Semantic Interpretation and the Resolution of Ambiguity Graeme Hirst, 1987 Semantic interpretation and the resolution of ambiguity presents an important advance in computer understanding of natural language While parsing techniques have been greatly improved in recent years the approach to semantics has generally improved in recent years the approach to semantics has generally been ad hoc and had little theoretical basis Graeme Hirst offers a new theoretically motivated foundation for conceptual analysis by computer and shows how this framework facilitates the resolution of lexical and syntactic ambiguities His approach is interdisciplinary drawing on research in computational linguistics artificial intelligence montage semantics and cognitive psychology *Bulletin* United States National Museum, 1914 **Liquor Store Theatre** Maya Stovall, 2020-10-09 For six years Maya Stovall staged Liquor Store Theatre a conceptual art and anthropology video project included in the Whitney Biennial in 2017 in which she danced near the liquor stores in her Detroit neighborhood as a way to start conversations with her neighbors In this book of the same name Stovall uses the project as a point of departure for understanding everyday life in Detroit and the possibilities for ethnographic research art and knowledge creation Her conversations with her neighbors which touch on everything from economics aesthetics and sex to the political and economic racism that undergirds Detroit's history bring to light rarely acknowledged experiences of longtime Detroiters In these exchanges Stovall enacts an innovative form of ethnographic engagement that offers new modes of integrating the social sciences with the arts in ways that exceed what either approach can achieve alone **Sheikh Mujibur Rahman's Thoughts and Visions** Md Rafiqul Islam, 2025-05-11 Sheikh Mujibur Rahman's Thoughts and Visions Emancipation Peace and Development provides a compelling and nuanced analysis of Sheikh Mujibur Rahman's life philosophy and contributions intertwining them with the frameworks of Political Science and Peace Studies As the architect of Bangladesh Mujib's qualities and ideals resonate with those of other legendary figures like Mahatma Gandhi Martin Luther King Jr and Nelson Mandela This book reveals how his vision for peace emancipation and development is integral to understanding his unwavering commitment to the freedom of the Bengali people Through ten meticulously organized chapters the narrative explores Mujib's journey highlighting his pivotal roles in political emancipation economic empowerment and the pursuit of social justice The text delves into his nation building efforts detailing his ambition to transform Bangladesh into a Sonar Bangla Golden Bengal and his dedication to fostering regional peace in South Asia Furthermore it examines Mujib's evolution into a global leader who advocated for peace and justice on the world stage emphasizing his lasting impact beyond national borders **Type Species of the Genus of Ichneumon Flies** Henry Lorenz Viereck, 1914 **Queens, Eunuchs and Concubines in Islamic History, 661-1257** Taef El-Azhari, 2019-06-24 Drawing on specific historical case studies and events this book looks at the role of women mothers wives eunuchs concubines qahramans and atabegs in the dynamics and manipulation of medieval Islamic politics Catalogue of the

Library,1970 **Russia's Recognition of the Independence of Abkhazia and South Ossetia** Nikoloz Samkharadze,2021-05-18 The Russian Federation's official acknowledgement of the independence of Abkhazia and South Ossetia in August 2008 has since been undermining both overall political stability in the Southern Caucasus in general and future perspectives of Georgia's development in particular. Such recognition of new quasi legal entities without consent of the parent state and a subsequent erosion of the principle of territorial integrity are pressing challenges in current world affairs. The Kremlin's controversial 2008 decision continues to be an important bone of contention in Russian Western relations. This study explores the emergence and recent transformation of modern norms of recognition, secession and self determination in international law. It traces the evolution of Soviet and Russian perspectives on the recognition of new states and discusses overall Georgia Russia relations in order to answer the question: Why did the Kremlin recognize Georgia's two breakaway entities in contradiction to traditional Russian approaches to recognition? The author argues that Moscow's deviant behavior vis vis Tbilisi was caused by three major reasons: namely the earlier recognition of Kosovo by many Western nations in disregard of Russia's stance, the intention to prevent Georgia's accession to NATO and the necessity to legitimize a continued presence of Russian armed forces in Georgia's two breakaway provinces.

The Famine of 1896-1897 in Bengal Malabika Chakrabarti,2004 This book is a focussed treatment of a famine both as an event and a process. It is a close up of a peasant economy in the throes of a crisis which temporarily eroded the value system determining the normal pattern of entitlements. An investigation of the socio economic ecological and cultural determinants of the famine helps evolve a coherent framework. The emphasis is on the distinctive problems of the various economic regions, most notably the tribal belts. Chakrabarti applies Amartya Sen's theory of exchange entitlements to a nineteenth century famine situation in Bengal and finds that a market based entitlement failure precipitating severe famine conditions even without receiving any impulse from food production has little relevance here. Though the book underlines the predicament of the subalterns, the famine is not seen from the viewpoint of any specific group or community. The focus is rather on the phenomenon of famine in its totality, on the agony and trauma of a peasant society thrown out of gear in an abnormal situation and the crisis of identities that ensued.

Films of Arab Loutfi and Heiny Srour Terri Ginsberg,2021-11-15 This book places long overdue focus on the Palestine solidarity films of two important Arab women directors whose cinematic works have never received due attention within the scholarly literature or the cultural public sphere. Through an analysis that situates these largely overlooked films within the matrix of an anti Zionist critique of cinematic ontology, this book offers a materialist feminist appreciation of their political aesthetics while critiquing the ideological enabling conditions of their academic absencing. The study of these daring films fosters a much needed sustained understanding of the meaning and significance of Palestine solidarity filmmaking for and within the Arab world.

What Is Populism? Jan-Werner

Müller,2016-09-19 This work argues that at populism s core is a rejection of pluralism Populists will always claim that they and they alone represent the people and their true interests M ller also shows that contrary to conventional wisdom populists can govern on the basis of their claim to exclusive moral representation of the people if populists have enough power they will end up creating an authoritarian state that excludes all those not considered part of the proper people The book proposes a number of concrete strategies for how liberal democrats should best deal with populists and in particular how to counter their claims to speak exclusively for the silent majority or the real people Provided by the publisher **Catalogue:**

Abraham,2008-07-21 Designing complex programs such as operating systems compilers filing systems data base systems etc is an old ever lasting research area Genetic programming is a relatively new promising and growing research area Among other uses it provides efficient tools to deal with hard problems by evolving creative and competitive solutions Systems Programming is generally strewn with such hard problems This book is devoted to reporting innovative and significant progress about the contribution of genetic programming in systems programming The contributions of this book clearly demonstrate that genetic programming is very effective in solving hard and yet open problems in systems programming Followed by an introductory chapter in the remaining contributed chapters the reader can easily learn about systems where genetic programming can be applied successfully These include but are not limited to information security systems compilers data mining systems stock market prediction systems robots and automatic programming **The Impact of the Family**

John Witte,Michael Welker,Stephen Pickard,2022-07-28 The family is humanity s oldest and most basic social institution but today it is fragile fractured and fraught in many liberal lands This volume gathers scholars from sociology psychology history religion ethics law and medicine from five continents to analyze the complex nature and place of the family in character formation and human flourishing The chapters study the impact of catechesis schooling work and discipline on the development of individual moral agency and responsibility They document the critical roles of family love trust fidelity and storytelling in shaping the moral character of all family members from infancy to old age They describe effective strategies of resistance and resilience for family members who face abuse divorce death chauvinism racism and homophobia And several chapters challenge modern arguments and policies that aim to flatten if not abolish the marital family even while they call for family law reforms **Catalogue: Authors** Peabody Museum of Archaeology and Ethnology.
