Autonomy? Zelim Skurbaty, 2005-01-01 The beginning of the 21st century is characterized by global structural changes and worldwide concern for the problems surrounding the relationships between states and minority groups. Autonomy has become a code word for an all purpose means of inclusion of sub state groups in the three major functions that make for the essence of international law: the allocation of competence, the furtherance of common interest and the maintenance of international peace. Since to be autonomous is to be a law to oneself and autonomous agents are self governing agents, the authors of this present volume try to give an answer each from a particular professional perspective to one overriding question: what conditions must be met in order to ensure that the autonomous agents govern themselves and govern effectively. With a scholarly attention to analytical precision, factual accuracy and scrupulous objectivity, the authors of the present volume, coming from such diverse fields as international law, philosophy, ethics, economics, political science, detail and explore the protean character of autonomy as both a concept: autonomy's subtypes, autonomy vs other arrangements for the diffusion of power within heterogeneous societies, new definitions of the concept etc. and a practice: the potential of autonomy in the peaceful resolution of ethnic conflicts, comparative case studies ranging from Greenland to Eritrea, from the Baltic States to South Asia. For all their differences in background and style, the authors share the common belief that autonomy, if properly understood and applied, holds considerable potential for ensuring an effective and harmonious co existence for diverse groups within modern states. As such, this book will hold particular appeal for all those students, academics, policymakers, practitioners who are on a quest for empowering insights vis vis state, minority, modus vivendi and ways to mitigate inter group tensions by compromise.

Classical Sociology Beyond Methodological Nationalism ,2014-04-17 Classical Sociology Beyond Methodological Nationalism defends

classical sociology from the accusation of methodological nationalism To reject such accusation the volume presents three arguments The first contends that classical sociology has not failed to deal with the global world Part I The second that classical sociology has more frequently dealt with the transnational category of the social rather than with the national Part II The third that where classical sociology has analysed national society the latter has never been envisaged as a rigidly confined entity within its political boundaries Part III The outcome is a re evaluation of classical sociological thought as a more functional tool for analysing the political forms of modernity in the era of globalisation Contributors include Vittorio Cotesta David Inglis Austin Harrington Massimo Pendenza Michael Schillmeier Emanuela Susca Dario Verderame and Federico Trocini

Emotions, Protest, Democracy Emmy Eklundh, 2019-01-30 With the rise of both populist parties and social movements in Europe the role of emotions in politics has once again become key to political debates and particularly in the Spanish case Since 2011 the Spanish political landscape has been redrawn What started as the Indignados movement has now transformed into the party

Podemos which claims to address important deficits in popular representation By creating space for emotions the movement and the party have made this a key feature of their political subjectivity Emotions and affect however are often viewed as either purely instrumental to political goals or completely detached from real politics This book argues that the hierarchy between the rational and the emotional works to sediment exclusionary practices in politics deeming some forms of political expressions more worthy than others Using radical theories of democracy Emmy Eklundh masterfully tackles this problem and constructs an analytical framework based on the concept of visceral ties which sees emotions and affect as constitutive of any collective identity She later demonstrates empirically using both ethnographic method and social media analysis how the movement Indignados is different from the political party Podemos with regards to emotions and affect but that both are suffering from a broader devaluation of emotional expressions in political life Bridging social and political theory Emotions Protest Democracy Collective Identities in Contemporary Spain provides one of the few in depth accounts of the transition from the movement Indignados to party Podemos and the role of emotions in contemporary Spanish and European politics
