Problems in Elementary School Administration Frank P. Bachman, 1916 *Problems in Elementary School Administration* Frank Puterbaugh Bachman, 2017-10-11 Excerpt from Problems in Elementary School Administration A Constructive Study Applied to New York City Three important contemporary problems in the administration of elementary schools are treated in this volume by a method which is commending itself increasingly to students of Education and has a special significance for all officers of school administration and supervision These problems arise when the establishment of intermediate schools or junior high schools is under consideration when we seek to ascertain what a satisfactory rate of promotion is and under what conditions we may hope for a maximum rate of promotion and when we try to secure age grade standards that will yield as usable and valid information concerning the number of normal age over age and under age children in the schools and the method employed in dealing with these problems is the statistical or objective method the method that is free from personal bias or general Opinion and seeks to arrive at valid conclusions on the basis of incontestable and well organized data About the Publisher Forgotten Books publishes hundreds of thousands of rare and classic books Find more at www.forgottenbooks.com This book is a reproduction of an important historical work Forgotten Books uses state of the art technology to digitally reconstruct the work preserving the original format whilst repairing imperfections present in the aged copy In rare cases an imperfection in the original such as a blemish or missing page may be replicated in our edition We do however repair the vast majority of imperfections successfully any imperfections that remain are intentionally left to preserve the state of such historical works **Problems in Elementary School**
