Programming for Design Edith Cherry, 1998-11-10 Quickly master architectural programming concepts skills and techniques In the essential discipline of architectural programming the ideas of philosophy sociology anthropology psychology and history find their focus in the realities of site conditions budgets and functionality Author Edith Cherry vividly demonstrates in this inspiring tutorial that the programming process not only helps architects avoid the endless design revisions occurring in most projects but that it is also the key to designing for optimal form and function Programming for Design lets you rapidly acquire the knowledge and skills needed to successfully program a moderate size space Rather than simply describe basic principles and practices this straightforward guide helps you master architectural programming by actually doing it Professor Cherry identifies the central issues involved and describes the skills needed to work with clients to identify problems to be solved by a design effort Emphasizing designing for people she offers proven strategies and techniques for goal setting information gathering and analysis concept development program synthesis and communicating with clients The book is also devoted to practical applications The author walks you step by step through a project of your own choosing providing numerous examples and four case studies within each step that vividly illustrate how to effectively gather process and communicate information Programming for Design features more than 200 supporting illustrations diagrams and sidebars appearing throughout the text reproducing pithy sayings by such far flung figures as Plato and Yogi Berra Einstein and Lao Tzu that help relate the programming process to other disciplines

The Complexities of John Hejduk's Work J. Kevin Story, 2020-06-09 This book traces the development of John Hejduk's architectural career using the idea of exorcism to uncover his thought process when examining architectural designs His work encouraged profound questioning on what why and how we build which allowed for more open discourse and enhance the phenomenology found in architectural experiences Three distinct eras in his architectural career are applied to analogies of outlines apparitions and angels throughout the book across seven chapters Using these thematic examples the author investigates the progression of thought and depth inside the architect's imagination by studying key projects such as the Texas houses Wall House Architectural Masques and his final works Featuring comments by Gloria Fiorenino Hejduk

Stanley Tigerman Steven Holl Zaha Hadid Charles Jencks Phyllis Lambert Juhani Pallasmaa Toshiko Mori and others this book brings to life the intricacies in the mind of John Hejduk and would be beneficial for those interested in architecture and design in the 20th century

Introducing Architectural Theory Korydon Smith, Miguel Guitart, 2024-01-22 Building on the success of the first edition an engaging and reader friendly work on complex ideas Introducing Architectural Theory Expanding the Disciplinary Debate broadens the range of themes voices and geographies represented to provide a more comprehensive and contemporary theory book This book presents major discourses in architectural theory and design in a debate like format integrating a series of edited texts across architectural history with context and newly written commentaries by the authors This new edition has been fully revised updated and expanded to include long standing debates such as simplicity vs complexity or the relationship between form and function as well as newer discussions on innovation globalization and social equity Authors Smith and Guitart provide a comprehensive means and conceptual framework for readers to compare multiple points of view The chapter structure discussion questions and additional resources allow teachers to facilitate in class discussions and writing assignments This book remains the most accessible architectural theory textbook written for beginning architecture students and those outside the discipline Its reflective and critical approach will equally engage the minds of upper level students and experts

Building Performance Evaluation Wolfgang F.E. Preiser, Andrea E. Hardy, Ulrich Schramm, 2017-08-30 The main aim of this book is to present an intriguing retrospective of Building Performance Evaluation BPE as it evolved from Post Occupancy Evaluation POE over the past 25 years On one hand this is done by updating original authors chapter content of Building Evaluation the first edition published in 1989 That in turn is augmented by an orientation toward current and future practice on the other including new authors who are engaged in ongoing cutting edge projects Therefore individual methodology oriented chapters covering the fundamental principles of POE and BPE go along with major thematic chapters topics of which like sustainability or integration of new technologies are addressed in a diversity of case studies from around the globe Research methodologies and framework of POEs continue to evolve POEs are one step on the larger scale of BPE in understanding how buildings function after they are occupied This resource helps architects building owners and facility managers understand the implications and reactions to the facilities that they designed built and or commissioned By considering the whole process from conception to future uses of the building there can be a more holistic approach to the planning programming design construction occupancy and future adaptability of the structure This book is dedicated to first

editor Wolfgang F E Preiser who passed away during the process of editing and reviewing chapters of this volume **Better Construction Briefing** Peter Barrett, Catherine A. Stanley, 1999-09-08 Very few buildings finish on time or at the right price and clients often criticise the fact that the finished building is not what they expected Poor communication between the parties at one or more stages of the construction process seems to be the cause and improved briefing practice has long been recognised as one important area where such communication could be improved This book examines the briefing process to understand its strengths and weaknesses and the problems involved draws on the experience of other disciplines and industries and identifies best practice and purpose innovations in the briefing process It is strongly industry oriented while drawing on sound research *Machine Learning* Phil Bernstein, 2022-04-30 The advent of machine learning based AI systems demands that our industry does not just share toys but builds a new sandbox in which to play with them Phil Bernstein The profession is changing A new era is rapidly approaching when computers will not merely be instruments for data creation manipulation and management but empowered by artificial intelligence they will become agents of design themselves Architects need a strategy for facing the opportunities and threats of these emergent capabilities or risk being left behind Architecture s best known technologist Phil Bernstein provides that strategy Divided into three key sections Process Relationships and Results Machine Learning lays out an approach for anticipating understanding and managing a world in which computers often augment but may well also supplant knowledge workers like architects Armed with this insight practices can take full advantage of the new technologies to future proof their business Features chapters on Professionalism Tools and technologies Laws policy and risk Delivery means and methods Creating consuming and curating data Value propositions and business models *Adaptive Architecture* Wolfgang F. E. Preiser, Andrea E. Hardy, Jacob J. Wilhelm, 2017-09-01 The constant in architecture s evolution is change Adaptive Architecture explores structures or environments that accommodate multiple functions at the same time sequentially or at periodically recurring events It demonstrates how changing technological economic ecological and social conditions have altered the playing field for architecture from the design of single purpose structures to the design of interacting systems of synergistically interdependent distributed buildings Including contributors from the US UK Japan Australia Germany and South Africa the essays are woven into a five part framework which provides a broad and unique treatment of this important and timely issue

This book is about the currently evolving global standardization of corporate workplace models and the challenges this poses for their implementation in a local context. In recent years, multinational corporations were increasingly engaged in the development of standardized global workplace models. For their implementation and feasibility, it is decisive as how these standards fit the diverse regional workplace cultures. This topic was pursued in the course of a research project comparing established workplaces in Germany, USA, and Japan against global workplace standards of multinational corporations. The analysis confirmed the expected differences among local workplaces, and on the other hand, a predominant

mainstream among global corporate workplace standards. Conspicuous however are the fundamental differences between local models and corporate standards. For the implementation of global standards in local context this implies multiple challenges on cultural, organizational and spatial level. The analysis findings provide information for assessing current projects and pinpointing optimization measures. The analysis framework further provides a tool to uncover and assess needs and restrictions for the development of future workplace models.
