Exploring Mathematics With Integrated Spreadsheets In Teacher Education Sergei Abramovich, 2015-07-30 The goal of the book is to

technologically enhance the preparation of mathematics schoolteachers using an electronic spreadsheet integrated with Maple and Wolfram Alpha digital tools capable of sophisticated symbolic computations The content of the book is a combination of mathematical ideas and concepts associated with pre college problem solving curriculum and their extensions into more advanced mathematical topics The book provides prospective and practicing teachers with a foundation for developing a deep understanding of many concepts fundamental to the teaching of school mathematics It also provides the teachers with a technical expertise in designing spreadsheet based computational environments Consistent with the current worldwide guidelines for technology enhanced teacher preparation the book emphasizes the integration of context mathematics and technology as a method for teaching mathematics Throughout the book a number of mathematics education documents developed around the world Australia Canada England Japan Singapore United States are reviewed as appropriate

Engymetry and Personal Computing in Nuclear Medicine Dietrich P. Pretschner, 2013-03-08 Nuclear medicine is not and has not been a purely imaging discipline It is function analysis that has always been the focal point This fact has become particularly obvious in the last few years through the employment of new short lived radionuclides new technical procedures and data processing The disadvantage of function analysis in nuclear medicine through the use of radioactively labeled compounds is that more and more complicated and expensive equipment has to be used A further characteristic is that these machines are stationary and that the patients cannot be examined under physiological conditions For technical reasons the x camera is developing in the direction of measuring mainly the so called soft I emitters at the present time On the other hand positron emitters are the radionuclides which are of interest for metabolic functions At present positron cameras are even more expensive and complicated machines the use of which is very demanding In this book Priv Doz Dr med Dipl Ing D Peter pretschner has described a new system which contains his ideas and his technical developments He describes a solution to the urgent questions and difficulties in the employment of radioactive substances for diagnosis It does not demand large resources and can be used under the appropriate individual physiological conditions Here he was helped by his training as a natural scientist and engineer as well as by his being an experienced clinician
