evolution of the mind To this task the natural sciences and the Science of history the varied branches of anthropology psychology philosophy in its manifold fields all must contribute And when the task is performed or even in large part performed forth shall arise the new synthesis the new world vision and it shall be inevitable in its inspiration But before that day we who hope for the advent must cleanse and order our house of thought we must come to an understanding with ourselves and achieve some sane understanding of the metaphysic where with we were born It is for the furthering of this humbler but not unessential end that this essay was written About the Publisher Forgotten Books publishes hundreds of thousands of rare and classic books Find more at www.forgottenbooks.com This book is a reproduction of an important historical work Forgotten Books uses state of the art technology to digitally reconstruct the work preserving the original format whilst repairing imperfections present in the aged copy In rare cases an imperfection in the original such as a blemish or missing page may be replicated in our edition We do however repair the vast majority of imperfections successfully any imperfections that remain are intentionally left to preserve the state of such historical works
