Problem-Based Learning in Clinical Education Susan Bridges, Colman McGrath, Tara L. Whitehill, 2012-01-05 Developed in the context of health sciences education in the late 1960s problem based learning PBL is now widely deployed as an education methodology Its problem solving collaborative student centred ethos is seen as a more appropriate system of pedagogy than earlier chalk and talk modes Focusing on its use in clinical education this collection of recent scholarship on PBL examines the ways in which PBL is both conceived and implemented in clinical education The work has a dual emphasis research driven on the one hand while on the other assessing new methodologies to explore how problem based curricula support the achievement of students learning outcomes in the context of clinical education The chapters draw on studies that explore PBL both theoretically and empirically The volume s eclecticism capitalises on the growing body of empirical research into PBL evaluations It balances this with studies analysing the relatively new area of discourse based research on PBL in action whose focus has been to interrogate the how of student learning in curricula with PBL content This publication will be of interest to clinical teachers curriculum designers and those interested in innovations in the scholarship of teaching and learning in PBL curricula *Lessons from Problem-based Learning* H. J. M. van Berkel, 2010 Problem based learning PBL has excited interest among educators around the world for several decades Among the most notable applications of PBL is the approach taken at the Faculty of Health Medicine and Life sciences FHML at Maastricht University the Netherlands Starting in 1974 as a medical school the faculty embarked on the innovative pathway of problem based learning trying to establish a medical training program which applied recent insights of education which would be better adapted to the needs of the modern physician The medical school currently part of the FHML can be considered as an established school where

original innovations and educational changes have become part of a routine. The first book to bring this wealth of information together, *Lessons from Problem based Learning* documents those findings and shares the experiences of those involved to encourage further debate and refinement of problem based learning in specific applications elsewhere and in general educational discussion and thought. Each chapter provides a description of why and what has been done in the Maastricht program followed by reflection on the benefits and issues that have arisen for these developments. The final section of the book examines the application of PBL in the future and how it is likely to develop further.

The Engaged Health Sciences Library Liaison Lindsay Alcock, Kelly Thormodson, 2020-05-15. Selected as a 2025 Doody's Core Title. Liaison roles are generally commonplace in medical and health sciences libraries as librarians strive to develop and enhance relationships and collaborations with clinicians and faculty. While the liaison of the past acted primarily as the main contact between respective departments and the library providing a facilitative function (e.g. arranging for instruction sessions, inviting feedback on the collection, providing updates on new programs and services etc), today's liaison activities are more proactive and robust. The *Engaged Health Sciences Library Liaison* features ten program descriptions that illustrate how the reach and scope of librarians in the medical healthcare arena has changed dramatically since the inception of liaison services. The program outcomes described illustrate a direct impact on curriculum development, address new information types with new access and preservation technologies, expand stakeholder groups, create research and teaching collaborations, and enhance functional roles. This authoritative book, copublished by the Medical Library Association, demonstrates that collaboration and communication, the basic tenets of a liaison program, breed innovative programs and services that are relevant, current, and valuable.
