Privatisation In The European Union Theory And Policy Perspectives:

Privatization in the European Union David Parker, 2002-01-31 The book identifies different national characteristics in terms of the motivation to privatise the scale of privatization and its consequences In the opening chapters there is a detailed overview of the theoretical economic issues involved in privatisation and an assessment of privatization across the EU The remaining ten chapters contain national case studies of EU countries which review the history of state ownership and privatization in each of these countries and evaluate the extent of privatisation The role of European Commission directives in deregulating markets and stimulating privatisation is also examined

Privatisation in the European Union Judith Clifton, Francisco Comín, Daniel Díaz Fuentes, 2013-03-09 Judith Clifton Francisco Comín and Daniel Díaz Fuentes in Privatisation in the European Union reject the two dominant explanations provided in literature which include a simple Americanisation of policy and a varied privatisation experience without a common driving force Using a systematic comparative analysis of privatisation experiences in each country from the 1980s to the beginning of the twenty first century the authors show how the process of European integration and the need for internationally competitive industries have constituted key driving forces in the quest for privatisation across the EU As privatisation slows down at the turn of the millennium what future can citizens expect for public enterprises Privatisation in the European Union is essential reading for researchers students and policy makers interested in privatisation EU policy and the history of public enterprises

International Handbook on Privatization David Parker, David S. Saal, 2003-01-01 Privatization has dominated industrial restructuring programs since the 1980s and continues to do so This authoritative and accessible Handbook considers all aspects of this key issue including the theory of privatization privatization in transition developed and developing economies as well the economic regulation of privatized industries

Privatization Experiences in the European Union Marko Köthenbürger, 2006 Experts evaluate the varied outcomes of privatization experiences in Austria Denmark Finland France Germany Ireland Italy the Netherlands Spain and the UK The trend toward privatization which began with privatization experiments in the UK under Margaret Thatcher and the deregulation of the telecommunications sector in the United States has attracted the attention of policymakers over the past two decades Privatization is broadly supported by most academic economists but the results of actual privatization

efforts seem mixed In the UK for example telecom rates fell sharply after privatization but privatized rail service was widely perceived to have declined dramatically in quality In this CESifo volume international experts examine the experiences of 10 EU countries evaluating the real outcomes of privatization policies in Austria Denmark Finland France Germany Ireland Italy the Netherlands Spain and the UK The effects of privatization which includes not only changes in ownership of public activities and entities but also liberalization of markets and deregulation are difficult to distinguish from the effects of other economywide influences The studies in this volume meet this methodological challenge by using a well defined set of criteria including reducing consumer prices increasing quantity and improving quality by which to make their assessments Background chapters provide a conceptual framework for considering the issues Contributors Pablo Arocena Sean D Barrett Ansgar Belke Michel Berne Henrik Christoffersen Andrea Goldstein G nter Knieps David Newbery Martin Paldam David Parker G rard Pogorel Friedrich Schneider Eric van Damme Ingo Vogelsang Johan Willner

Modernisation and Privatisation of Postal Systems in Europe Roberto Ruozi, Luisa Anderloni, 2013-03-14 After the positive experience made in 1999 with the research and consequent publication of the volume *Banking Privatisation in Europe The Process and the Consequences on Strategies and Organisational Structures* published by Springer Verlag we have decided to set up a new group of researchers to study the present changes within the European postal systems and the privatisation developments Starting from our competencies and specific knowledge financial markets and management of bank intermediaries our research has basically focussed onto the posts financial services offer and their future perspectives The subject is particularly interesting considering the radical changes which are giving to the postal activity and the competition itself a new profile And this reality paves the way to new opportunities in the market segment of financial services for retail customers and at the same time it brings in new threats Our approach is the approach of compared analysis in Europe in order to detect common trends in the development or possible specific features as well as positioning perspectives of the different national Posts in the single market of financial services Our working group has benefited from the collaboration of researchers and experts with different nationality university education and experience Eminent representatives of postal companies regulation and control bodies banks and financial institutes have been interviewed and have allowed precious elements to deepen our knowledge and capacity of interpreting the present trends

Learning, Policy Making, and Market Reforms Covadonga Meseguer, 2009-03-30 In the 1980s and 1990s market reforms swept the world It is widely believed that the reformist wave can be partly explained in terms of the lessons learned from policy failures of the past Whereas this interpretation of events is well established it has never been empirically proved *Learning Policy Making and Market Reforms* is the first study that tests the impact of policy learning on economic policy choices across time and space The study supports the popular explanation that on average governments around the world adopted privatization and trade liberalization and sustained open capital accounts as a result of learning from the experience of others

Legal Aspects of Privatisation

Bulent Seven,2002 The main aims of this thesis are as follows a To present a comprehensive analysis of the concept of privatisation its origins and limits b To identify the legal and institutional framework for privatisation in different European countries from a comparative perspective c To define and analyse particularly legal issues which arise during the privatisation transactions e g labour law competition law etc d To evaluate which features of the successful legal and organisational framework of privatisation have been successful so as to provide guidelines for those individuals and organisations participating in the privatisation exercises This work found out that there is no simple internationally applicable recipe for privatisation various legal methods and techniques can be used to privatise state owned enterprises Because each country has different circumstances it is impossible to provide a unique model for privatisation each country needs to design its own model according to its circumstances Privatisation is an essential but insufficient element for structural economic reform in the economy and society Privatisation is not a panacea it is not the solution to every economic and administrative problem selling an enterprise to the private sector does not mean an end to all problems Also privatisation is not an overnight process or a magic touch it will be a lengthy process Furthermore a decision that something can be privatised does not mean that it should be privatised In that context privatisation is not good or bad it is an economic and social instrument If it is well designed it may bring substantial benefits to the economy and society In many countries many state owned enterprises particularly the ones which are financially weak have still not been privatised This finding revealed that the privatisation process will be in the political and economic agenda for at least few more decades Privatisation in Ireland D. Palcic,E. Reeves,2011-01-19 This book analyzes privatization in Ireland a European economy that has experienced rapidly changing fortunes over the last thirty years It examines the effects of privatization in terms of corporate performance public finances and the distributional aspects of privatization including the impact on employment and share ownership

The Reform of Network Industries Massimo Florio,2017-12-29 Network industries such as electricity gas rail local public transport telecommunications and postal services are recognised by the EU as crucial for fostering European social and territorial cohesion Providing an overview of key policy reforms in these industries and an empirical evaluation this thought provoking book offers a critical perspective on the functioning of the networks that provide vital services to EU citizens

Privatisation Performance in Major European Countries Since 1980 M. Tatahi,2006-04-26 Major theoretical approaches stress the superiority of privately owned over state owned companies without addressing how corporate performance should best be measured This book investigates performance of both private and state owned applying factor analysis to compare the two states *Varieties of Austerity* Heather Whiteside,Stephen McBride,Bryan Evans,2021-05-03 Austerity is not always one size fits all it can be a flexible class based strategy taking several forms depending on the political economic forces and institutional characteristics present This important book identifies continuity and variety in crisis driven austerity restructuring across Canada Denmark Ireland and Spain In their analysis the authors

focus on several components of austerity including fiscal and monetary policy budget narratives public sector reform labor market flexibilization and resistance In so doing they uncover how austerity can be categorized into different dynamic types and expose the economic social and political implications of the varieties of austerity

Social developments in the European Union 2010 Degryse C. and Natali D.,2011 2010 was a critical year for the European Union EU in at least three major respects First of all many EU countries started showing signs of increased financial stress while the eurozone began to be affected by a true debt crisis extending well beyond the highly publicised case of Greece Secondly the European Union strove to achieve renewal through its first steps to implement the Lisbon Treaty that had come into force on 1 December 2009 The third reason why 2010 represented a turning point for the EU is that the ten year Lisbon Strategy launched by the European Council in March 2000 as a framework for EU socio economic policy coordination formally reached its end in June 2010 when EU leaders adopted the new Europe 2020 Strategy All of these developments will have deep and long lasting effects on social policy at both national and supra national level This 2010 edition of Social developments in the European Union examines the ways in which the EU has tackled the main challenges related to the fiscal crisis the first steps towards implementation of the Lisbon Treaty and the launch of the EU2020 Strategy The volume sheds light on a number of aspects including the risks for the European social model and European integration project the state of the debate on revision of the Stability and Growth Pact the impact of the economic and financial crisis on pensions the new EU employment policy roadmap and more generally the tensions risks and opportunities generated by Europe 2020

Privatization and Market Development Graeme A. Hodge,2006 A useful volume for those interested in the development of privatization around the world J Prager Choice This accessible book aims to inform readers interested in assessing privatization and market development concepts on a global scale and outlines a range of thinking on how these policy ideas have moved around the globe Bringing together an international team of contributors the book traces how privatization concepts have grown in application and how they have spread to become a central policy idea for governments And whilst interest in the initial policy of selling off state owned enterprises has peaked the contracting and partnership modes of privatization have risen to global prominence This book also reflects on the importance of the privatization family of ideas on both developed and developing countries Privatization and Market Development will be of great interest to those involved in public administration and public policy making from a global perspective

Contradictions and Limits of Neoliberal European Governance J. Drahokoupil,L. Horn,2008-11-27 An ambitious volume that sets out to analyse the nature contradictions and limits of neoliberal governance in the EU The analysis covers the changing geopolitical and geo economic context the Lisbon agenda and the contestation and mobilization against the European project such as manifested in the national resistance against the constitution

Consumer Vulnerability and Welfare in Mortgage Contracts Irina Domurath,2017-11-30 This book advocates a new way of thinking about mortgage contracts This claim is based on the assumption that we currently live in a

political economy in which consumer debt fulfils a social function In the field of housing this is evidenced by the expansion of mortgage credit through which consumers are to purchase residential property as a means of social inclusion and personal welfare It is suggested that contract law needs to adjust to this new social function in order to avoid welfare losses in terms of default over indebtedness and possibly eviction To this end this book analyses theoretical contract law frameworks and makes concrete proposals for contract law in the EU legal order

Public Service Employment Relations in Europe

Stephen Bach, Lorenzo Bordogna, Giuseppe Della Rocca, David Winchester, 2005-08-16 Written and edited by some of the country's primary authorities on public sector industrial relations this outstanding book provides an up to date analysis of the restructuring of public service employment relations in six European countries

A Politics of Inevitability Ross

Beveridge, 2011-11-03 This book provides a detailed analysis of the controversial privatisation of the Berlin Water Company BWB in 1999 As with other cases of privatisation around the world the city's government argued there was no alternative in a context of public debts and economic restructuring Drawing on post structuralist theory the analysis presented here steps outside the parameters of this neat straightforward explanation It problematises the hard facts upon which the decision was apparently made presenting instead an account in which facts can be political constructions shaped by normative assumptions and political strategies A politics of inevitability in 1990s Berlin is revealed one characterised by depoliticisation expert dominated policy processes and centred upon the perceived necessities of urban governance in the global economy It is an account in which global and local dynamics mix where the interplay between the general and the specific between neoliberalism and politicking and between globalisation and local actors characterise the discussion

The Routledge Handbook of State-Owned Enterprises Luc Bernier, Massimo Florio, Philippe Bance, 2020-05-27 State owned enterprises make up roughly 10 percent of the world economy yet they are woefully understudied This handbook offers the first synthesis of the topic since the 1980s and offers a comprehensive reference for a generation The authors provide a detailed explanation of the theory that underpins the expansion of state owned enterprises in the 21st century Each chapter delivers an overview of current knowledge as well as identifying issues and relevant debates for future research The authors explain how state owned enterprises are used in both developed and developing countries and offer an insight into complex and fascinating organizations such as the German municipal conglomerates or the multinational companies owned by states New modes of governance and regulation have been invented to make sure they act in the public interest This handbook brings together a wealth of international scholars offering multiple theoretical perspectives to help shape a brave new world It will be of interest to teachers and students of Economics Public Administration and Business academics established researchers and PhD students seeking rigorous literature reviews on specific aspects of SOEs as well as practitioners and decision makers in international organizations
