science U of British Columbia when the polls ask everyone about everything it is easy to conclude that nobody know anything about politics But in fact almost everyone knows a great deal about a few things and belongs to one of the specific issue publics The result is that as a whole the general public is much more informed about and involved in public policy than has been thought Annotation copyright by Book News Inc Portland OR *Theory and Methods in Comparative Policy Analysis Studies* Iris Geva-May, B. Guy Peters, Joselyn Muhleisen, 2020-06-09 Volume One of the Classics of Comparative Policy Analysis Theory and Methods in Comparative Policy Analysis Studies includes chapters that apply or further theory and methodology in the comparative study of public policy in general and policy analysis in particular Throughout the volume the chapters engage in theory building by assessing the relevance of theoretical approaches drawn from the social sciences as well as some which are distinctive to policy analysis Other chapters focus on various comparative approaches based on developments and challenges in the methodology of policy analysis Together this collection provides a comprehensive scholastic foundation to comparative policy analysis and comparative policy studies Theory and Methods in Comparative Policy Analysis Studies will be of great interest to scholars and learners of public policy and social sciences as well as to practitioners considering what can be learned or facilitated through methodologically and theoretically sound approaches The chapters were originally published as articles in the Journal of Comparative Policy Analysis which in the last two decades has pioneered the development of comparative public policy The volume is part of a four volume series the Classics of Comparative Policy Analysis including Theories and Methods Institutions and Governance Regional Comparisons and Policy Sectors Each volume showcases a different new chapter comparing domains of study interrelated with comparative public policy political science public administration governance and policy design authored by the JCPA co editors Giliberto Capano Iris Geva May Michael Howlett Leslie A Pal and B Guy Peters **The Clinton Presidency** Stanley Renshon, 2019-06-26 The Clinton presidency faced a basic set of public questions at the outset regarding its real intentions strategies and competence Would the administration be able to develop and implement policies that were constructive in intent fair in formulation and successful in result Would President Clinton be able to govern as successfully as he campaigned Would there be a productive fit between Clinton's leadership style and the needs of the public Additional questions arise about Clinton personally Many admire him others distrust him What realistic basis is there for either view This book explores these questions and develops an initial appraisal of the Clinton presidency The chapters herein are framed by theories of political leadership and psychology They draw on a diverse body of theories including psychological theories of character and personality cognitive psychology and communication theory theories of presidential leadership and performance and theories of public psychology The goal is to examine the many facets of leadership and governing that constitute the modern presidency and to locate Bill Clinton's emerging presidency within

that framework Bill Clinton is and likely will remain a controversial president One objective of this analysis is to provide a clearer more objective framework in which to evaluate both the man and his approach to political leadership and executive power and the consequences of his approach for public psychology and policy *Participation and Democracy East and West* Dietrich Rueschemeyer,2015-05-11 Since Alexis de Tocqueville first made the linkage in his writings on America a healthy democracy has been associated with the flourishing of civil society as measured by popular participation in voluntary and civic activities and the vitality of organizations that mediate between the individual and the state This volume takes a fresh look at this classic theme in the context of post communist Eastern Europe the West European welfare states and the United States asking what patterns of participation characterize the new democracies of Eastern Europe what levels of civic activism are characteristic of contemporary Western democracies what factors account for differences among countries and changing patterns over time and what do findings suggest about the prospects for democracy in the 21st century Out of Order Ellen Carnaghan,2010-11-01 U.S.-Israeli Relations at the Crossroads Gabriel Sheffer,1997 The dramatic global regional and domestic changes that occurred after the unpredicted collapse of the Soviet Union have created a need to examine a host of theoretical and practical issues particularly in regard to security and foreign relations The U S Israeli special relationships is no exception This seemed and is still viewed as one of the most solid and stable bilateral relationships Yet the new international and domestic reality in both the U S and Israel warrants a thorough re examination The essays in this collection deal with among other things the general global setting and its implications for this relationship with hard strategic factors and less tangible aspects such as American images of Israel the attitudes of other American religious denominations and the situation of the American Jewish community **Schools, Vouchers, and the American Public** Terry M. Moe,2004-05-13 Moe s new book is not an argument for or against vouchers it is an analysis of public opinion on vouchers that is likely to be very influential in shaping the movement s future Moe has written a nuanced and thoughtful treatise that goes beneath the notoriously unreliable single shot question favored by the media Do you favor or oppose school vouchers Richard D Kahlenberg in *The Nation* In a brilliant definitive analysis of the subject Terry Moe tells us who does and does not like vouchers as well as who says they will use them if the opportunity arises He illuminates not only the school choice debate but the nature of public opinion more generally Paul E Peterson Harvard University No book tells us more about how Americans evaluate schools This book will be the starting point for anyone interested in any school reform not just vouchers A model analysis of public opinion on a public policy Samuel Popkin University of California San Diego Finally a book on school vouchers that explores what ordinary Americans want and believe when thoughtfully engaged on the issue Stephen D Sugarman University of California *Comparative Civic Culture* Professor Laura A Reese,Professor Raymond A Rosenfeld,2013-04-28 The quest for a theoretical framework for understanding urban policy making has been a recurring focus of research into local governments Civic culture is a means for understanding how municipal policy makers weigh the

interests of different groups govern the local community frame local goals engage in decision making and ultimately select and implement public policies While it seems that culture matters in local policy making how to measure culture in a valid and replicable fashion presents a significant challenge which the authors address in this book They present their findings of a large multi city research project to explore the nature of civic culture in cities in the US and Canada The focus of their analysis is on three overarching systems of community power system the community value system and the community decision making system The authors address a number of questions around the nature of civic culture and the relationships between the three systemic elements of civic culture to refine and apply a more sophisticated theory of urban policy making

Parties, Candidates, and Constituency Campaigns in Canadian Elections Anthony Sayers, 2011-11-01 Political scientists have traditionally examined the democratic process at the macro level With its unique micro level focus Parties Candidates and Constituency Campaigns in Canadian Elections provides the first systematic analysis of the local constituency campaigns that are the basis of elections and democracy in Canada By taking a detailed look at campaigns in seven B C ridings during the 1988 free trade election the last under the old three party system Anthony Sayers develops a typology of candidates and campaigns The dynamics of local associations nominations and campaigns including those of former prime minister Kim Campbell and New Democrat Svend Robinson as well as key strategic events and the role of the media are reconstructed from interviews with candidates campaign managers party strategists volunteers and journalists The 1993 and 1997 elections are then invoked to show that the insights drawn about the nature of constituency politics remain relevant to the new party system This important contribution to the study of Canadian elections forcefully argues that knowledge of the dynamics at the local level is essential to a full understanding of Canadian polity its underlying social basis and the factors that determine successful election campaigns As such Parties Candidates and Constituency Campaigns in Canadian Elections will intrigue not only political scientists and students of Canadian politics but also election candidates and party strategists **Book**
