Problems Of Religious Experience Studia Doctrinae Christianae Upsaliensia:

Problems of Religious Experience Carl Reinhold Bråkenhielm, 1985 Are religious experiences illusions Or are at least some religious experiences veridical This is a philosophical problem of great importance for theology A central thesis in the present essay is negatively that religious experiences are not self authenticating and positively that they require the backing of an overall world view In addition some guidelines for distinguishing true religious experiences from false ones are required These matters are dealt with in chapter 8 10 However various other problems of religious experience has to be solved first Some of the most important ones are discussed in chapter 1 7 Chapter 1 focuses upon the concept of religious experience which is explained in terms of experiences of transcendence Chapter 2 examines some arguments for the claim that religious experiences cannot be conceptualized and concludes that some general concepts can be applied even if the possibility of their revision remains permanently open Chapter 3 scrutinizes some arguments against the claim that experiences of God are possible In chapter 4 the concept of revelatory experiences is analysed and the possibility of a rational assessment of revelation claims discussed In chapter 5 it is argued that the valid claim that religious experiences are determined by underlying religious beliefs does not imply that religious experiences are without epistemological significance In chapter 6 a number of arguments against the veridicality of religious experiences is examined Chapter 7 contains a more extensive discussion on the epistemological consequences of a natural explanation of religious experiences It is argued that religious experiences can be veridical experiences of the transcendent even if they have a natural explanation **Studia doctrinae Christianae Upsaliensia** Axel Gyllenkrok, 1987 **Towards a Theory of Relativity of Truth in Morality and Religion** Charles Goossens, 1990 This study argues for a model in which moral truth is presented as truth in the perspective of certain social commitments while religious truth is interpreted as truth in the perspective of religious experience It theorizes that relativity need not conflict with universality Truth from the perspective of the outsider is therefore truth without qualification **The Study of Science and Religion** Carl Reinhold Brakenhielm, 2018-06-06 The main aim of this book is to contribute to the relationship between science and religion This book aims to do constructive theological work out of a particular cultural context The point of departure is contemporary Swedish religion and worldviews One focus is the process of biologization i e how the worldviews of the general public in Sweden are shaped by biological science Is there a gap between Swedes in general and the perceptions of Swedish clergy The answer is based on sociological studies on science and religion in Sweden and the United States Furthermore the book contains a study of Swedish theologians from Nathan Soderblom to the present Archbishop Antje Jackelen and their shifting understanding of the relation between science and religion The philosophical aspects of this relation are given special consideration What models of the relation inform the contemporary scholarly discussion Are science and religion in conflict separate or in mutual creative interaction *Martin Luther's Understanding of Faith and Reality (1513-1521)* Ilmari Karimies, 2022-08-03 Ilmari Karimies investigates Martin

Luther's understanding of reality and faith He examines Luther's understanding of reality from three perspectives firstly God as the self giving highest good uniting opposites and hiding beneath them secondly the visible and invisible world and thirdly human beings as tripartite body soul spirit and bipartite flesh spirit The author explores the cognitive conflict between these in relation to spirit's grasping of God and the invisible world with reference to Augustinian Platonism He analyses aspects of faith from the perspective of the theory of divine illumination and shows that Luther represents a realistic Augustinian view Faith functions as the theological intellect grasping the invisible world and showing human beings the future good in a manner similar to the medieval notion of ecstatic knowledge It differs from vision in glory because of sin as mixed with humanity and as partial knowledge

Science and the Spirit James K. A. Smith,Amos Yong,2010-08-26 What might be described as a Pentecostal worldview has become a powerful cultural phenomenon but it is often at odds with modernity and globalization Science and the Spirit confronts questions of spirituality in the face of contemporary science The essays in this volume illustrate how Pentecostalism can usefully engage with technology and scientific discovery and consider what might be distinctive about a Pentecostal dialogue with the sciences The authors conclude that Pentecostals with their unique perspectives on spirituality can contribute new insights for a productive interaction between theology and science

Theology as Repetition Stephen

Foster,2020-01-01 Theology as Repetition revisits and argues for a revival of John Macquarrie s philosophical theology Macquarrie was a key twentieth century theological voice and was considered a foremost interpreter and translator of Martin Heidegger s philosophy He then somehow fell from view Macquarrie developed a new style of theology grounded in a dialectical phenomenology that is a relevant voice in responding to recent trends in theology The development of the book is partly chronological and partly thematic and avoids attempting to be either deductive or inductive in argument but rather reflects Macquarrie s phenomenologically styled new theology Theology as Repetition is set out in two parts The first part situates Macquarrie in relation to thinkers from the radical theology of the 1960s through to the postmodernists of the late twentieth century The second part explores the intersection of key themes in Macquarrie s theology with the thinking of Kant Hegel Heidegger and representative postsecular and postmodern figures including but not limited to Emmanuel Levinas Jacques Derrida and Jean Luc Marion

Systematic Theology as a Rationally Justified Public Discourse about God Michael Agerbo Mørch,2023-01-23 For centuries it has been discussed whether systematic theology is a scientific discipline But it is not obvious what is meant by either systematic theology or scientific discipline Michael Agerbo Mørch presents an understanding of systematic theology as a tripartite discipline and science as a rationally justified public discourse about a given topic Systematic theology is shown to meet the most generally accepted criteria for scientific work since its theories can be tested and even falsified in an intersubjective setting This can be done by the most proper tool we have for assessing and comparing scientific theories which is coherence theory Therefore even though systematic theology is a distinct and normative discipline it is not compromising for its theories because it can present its theses in a transparent way that can be checked and criticized by peers and compared to relevant alternatives As such the book shows that systematic theology is a scientifically strong discourse that meets accepted criteria to the same degree as other disciplines
