Navigating The Future:

Navigating the Future Andrew P. Hogue, Dr. L. Gregory Jones, 2021-01-05 Traditioned innovation is a habit of being and living that cultivates a certain kind of moral imagination shaped by storytelling and expressed in creative transformational action Moral imagination is about character which depends on ongoing formation that takes place in friendships and communities that embody traditions and that are sustained by institutions There is no quick fix or set of techniques that will create a mindset of traditioned innovation But we do believe that you can learn to cultivate it by Becoming immersed in an imaginative engagement with the story of God told through Scripture Learning from exemplary institutions communities and people practicing traditioned innovation Discovering new skills for integrating character formation and dense networks of friendships communities and institutions into your leadership and life Navigating the Future will explore stories and tips for cultivating traditioned innovation that will stimulate your thinking and inspire your imagination for more faithful and fruitful living along with the cultivation of more vibrant life giving institutions

Navigating the Future Monica Minnegal, Peter D. Dwyer, 2017-06-08 Navigating the Future draws on long term ethnographic fieldwork with Kubo people and their neighbours in a remote area of Papua New Guinea to explore how worlds are reconfigured as people become increasingly conscious of and seek to draw into their own lives wealth and power that had previously lain beyond their horizons In the context of a major resource extraction project the Papua New Guinea Liquefied Natural Gas PNG LNG Project taking shape in the mountains to the north the people in this area are actively reimagining their social world This book describes changes in practice that result tracing shifts in the ways people relate to the land to each other and to outsiders and the histories of engagement that frame those changes Inequalities are emerging between individuals in access to paid work between groups in potential for claiming future royalties and between generations in access to information As people at the village of Suabi strive to make themselves visible to the state and to petroleum companies as legal entities entitled to receive benefits from the PNG LNG Project they are drawing new boundaries around sets of people and around land and declaring hierarchical relationships between groups that did not exist before They are struggling to make sense of a bureaucracy that is foreign to them in a place where the state currently has minimal presence A primary concern of Navigating the Future is with the processes through which these changes have emerged as people seek to imagine and work to bring about a radically different future for themselves while simultaneously reimagining their own past in ways that validate those endeavours

NAVIGATING THE FUTURE Jayesh Shah , **Navigating the Future** Geraldine Downey, Jacquelynne Eccles, Celina Chatman, 2006-01-12 Psychologists now understand that identity is not fixed but fluid and highly dependent on environment In times of stress conflict or change people often adapt by presenting themselves in different ways and emphasizing different social affiliations With changing demographics creating more complex social groupings it is important to understand the costs and benefits of the way social groups are categorized and the way individuals understand cope with and employ their

varied social identities Navigating the Future edited by Geraldine Downey Jacquelynne Eccles and Celina Chatman answers that call with a wealth of empirical data and expert analysis Navigating the Future focuses on the roles that social identities play in stressful challenging and transitional situations Jason Lawrence Jennifer Crocker and Carol Dweck show how the prospect of being negatively stereotyped can affect the educational success of girls and African Americans making them more cynical about school and less likely to seek help The authors argue that these issues can be mitigated by challenging these students educationally expressing optimism in their abilities and emphasizing that intelligence is not fixed but can be developed The book also looks at the ways in which people employ social identity to their advantage J Nicole Shelton and her co authors use extensive research on adolescents and college students to argue that individuals with strong positive connections to their ethnic group exhibit greater well being and are better able to cope with the negative impact of discrimination Navigating the Future also discusses how the importance and value of social identity depends on context LaRue Allen Yael Bat Chava J Lawrence Aber and Edward Seidman find that the emotional benefit of racial pride for black adolescents is higher in predominantly black neighborhoods than in racially mixed environments Because most people identify with more than one group they must grapple with varied social identities using them to make connections with others overcome adversity and understand themselves Navigating the Future brings together leading researchers in social psychology to understand the complexities of identity in a diverse social world
