The Structure of Learning Processes Jaan Valsiner, Hans-Georg Voss, 1996 This book brings together a variety of contemporary approaches to learning that by and large follow the structuralist path to understand learning a path both ecological and dynamic The book views the learning processes as they take place in the course of personenvironment relationships

Theories of Learning Ernest Ropiequet Hilgard, 1948 Learning is a central topic within American psychology and its problems have provided the occasion for hundreds of experimental studies The science of learning remains in a state of flux in part because we have not yet reached agreement upon the most appropriate concepts to use in stating our problems and in interpreting our data This book represents an attempt to provide in one place an introduction to the major theories of learning which are current among psychologists doing research in this important field of study The aim is to see theory in relation to experiment Each of the several theories is therefore illustrated by a selected topic within the field of experimentation The topic chosen is in each case one actively studied by adherents to the theory The theory can be judged both by its provocativeness in suggesting experiments and by its success in dealing systematically with the data which emerge from such experiments PsycINFO Database Record c 2005 APA all rights reserved

Neural Mechanisms of Learning and Memory Mark R. Rosenzweig, 1976 This volume presents papers given during a five day conference dealing with current research approaches being used to find out how learning and memory occur in terms of neural processes

Preface

Learning As Self-organization Karl H. Pribram, 2013-06-17 A year before his death B F Skinner wrote that There are two unavoidable gaps in any behavioral account one between the stimulating action of the environment and the response of the organism and one between consequences and the resulting change in behavior Only brain science can fill those gaps In doing so it completes the account it does not give a different account of the same thing This declaration ended the epoch of radical behaviorism to the extent that it was based on the doctrine of the empty organism the doctrine that a behavioral science must be constructed purely on its own level of investigation However Skinner was not completely correct in his assessment Brain science on its own can no more fill the gaps than can single level behavioral science It is the relation between data and formulations developed in the brain and the behavioral sciences that is needed This volume is the result of The Fourth Appalachian Conference on Behavioral Neurodynamics the first three of which were aimed at filling Skinner's

first gap Taking the series in a new direction the aim of the fourth and subsequent conferences is to explore the second of the gaps in the behavioral account noted by Skinner The aim of this conference was to explore the aphorism The motivation for learning is self organization In keeping with this aim and in the spirit of previous events this conference s mission was to acquaint scientists working in one discipline with the work going on in other disciplines that is relevant to both As a result it brought together those who are making advances on the behavioral level mainly working in the tradition of operant conditioning and those working with brains mainly amygdala hippocampus and far frontal cortex **Organizations as**

Learning Systems Marjatta Maula,2006-03-27 Presents consistency intentionality platforms and evolution models that help to evaluate the learning and renewal capability of an organization and to improve its enabling infrastructure This book presents the living composition model which is an interpretation of the theory of living self producing systems *Learning: Theory and Practice* Paul Erick Johnson,1971 **From Antarctica to Outer Space** Albert A. Harrison,Yvonne A. Clearwater,Christopher P. McKay,2012-12-06 From Antarctica to Outer Space Life in Isolation and Confinement aims to

revitalize and encourage behavioral research in spaceflight as well as in polar and comparable settings It comprises a broad collection of papers that evolved from presentations at a three day conference entitled The Human Experience in Antarctica Applications to Life in Space The Sunnyvale Conference This conference was co sponsored by the Division of Polar Programs of the National Science Foundation and the National Aeronautics and Space Administration and held in 1987 The book provides through firsthand accounts and research reviews an introduction to the human facet in isolated and confined environments such as Antarctica outer space submarines and remote national parks The book discusses some of the theoretical issues underlying research on isolated and confined people thus demonstrating the applicability of certain general theories of behavior It also focuses on basic psychological and social responses to isolation and confinement Studies whose primary purpose is to explore the effects of selection training and environmental design on human behavior and mission outcomes are discussed *Humans as Self-Constructing Living Systems* Donald H. Ford,2019-03-04 Originally published in 1987 the purpose of this title was to develop a conceptual framework for understanding individual humans as complex functional entities It was felt that a sound developmental theory of human personality and behaviour would help synthesize existing scientific and clinical information into a coherent representation of a person as a functional unit guide future research and facilitate the work of the health and human services professions The volume is aimed at a multidisciplinary multiprofessional audience **Handbook on Business Process Management 2** Jan vom Brocke,Michael

Rosemann,2014-08-28 Business Process Management BPM has become one of the most widely used approaches for the design of modern organizational and information systems The conscious treatment of business processes as significant corporate assets has facilitated substantial improvements in organizational performance but is also used to ensure the conformance of corporate activities This Handbook presents in two volumes the contemporary body of knowledge as

articulated by the world's leading BPM thought leaders. This second volume focuses on the managerial and organizational challenges of BPM such as strategic and cultural alignment, governance, and the education of BPM stakeholders. As such, this book provides concepts and methodologies for the integration of BPM. Each chapter has been contributed by leading international experts. Selected case studies complement their views and lead to a summary of BPM expertise that is unique in its coverage of the most critical success factors of BPM. The second edition of this handbook has been significantly revised and extended. Each chapter has been updated to reflect the most current developments. This includes, in particular, new technologies such as in-memory data and process management, social media, and networks. A further focus of this revised and extended edition is on the actual deployment of the proposed theoretical concepts. This volume includes a number of entire new chapters from some of the world's leading experts in the domain of BPM.

Potentials and Trends in Biomimetics Arnim Gleich, Christian Pade, Ulrich Petschow, Eugen Pissarskoi, 2010-03-18. There is a wide consensus about the necessity of sustainable development. There is also a consensus that wide areas of our economy, industry, and technology, and the life styles in industrialized countries are not sustainable. Science and technology are widely regarded as main causes for this situation. Issues in this context comprise the generally low resource efficiency, an increased and mostly undebated technological power, an increased invasiveness of modern technologies, increasing amounts and variety of pollutants, and high technological risks. On the other hand, science and technology are also regarded as main solution providers towards more sustainability. Thus, the question is which type of science and technology is rather a part of the problem and which type is rather a part of the solution. Learning from nature may give some orientation in this context. Biomimetics and bionics are widely regarded as being a part of the solution.

New Research on the Philosophy of Nicolai Hartmann Keith Peterson, Roberto Poli, 2016-01-29. The imposing scope and penetrating insights of German philosopher Nicolai Hartmann's work have received renewed interest in recent years. The Neo-Kantian-turned-ontological realist established a philosophical approach unique among his peers, and it provides a wealth of resources for considering contemporary philosophical problems. The chapters included in this volume examine his ethics, ontology,

aesthetics philosophy of mind and philosophy of nature They explore his ontology of values autonomy and human enhancement and law his theory of levels of reality space time and geometry the categories of temporality causality and life the question of realism and social ontology Others take inspiration from his aesthetic theory ideas about education and his embrace of the Socratic pathos of wonder They bring his philosophy into conversation with that of his contemporaries including Roman Ingarden and Konrad Lorenz s appropriation of Hartmann as well as with the history of philosophy including Plato s theory of recollection pre Socratic philosophy and that of his Russian teacher Nikolai Lossky Those familiar with Hartmann s wide ranging systematic philosophy will benefit from these new engagements with his work and those new to it will find them relevant to a number of current philosophical debates *Learning Toward an Ecological Consciousness* E. O'Sullivan,2016-03-11 In their latest book Edmund O Sullivan and Marilyn Taylor highlight the pedagogical practices that foster transformation from our current way of thinking about our place in the world to an underlying ecological way of seeing and acting *Learning Towards Ecological Consciousness* offers the reader a selection of transformative practices that demonstrate in specific contexts the complex journey and contextual conditions that move us forward towards a deeper realization that we are part of the world around us holding a greater promise for deeper ecological awareness To this end thirteen chapters offer a rich array of practices in diverse life settings educational environments communities and workplaces and personal relationships Contributors and their material represent a range of cultures work setting and professions The aspect of O Sullivan and Taylor s new book that distinguishes it from other books in the field is its exploration of how consciousness can be transformed through practices experience and action **Learning, Working and Living** Elena Antonacopoulou,Vibeke Andersen,2005-12-14 Debate about organization and workplace learning has now moved on from viewing learning as a way of fostering control to paving the way for viewing learning working and living in the context of organizational complexity The book suggests that by focusing on learning as a way of living the needs of production can be reconciled with the need for employees to have satisfying engagement with their work
