Swedish Economists in the 1930s Debate on Economic Planning Benny Carlson, 2018-12-06 The 1930s characterised by repercussions from World War I and the Great Depression was an era of populism nationalism protectionism government intervention and attempts to create planned economies The perceived need for economic planning emerged in Sweden in part due to the increasing political strength of the Social Democrats and their evolution from a party hampered by Marxist fatalism to a pragmatic mass movement The Swedish debate continued beyond World War II and is still relevant to today's economic crises which have resulted in a demand for action coming from below populism and above elitism Carlson surveys the arguments for and against economic planning as they were put forward by leading Swedish economists in the 1930s with a focus on the thoughts of Gustav Cassel Eli Heckscher Gosta Bagge Gunnar Myrdal and Bertil Ohlin among others In so doing he provides a timely exploration of the debate on the necessary and desirable extent of state intervention in market economies

The Contradictions of "Real Socialism" Michael A. Lebowitz, 2012-08-01 What was real socialism the term which originated in twentieth century socialist societies for the purpose of distinguishing them from abstract theoretical socialism In this volume Michael A Lebowitz considers the nature tendencies and contradictions of those societies Beginning with the constant presence of shortages within real socialism Lebowitz searches for the inner relations which generate these patterns He finds these in particular in what he calls vanguard relations of production a relation which takes the apparent form of a social contract where workers obtain benefits not available to their counterparts in capitalism but lack the power to decide within the workplace and society While these societies were able to claim major achievements in areas from health care to education to popular culture the separation of thinking and doing prevented workers from developing their capacities as fully developed human beings The relationship within real socialism between the vanguard as conductor and a conducted working class however did not only lead to the deformation of workers and those elements necessary for the building of socialism it also created the conditions in which enterprise managers emerged as an incipient capitalist class which was an immediate source of the crises of real socialism As he argued in *The Socialist Alternative Real Human Development* Lebowitz stresses the necessity to go beyond the hierarchy inherent in the relation of conductor and conducted and beyond the vanguard Marxism which supports this to

create the conditions in which people can transform themselves through their conscious cooperation and practice i.e. a society of free and associated producers

Socialism Phillip J. Bryson, 2015-10-09 Socialism Origins Expansion Decline and Attempted Revival in the United States This book is an attempt to address all the important economic aspects of socialism the concepts and theories the historical attempts to implement socialist economic systems and the endeavor to establish socialism in the United States Part I reviews the origins and ideas of socialism which reflect an aspiration radically to transform the market system the great advantages of which were explained by Adam Smith Part II reviews the establishment of Marxist Leninist economic systems in the USSR and the East European countries The movement featured central economic planning which survived from the 1920s until about 1990 its failure was the attempt of statist organization to crush the market system and replace it with Stalinist command planning Central planning was meticulously copied in the bloc countries of East Europe in China in India and elsewhere The national replications of central economic planning always produced the same disappointing usually disastrous results Efforts to reform the system always failed Meanwhile the democratic countries of Western Europe established socialist parties and policies but in less than a century after Marx the great hopes of socialism to achieve successful and productive nationalization of industries on the basis of a national economic plan had been recognized as unproductive and undesirable Part III reviews the failed attempt to establish a viable socialist party in the United States The real thrust toward socialism originally launched by the New Deal of Roosevelt came when Barak Obama a thoroughly indoctrinated and dedicated socialist ascended to the US presidency This socialism is an attempt to expand income redistribution and social welfare policies and to pursue massive industrial regulation and unconstitutional interventions in the private sector The implications of these policies are discussed together with the associated loss of market freedoms and personal liberties

The Economics of Transition Marie Lavigne, 1999-02-15 Substantially revised and updated the second edition of this highly acclaimed text is both a vital guide and a valuable critical analysis The book provides a contemporary comparative approach to the process of transformation of the economies of Eastern Europe and Russia Supplying a large amount of factual and statistical information it also includes consideration of recent progress in the areas of macro economic stabilisation micro economic restructuring and integration into the world economy

Information Space (RLE: Organizations) Max Boisot, 2013-06-26 In this book the author lays the foundations for a new political economy of information The information space or I Space is the conceptual framework in which organizations institutions and cultures are being transformed by new information and communication technologies In the penultimate chapter the I Space s usefulness as an explanatory framework is illustrated with an application a case study of China s modernization Information Space proposes a radical shift in the way that we approach the emerging information age and the implications it holds for societies organizations and individuals

The capitalist mode of destruction Costas Panayotakis, 2021-02-09 The capitalist mode of destruction traces contemporary capitalism s economic ecological and democratic crises Combining insights from a range of disciplines including psychology sociology and political economy Panayotakis interprets these crises as manifestations of a previously unrecognized contradiction over time the benefits of capitalism s technological dynamism tend to decline even as its threats to humanity and the planet continue to mount To explain this contradiction the book analyzes the production and distribution of surplus in capitalist societies and rethinks the concept of surplus itself Identifying the public sector and households as sites of production no less important than the workplace this book attributes capitalism s contradictions to working people s lack of control over the surplus they produce This lack of control is undemocratic and threatens the planet Only a classless society in which working people democratically determine the size and use of the surplus they produce can effectively respond to our current predicament Recognizing such a democratic classless society as the essence of the communist ideal the book argues that far from becoming obsolete this ideal is ever more indispensable But since the necessity of this ideal does not guarantee its realization the book also investigates the conditions necessary for the formation of an anti capitalist alliance for social justice democracy and ecological sustainability

Communist Planning versus Rationality János Mátyás Kovács, 2022-04-14 This volume examines concepts of central planning a cornerstone of political economy in Soviet type societies It revolves around the theory of optimal planning which promised a profound modernization of Stalinist style verbal planning Encouraged by cybernetic dreams in the 1950s and supporting the strategic goals of communist leaders in the Cold War optimal planners offered the ruling elites a panacea for the recurrent crises of the

planned economy Simultaneously their planning projects conveyed the pride of rational management and scientific superiority over the West The authors trace the rise and fall of the research program in the communist era in eight countries of Eastern Europe including the Soviet Union and China describing why the mission of optimization was doomed to fail and why the failure was nevertheless very slow The theorists of optimal planning contributed to the rehabilitation of mathematical culture in economic research in the communist countries and thus to a neoclassical turn in economics all over the ex communist world However because they have not rejected optimal planning as computopia there is a large space left behind for future generations to experiment with Big Optimal Plans anew based at this time on artificial intelligence and machine learning

Remaking Scarcity Costas Panayotakis, 2011-09-12 The dominant schools of neoclassical and neoliberal economics tell us that material scarcity is an inevitable product of an insatiable human nature Against this Costas Panayotakis argues that scarcity is in fact a result of the social and economic processes of the capitalist system The overriding importance of the logic of capital accumulation accounts for the fact that capitalism is not able to make a rational use of scarce resources and the productive potential at the disposal of human society Instead capitalism produces grotesque inequalities and unnecessary human suffering a toxic consumerist culture that fails to satisfy and a deepening ecological crisis Remaking Scarcity is a powerful challenge to the current economic orthodoxy It asserts the core principle of economic democracy that all human beings should have an equal say over the priorities of the economic system as the ultimate solution to scarcity and ecological crisis

Analytical Marxism Thomas F. Mayer, 1994-06-08 Analytical Marxism blends the tenets of Marxist theory with many of the more traditional methods of social science In this brief introduction to the major ideas and scholars in the Analytical Marxist school Thomas F Mayer assesses the achievements strengths and criticisms of their work Focusing on the work of Elster Roemer Wright and others Mayer examines their writing on class the state exploitation and revolution Sections addressing communism and socialism define these terms in historical and current contexts enabling the author to establish the patterns from which political predictions may be drawn The book also explores the challenge to Marxist thought brought about by contemporary developments in Eastern Europe and suggests how the future of Marxism is shaped by these events Designed to help undergraduates understand the complex literature on the topic this volume is written in an accessible style and includes a glossary and annotated reading list The language is exceptionally clear and free of mathematical equations Thomas F Mayer demonstrates in fact how needless equations so often are Thomas F Mayer's Analytical Marxism is a theoretical statement in its own right As such it is far more compelling than the edited volume with the same title that came out in 1986 What makes Mayer's book superior is that it has abandoned or muted many of the philosophically objectionable positions associated with its predecessor Contemporary Sociology Thomas F Mayer's book admirably demonstrates the robust and provocative results wrought by Cohen Elster Przeworski Roemer and Wright with their chosen tools The liveliness and intensity of the debates provoked by these theorists' assertions suggests that the

Marxian analytical tradition has a robust future Science and Society **The Labour Party and the Planned Economy, 1931-1951** Richard Toye, 2003 An exploration of Labour's 1931 pledge to create a planned socialist economy and the reasons for its failure to do so In the general election of 1931 the Labour Party campaigned on the slogan Plan or Perish The party's pledge to create a planned socialist economy was a novelty and marked the rejection of the gradualist evolutionary socialism to which Labour had adhered under the leadership of Ramsay MacDonald Although heavily defeated in that election Labour stuck to its commitment The Attlee government came to power in 1945 determined to plan comprehensively Yet the aspiration to create a fully planned economy was not met This book explores the origins and evolution of the promise in order to explain why it was not fulfilled RICHARD TOYE lectures in history at Homerton College Cambridge

Eurocommunism Ioannis Balampanidis, 2018-11-09 Eurocommunism constitutes a moment of great transformation connecting the past and the present of the European Left a political project by means of which left wing politics in Europe effected a definitive transition to a thoroughly different paradigm It rose in the wake of 1968 that pivotal year of social revolt and rethinking that caused a divide between radical progressive and socialist thinking in western and southern Europe and the Soviet model Communist parties in Italy France Spain and Greece changed tack drew on the dynamics of social radicalism of the time and came to be associated with political moderation liberal democracy and negotiation rather than contentious politics forging a movement that would hold influence until the early 1980s Eurocommunism thus wove an original political synthesis delineated against both the revolutionary Left and the social democracy party of struggle and party of governance *The Dialectics of Ecology* John Bellamy Foster, 2024-04-01 Explores ecological socialism's potential against capitalist environmental degradation Today the fate of the earth as a home for humanity is in question and yet contends John Bellamy Foster the reunification of humanity and the earth remains possible if we are prepared to make revolutionary changes As with his prior books *The Dialectics of Ecology* is grounded in the contention that we are now faced with a concrete choice between ecological socialism and capitalist exterminism and rooted in insights drawn from the classical historical materialist tradition In this latest work Foster explores the complex theoretical debates that have arisen historically with respect to the dialectics of nature and society He then goes on to examine the current contradictions associated with the confrontation between capitalist extractivism and the financialization of nature on the one hand and the radical challenges to these represented by emergent visions of ecological civilization and planned degrowth on the other The product of contemporary ecosocialist debates *The Dialectics of Ecology* builds on earlier works by Foster including *Marx's Ecology* and *The Return of Nature* aimed at the development of a dialectical naturalism and the formation of a path to sustainable human development
