Privatization Deregulation And The Macroeconomy Measurement Modelling And Policy:

Privatization, Deregulation, and the Macroeconomy Peter A. G. van Bergeijk, Robert C. G. Haffner, 1996 This volume focuses on the macroeconomic consequences of microeconomic rigidity in the markets for goods or services and the reforms necessary to create economic dynamism The Netherlands Germany New Zealand and Australia are used as examples to show how

The Road to Privatization of Higher Education in China Li Wang, 2013-11-29 This book makes both empirical and conceptual contributions to the debate on privatization of higher education in China Empirically it aims to fill a gap in our knowledge of privatization of higher education in North China To this end Beijing was chosen as a case for analysis and nine local higher educational institutions were visited The case study strategy is also complemented by an extensive review of national policies to reveal problems beyond the specific case of Beijing and of national concern The effects of the cultural and socioeconomic background and the unique state party controlling system on higher education management are stressed Conceptually most existing studies on privatization of higher education in China adopt a policy analysis approach while research on privatization of other public sectors or in other countries is frequently guided by economic theories This book thus seeks to combine both social policy and econometric approaches to provide a systematic and detailed investigation of the privatization process in the context of higher education It also improves examines the applicability of western theories in the Chinese context

Privatization in the European Union David Parker, 2002-01-31 The book identifies different national characteristics in terms of the motivation to privatise the scale of privatization and its consequences In the opening chapters there is a detailed overview of the theoretical economic issues involved in privatisation and an assessment of privatization across the EU The remaining ten chapters contain national case studies of EU countries which review the history of state ownership and privatization in each of these countries and evaluate the extent of privatisation The role of European Commission directives in deregulating markets and stimulating privatisation is also examined

Modelling European Mergers Peter A. G. van Bergeijk, Erik Kloosterhuis, 2005-01-01 Modelling European Mergers presents a comprehensive and fresh perspective on the economic analysis of mergers by leading academics and competition policymakers from Europe and the US The book frankly discusses the pro s and con s of using applied game theory models in merger control from a historical and theoretical perspective Seven case studies on the actual use of advanced techniques and models in legal procedures provide a perspective from the national competition authorities in Belgium Denmark Italy The Netherlands and Sweden on markets that range from basic goods such as bread and aperitifs to complex products such as electricity literature and software The case studies provide many insights into practical issues such as data collection procedures and errors of predication as well as in the relative merits of different econometric approaches A recurring theme of the book is how economic insights insights can be translated into convincing legal decisions

Capitalism and Democracy in the 21st Century Dennis C. Mueller, Uwe Cantner, 2013-03-09 Joseph Schumpeter oscillated in his view

about the type of economic system that was most conducive to growth In his 1911 treatise Schumpeter argued that a more decentralized and turbulent industry structure where the process of creative destruction was triggered by vigorous entrepreneurial activity was the engine of economic growth But by 1942 Schumpeter had modified his theory arguing instead that a more centralized and stable industry structure was more conducive to growth According to Schumpeter 1942 p 132 under the managed economy there was little room for entrepreneurship because innovation itself is being reduced to routine Technological progress is increasingly becoming the business of teams of trained specialists who turn out what is required to make it work in predictable ways p 132 Schumpeter 1942 reversed his earlier view by arguing that the integration of knowledge creation and appropriation bestowed an inherent innovative advantage upon giant corporations Since capitalist enterprise by its very achievements tends to automatize progress we conclude that it tends to make itself superfluous to break to pieces under the pressure of its own success

Challenging Neighbours CPB Netherlands Bureau for Economic Policy Analysis, 2012-12-06 *Challenging Neighbours* provides wide coverage of the German and Dutch economies from an institutional point of view Pensions competition policy labour relations corporate governance and health care are among the topics for which the institutional setting and performance of Germany and the Netherlands are compared The difficulties and successes the countries have in facing pressures from aging population developments in technology and global competition are traced back to their institutional roots and lead to mutual lessons for institutional reform for German and Dutch policy makers

International Labour Documentation International Labour Office. Bureau of Library and Information Services, 2001

Market Behaviour and Macroeconomic Modelling Simon Kuipers, Steven Brakman, Hans Van Ees, 1998-11-12 *Market Behaviour and Macroeconomic Modelling* discusses several state of the art developments in the modelling approach to market behaviour in macroeconomic modelling Leading experts in this field deal with the implications of market imperfections in commodity markets capital markets and labour markets for macroeconomic modelling and stabilization policy They demonstrate that incorporating market imperfections leads to very different policy recommendations than those derived from the standard perfect competition model

The World Bank Research Observer, 1999

Empirical Models and Policy Making Mary Morgan, Frank den Butter, 2003-09-02 This collection written by highly placed practitioners and academic economists provides a picture of how economic modellers and policy makers interact The book provides international case studies of particular interactions between models and policy making and argues that the flow of information is two way

The OECD Report on Regulatory Reform: Sectoral studies Organisation for Economic Co-operation and Development, 1997 11 sectoral and thematic studies on regulatory reform prepared as background to The OECD report on regulatory reform These 11 studies assess the developments and results of regulatory reform in OECD countries in telecommunication services financial services professional business service electricity agrofood and product standards and conformity assessment The

thematic studies assess the economy wide effects of regulatory reform impacts on competition and consumers industrial competitiveness and innovation regulatory quality and public sector reform and market openness **Aanwinsten van de Centrale Bibliotheek (Queteletfonds)** Bibliothèque centrale (Fonds Quetelet),1996 *Macroeconomic Policy as Implicit Industrial Policy: Its Industry and Enterprise Effects* John Randolph Norsworthy,Diana H. Tsai,2012-12-06 Whether they should or not few economists do in fact refrain from making pronouncements on public policy although the state of the economy both here and elsewhere suggests that either the advice given is bad or if good that it is ignored I happen to think that we are appallingly ignorant about many aspects of the working of the economic system the economics of the firm and industry Ronald H Coase Economists and Public Policy In this volume we attempt to address an element of Coase s concern by linking the empirical economics of the firm and industry more closely to macroeconomic policies and to demonstrate how to assess some of the effects of those policies The scope of our study ranges from a structural macroeconomic model of the United States from which macroeconomic effects are propagated to detailed structural models of SIC four digit industries The rationale for our approach is very much in the spirit of various integrated macroeconomic industry models constructed by Dale Jorgenson working with various collaborators Our approach is also consistent with and motivated by Lawrence Klein s agenda of modeling explicitly and structurally the macro and sectoral elements in the national economy We also examine the effects of the macroeconomic policies of different countries on the enterprise In only one case our examination of crowding out of private investment by government deficit financing is the linkage among sectors implicit *The Writers Directory* ,2013 **Multinationals on Trial** Professor Henry Veltmeyer,Professor James Petras,2013-03-28 The role and economic power of corporations that dominate the world economy has generated considerable controversy The most heated debate and the most critical questions surrounding the role of multinational corporations relate to foreign direct investment FDI This key volume offers an entirely fresh perspective of the role of multinationals and the development impact of FDI Contrary to prevailing opinion it examines whether imperialism is a much more useful concept for describing and explaining the dynamics of world development than globalization FDI is a mechanism for empire centred capital accumulation a powerful lever for political control and for re ordering the world economy This is a much needed analysis of global capitalism and its impact around the world resulting in an excellent resource for students academics and activists *Crisis Or Recovery in Japan* David Bailey,2007-01-01 Explores Japan s economic crisis and recovery analysing the role of corporations the state macroeconomic and industrial policy and the changing status of Japan as an economic role model This book covers such topics as the relevance of Western economic models to the Japanese case and the Japanese macro economy and financial system *Real and Financial Economic Dynamics in Russia and Eastern Europe* Timothy Lane,Nina Oding,Paul J.J. Welfens,2012-12-06 Russia and many other transition countries are now facing the challenges of opening up restructuring and modernizing their economies which requires addressing numerous institutional weaknesses and supply side distortions

From a regional perspective drawing on the experience of other reforming countries the papers examine these issues Aspects addressed include the implications of trade and capital flows the process of labor market reform financial market development productivity growth and innovation dynamics The dynamics of the reform process are also studied in the context of new political economy models

Housing the Nation - a Singapore Policy Story Kim Hin / David Ho, 2020-12-17

Chapter 1 takes a close look at a unique and state of the art dynamic structural public housing macroeconomic model DSPHM based on an open economy for several key macroeconomic variables actual and expected as well as the demand for new HDB flats sold This Chapter readily adopts the DSPHM for simulating two scenarios namely a no change first scenario and a public housing deregulation second scenario Chapter 2 explores the relationship between several economic factors and the demand for public housing in Singapore and Hong Kong deploying the innovative and versatile system dynamics model to shed better understanding on the policy implications of assisted ownership housing The Chapter assesses the demand for new flats of the Singapore and Hong Kong economies under certain macroeconomic policy changes suitable for their unique situations Chapter 3 is concerned with the underlying structural relationships that affect Singapore's public housing policy to potentially privatize the HDB concessionary rate mortgages for HDB homebuyers Such a potential privatization infuses and sustains price competitiveness among the domestic private banks in Singapore and lead to improved efficiency among them as well as the Singapore economy at large Chapter 4 is concerned with the binomial option pricing model proposed by Cox Ross and Rubinstein 1979 which is appropriate to represent the movement of the underlying HDB resale flat prices subject to private market forces in HDB's large scale public housing secondary resale market The HDB Main Upgrading Program MUP is a heavily subsidized and highly targeted public housing policy Since its inception in 1992 the HDB has budgeted some S 3 billion to finance the MUP policy Chapter 5 recognizes housing affordability to be always an issue of concern to many Singaporean homebuyers because shelter forms one of the basic life necessities The corresponding private residential market in Singapore offers quality and premium private residential accommodation for homebuyers who prefer the private residential market The appropriate affordability model is a multi factor housing affordability index HAI model which considers the ability to provide down payment and to service the mortgage taken up Lastly Chapter 6 offers the book's conclusion
