Problems Of An Urban Society Volume Three Planning For Change:

Problems of an Urban Society J.B. Cullingworth, 2012-11-12 This book provides a wide ranging review of urban problems and constitutes a major contribution to the mounting public debate that these problems are attracting. Many of the problems of social and economic decay are not new indeed they are perennial problems of urban societies. As the complexities and interdependencies of modern life have increased so has the resolve to combat the environmental and social ills to which these give rise. The particular focus of this volume is on the framework of urban problems: the changing demographic, social and economic structure, the shortage of land and the transport needs of a highly complex industrial society. A mass of facts and figures are neatly and succinctly marshalled to provide a clear picture of the problems. Stress is laid on the essentially political nature of these problems and the alternative solutions. In essence urban problems are problems of social injustice, of disadvantage and of lack of power. This book was first published in 1973. Deprivation, State Interventions and Urban Communities in Britain, 1968-79 Peter Shapely, 2017-08-16 Focusing on a series of policy initiatives from the late 1960s through to the end of the 1970s, this book looks at how successive governments tried to address growing concerns about urban deprivation across Britain. It provides unique insights into policy and governance and into the socio-economic and cultural causes and consequences of poverty. Starting with the impact of redevelopment policies, immigration and the rise of the inner city, this book examines the pressures and challenges that explain the development of policy by successive Labour and Conservative governments. It looks at the effectiveness and limits of different community development approaches and at the inadequacies of policy in tackling urban deprivation. In doing so, the book highlights the restricted impact of pilot projects and reform of public services in resolving deprivation, as well as the broader limits of social planning and state welfare. Crucially, it also plots the shift in policy from an emphasis on achieving statutory service efficiencies and rolling out social development programmes towards an ever greater stress on regeneration and support for private capital as the solution to transforming the inner city. **Planning Theory** Burchell, Robert W., and George Sternlieb, Originally published.
