Hattori, 2021-12-07 The question of how to maintain the continuity of diplomacy while developing democracy without military intervention is an old and new issue The challenge can be described as a dilemma between democracy and diplomatic coherence This dilemma is not unique to the twenty first century it has been a constant challenge to the development of democracy In non Western countries democratisation originated in the nineteenth century and has had many successes and failures After the Russo Japanese War political parties began to take power in Japan The best embodiment of diplomacy in Japan s emerging democracy the development of parliamentary democracy and mass based democracy is Shidehara Kij r 1872 1951 who served as foreign minister from 1924 to 1927 and from 1929 to 1931 and was prime minister from 1945 to 1946 As a diplomat from the Ministry of Foreign Affairs Shidehara had long grappled with the issue of how to ensure

diplomatic coherence in modern Japan which was becoming increasingly democratic Although Shidehara succeeded to some extent in promoting diplomacy in cooperation with the US and the UK under party politics the rise of the military after the Manchurian Incident forced him to retire for a period However after the Pacific War Shidehara became prime minister of the US occupied Japan and attempted to restore cooperative diplomacy under party politics Shidehara came to the conclusion that the way to achieve both democracy and diplomatic coherence was through nonpartisan diplomacy towards peace This book examines the tension between diplomacy and democracy focusing on Shidehara s life and exploring modern Japan s footsteps Shidehara was undoubtedly one of Japan s most important diplomatic figures *Library of Congress Catalogs*

How can countries decide what kind of military forces they need if threats are uncertain and history is full of strategic surprises This is a question that is more pertinent than ever as countries across the Asia Pacific are faced with the military and economic rise of China Uncertainty is inherent in defence planning but different types of uncertainty mean that countries need to approach decisions about military force structure in different ways This book examines four different basic frameworks for defence planning and demonstrates how states can make decisions coherently about the structure and posture of their defence forces despite strategic uncertainty It draws on case studies from the United States Australian and New Zealand each of which developed key concepts for their particular circumstances and risk perception in Asia Success as well as failure in developing coherent defence planning frameworks holds lessons for the United States and other countries as they consider how best to structure their military forces for the uncertain challenges of the future *Resources in*
