Problems of Communism , 1952 Contemporary Tools and Techniques for Studying Writing T. Olive, C.M. Levy, 2012-12-06 111 With some pride I hereby introduce the 10 volume in the Studies of Writing book series This volume aims to be a tool book for writing research In my opinion the editors and authors of this volume succeeded in this endeavor Four guiding questions are answered in all chapters on online techniques How to The key to such a book is providing insight in the decisions researchers make when developing tools and techniques such information is not found in journal articles and in the best case hidden in technical reports This book provides readers with detailed information about the ins and outs of various online techniques When to Another contribution of this tool book is to provide insight into when the tool can be used in other words to relate the tool or technique to the theoretical claims about the writing process or cognitive processes underlying writing processes Theory methodology tools and techniques handling data and interpretation form a coherent unit When not to There is no cow without a spot Dutch er is geen koe zonder vlekje is the literal translation of a Dutch expression Techniques tools have their limitations and their problems in applying them and or handling or interpreting the data they produce In a book like this researchers took the opportunity to provide readers with a look behind the curtains in the process of research Scientific critical reflection is one of the strong features of this book
The Mirror of Language (Revised Edition) Marcia L. Colish, 1983-01-01 Early Christianity faced the problem of the human word versus Christ the Word Could language accurately describe spiritual reality The Mirror of Language brilliantly traces the development of one prominent theory of signs from Augustine through Anselm of Canterbury Thomas Aquinas and Dante Their shared epistemology validated human language as an authentic but limited index of preexistent reality both material and spiritual This sign theory could thereby account for the ways men receive know and transmit religious knowledge always mediated through faith Marcia L Colish demonstrates how the three theologians used different branches of the medieval trivium to express a common sign theory Augustine stressed rhetoric Anselm shifted to grammar including grammatical proofs of God's existence

and Thomas Aquinas stressed dialectic Dante the one poet included in this study used the Augustinian sign theory to develop a Christian poetics that culminates in the Divine Comedy The author points out not only the commonality but also the sharp contrasts between these writers and shows the relation between their sign theories and the intellectual ferment of the times When first published in 1968 *The Mirror of Language* was recognized as a pathfinding study This completely revised edition incorporates the scholarship of the intervening years and reflects the refinements of the author's thought Greater prominence is given to the role of Stoicism and sharper attention is paid to some of the thinkers and movements surrounding the major thinkers treated Concerns of semiotics philosophy and literary criticism are elucidated further The original thesis still controversial is now even wider ranging and more salient to current intellectual debate
