ABSTRACT

In this article, we reflect on modern problems of linguistics and methods of teaching English. At present, the need to learn English in its actual functioning in various spheres of human activity has become generally accepted. The well-known fact is that an indispensable condition for the implementation of any communicative act must be a mutual knowledge of realities by the speaker and the hearer, which is the basis of language communication.

Keywords: background knowledge, foreign languages, linguistics, phonetics, grammar.

1. INTRODUCTION

At present, the need to learn English in its actual functioning in various spheres of human activity has become generally accepted. The last year of training focuses on business English, where the main is the communicative method of teaching. However, here we are faced with a number of communicative problems of linguistics.

The well-known fact is that an indispensable condition for the implementation of any communicative act must be a mutual knowledge of realities by the speaker and the hearer, which is the basis of language communication. These values have received in linguistics the name of background knowledge. A word reflecting an object or phenomenon of the reality of a particular society not only means it, but also creates some background associated with this word.

The experience of teaching shows that even at advanced stages of education, students admit a significant number of errors both in the performance of exercises and when using substantive constructions in conversational practice.

Incorrect use of these structures in the composition of a complex sentence leads to a violation of the logic of the utterance and, as a consequence, to non-fulfillment of the tasks of communication.

2. RESEARCH BACKGROUND

The transition from cultural to individual is manifested in the projection of cultural significance through the prism of some of its own properties, attitudes. This is the barrier in communication, which is called psychological, and is the most difficult to overcome in communication between individuals, because for all people the mechanism of "encryption" and "decryption" is different and depends on various reasons, one of which is the different psychology of people. Therefore, the urgency of the communicative problem has now acquired an unprecedented poignancy. This problem is also connected with one of the problems of translation theory, namely with the ways of transferring the equivalent vocabulary, i.e. Vocabulary, which has no analogues in a different culture. It, in turn, creates a great obstacle in communication between people of different cultures. The solution to this problem we see in the expansion of background knowledge of students. Background vocabulary are words or expressions that have additional content and accompanying semantic or stylistic nuances that overlap with its basic meaning, known to the speaker and listener belonging to a given language culture. Therefore, an important stage in teaching communication is to familiarize students with the realities, traditions and customs of English-speaking countries.
