Industrialization and Underdeveloped Countries Alan B. Mountjoy, 2017-07-12

The volume of relevant research and literature on this topic is growing but originates mainly from economists, sociologists, and political scientists. Geographers have been slow to make contributions. One reason may be that geographers have been preoccupied with differentiation within the geography of production, whereas this new field directs attention to the geography of consumption and a study of economies. This book aims to focus attention on the complex and interrelated problems, social, economic, political, and geographical, that come with development, placing particular emphasis on the problems which accompany attempts at industrialization. Focusing on the complex and interrelated social, economic, political, and geographic problems that attend underdevelopment, this book presents one of the first contributions from a geographer on what has been called the most important economic problem of the modern world. Contending that industrialization is no answer for underdeveloped countries that are striving to maintain expanding populations and to strengthen their economy, Alan B. Mountjoy traces the distribution, causes, and problems of underdevelopment and the difficulties with and possibilities for industrialization as an aid in solving those problems. He defines development and underdevelopment, considers problems of industrialization including environmental and human problems, discusses the forms industrialization takes, and analyzes the progress of industrialization in specific underdeveloped areas. The unique geographer's perspective and the ability of the author to select aspects of the study that most clearly reflect the problems of underdeveloped economies make this work a useful text and reference book for students and scholars of development, economic geography, and international relations.

Disguised Unemployment in Underdeveloped Areas Yong Sam Cho, 2024-03-29

The purpose of this book is to examine the accepted concepts and theories on surplus labor in underdeveloped agricultural economies, particularly in the literature on disguised unemployment. By doing so, the author clears the way toward finding a more valid theoretical concept of this vital subject, which is the core of potential economic and social development in the underdeveloped countries. The author, after establishing a more realistic and workable definition of surplus labor on the basis of a closer investigation of the extended family clan village system so typical of the tradition-guided underdeveloped societies, proceeds to work out a method for measuring true surplus labor with

rural South Korea as a case example Of particular interest is the author s distinction between two types of surplus labor technical open idle labor and the tradition directed closed idle labor Thus having obtained quantitative data on the extent of underemployment in South Korea the author continues with a discussion of policy implications in the employment structure of underdeveloped countries and constructs a proposed program for the utilization of surplus labor without the application of totalitarian methods without waiting for the availability of additional capital from the outside and without making a change in traditional institutions and a priori condition for the utilization of idle labor This program calls for capital improvements within the agricultural area financed by the agricultural sector itself after it is shown through statistical data that capital improvements in agriculture yield quicker and greater results than in other sectors of the economy The author also attempts to show how such a program would not only put to work a major part of unutilized labor on agricultural development projects but would also pave the way toward a gradual dissolution of those social traditions and institutions that have been economically hampering and that have been thereby an important cause of perpetuating economic and social stagnation The author also claims for his program the added virtue of minimizing the social unrest that results from economic distress thus safeguarding political stability within the framework of needed reform The government of the Republic of Korea cooperated closely with the author in carrying out the research underlying this study Basic statistical data were obtained through the cooperation of the research department of the Bank of Korea The purpose of this book is to examine the accepted concepts and theories on surplus labor in underdeveloped agricultural economics particularly in the literature on disguised unemployment By doing so the author clears the way toward finding a more v **Indian Economy** Dr. A.
