The Problems with Philosophy Bertrand Russell, 2012-12-12 The Problems of Philosophy discusses Bertrand Russell's views on philosophy and the problems that arise in the field. Russell's views focus on knowledge rather than the metaphysical realm of philosophy. The Problems with Philosophy revolves around the central question that Russell asks in his opening line of Chapter 1: Is there any knowledge in the world which is so certain that no reasonable man could doubt it? He examines this question by delving into the idea of reality versus appearance. As for Russell and other philosophers who share his ideas, it is sensory perception of the world around them that shapes their knowledge. It is in this work that he discusses his idea of sense data to help explain the differences between appearance and reality. The Problems of Philosophy is Russell's first attempt at recording and working through a theory of epistemology, which is the theory of the nature of human knowledge.

A Collection of Polish Works on Philosophical Problems of Time and Spacetime Helena Eilstein, 2013-04-17 This is a collection of some works of Polish philosophers and physicists on philosophical problems of time and spacetime Without restricting the thematic scope of the papers the issue concerning objectivity of time flow runs as a uniting thread through most of them Partly it is discussed directly and partly the authors focus on themes which are of paramount importance for one's attitude to that question In the first six papers the authors deal with their topics against the background of contemporary physics its theories its difficulties and discussed conjectures For the paper of S Snihur that background is provided by everyday world outlook and the author discusses the problem of existence and character of the future in the light of basic principles of classical logic The paper of A P61tawski about the views of the outstanding Polish philosopher Roman Ingarden enriches the thematic scope of the collection introducing into it some questions from philosophical anthropology and ethics

JERZY GOLOSZ MOTION SPACE TIME Abstract The paper discusses the properties of spacetime we study by analyzing the phenomenon of motion Of special interest are the spacetime symmetries the spacetime structures and the ontological status of spacetime These problems are considered on the grounds of the classical theories of motion contained in Newtonian physics special and general theory of relativity The controversy between an absolute and a relational conception of motion and its ontological implications are also analyzed

The Problem of Free Will and Naturalism Christian Onof, 2024-02-22 The problem of free will is one of the oldest and most central philosophical conundrums The contemporary debate around it has produced a range of sophisticated proposals but shows no sign of leading to convergence Christian Onof reviews these contemporary approaches and argues that their main shortcomings are ultimately due to paradoxical requirements on free will imposed by the naturalistic framework Onof singles out Kant's critical solution as one that stands out among historical approaches insofar as it is based upon a rejection of this framework By using the same methodological tool that he applies to contemporary proposals namely a distinction between a volitional account of how we control our actions a psychological account of the reasons for it and a metaphysical account of our status as agent Onof shows that Kant's solution constitutes a coherent picture of free will By exhibiting the structure running through several key publications of Kant's critical period and drawing upon unpublished notes Onof addresses several debates which loom large in contemporary Kant literature His exegetical work puts Kant's theory into conversation with contemporary analytic theories of free will and leads to defining a Kantian position that overcomes the issues plaguing existing approaches to the problem of free will

Wittgenstein and the Problem of Metaphysics Michael Smith, 2021-11-18 Exploring the rupture between

Wittgenstein's early and late phases Michael Smith provides an original re-assessment of the metaphysical consistencies that exist throughout his divergent texts Smith shows how Wittgenstein's criticism of metaphysics typically invoked the very thing he was seeking to erase Taking an alternative approach to the inherent contradiction in his work the problem of metaphysics as Smith terms it becomes the organizing principle of Wittgenstein's thought rather than something to overcome This metaphysical thread enables further reflection on the poetic nature of Wittgenstein's philosophy as well as his preoccupation with ethics and aesthetics as important factors mostly absent from the secondary literature The turn to aesthetics is crucial to a re-assessment of Wittgenstein's legacy and is done in conjunction with an innovative analysis of Nietzsche's critique of Kantian aesthetics and Kant's judgments of taste The result is a unique discussion of the limits and possibilities of metaphysics aesthetics ethics and the task of the philosopher more generally

The Problem of Truth Herbert Wildon Carr, 2015-03-26 A problem of philosophy is completely different from a problem of science In science we accept our subject matter as it is presented in unanalysed experience in philosophy we examine the first principles and ultimate questions that concern conscious experience itself The problem of truth is a problem of philosophy It is not a problem of merely historical interest but a present problem a living controversy the issue of which is undecided Its present interest may be said to centre round the doctrine of pragmatism which some fifteen years ago began to challenge the generally accepted principles of philosophy In expounding this problem of truth my main purpose has been to make clear to the reader the nature of a problem of philosophy and to disclose the secret of its interest My book presumes no previous study of philosophy nor special knowledge of its problems The theories that I have shown in conflict on this question are each of them held by some of the leaders of philosophy In presenting them therefore I have tried to let the full dialectical force of the argument appear I have indicated my own view that the direction in which the solution lies is in the new conception of life and the theory of knowledge given to us in the philosophy of Bergson If I am right the solution is not like pragmatism a doctrine of the nature of truth but a theory of knowledge in which the dilemma in regard to truth does not arise But as always in philosophy the solution of one problem is the emergence of another There is no finality My grateful acknowledgment is due to my friend Professor S Alexander who kindly read my manuscript and assisted me with most valuable suggestions and also to my friend Dr T Percy Nunn for a similar service

God and the Problem of Logic Andrew Dennis Bassford, 2023-06-08 Classical theists hold that God is omnipotent But now suppose a critical theologian were to ask Can God create a stone so heavy that even he cannot lift it This is the dilemma of the stone paradox God either can or cannot create such a stone Suppose that God can create it Then there's something he cannot do namely lift the stone Suppose that God cannot create the stone Then again there's something he cannot do namely create it Either way God cannot be omnipotent Among the variety of known theological paradoxes the paradox of the stone is especially troubling because of its logical purity It purports to show that

one cannot believe in both God and the laws of logic In the face of the stone paradox how should the contemporary analytic theist respond Ought they to revise their belief in theology or their belief in logic Ought they to lose their religion or lose their mind *The Theory and Practice of Philosophy* Abraham Edel, 2017-07-05 There is an historical element throughout philosophy As Edel notes this is always in the context of problems so emphasis will fall on the major objective of reflective analysis of ideas The major objective of Edel s analysis in *The Theory and Practice of Philosophy* is the fundamental interrelatedness of problems of method metaphysics and value Each part is an integral whole complete in itself That philosophy has this central role in human practice indicates that it should be neither discarded nor deified This is the explicit premise of the book Students are likely to be faced increasingly with a demand for clarification on the fundamental issues of life and value The expectation that philosophy will provide ready made answers to these kinds of questions is as naive as the demand for any panacea but this task cannot be turned over to any other department of human knowledge or any other branch of social activity By placing emphasis on the importance of theory in matters of practice the need for clear and systematic understanding of the world and man within it and on the constant role of reflection in the management of human affairs Edel seeks to shed light on the larger questions of philosophy by examining them in a systematic way The result is a great text and tool for students and teachers that deals directly with the fundamental issues of our civilization
