programs are becoming more sophisticated and are beginning to leverage evidence from comparative genomics. These topics and more were discussed at the 3rd Annual RECOMB Workshop on Regulatory Genomics which brought together more than 90 attendees and included about 22 excellent talks from leading researchers in the field. This proceedings volume contains ten selected original manuscripts that were presented during the workshop. *Proceedings of the 4th Asia-Pacific Bioinformatics Conference* Tao Jiang, 2006. High throughput sequencing and functional genomics technologies have given us a draft human genome sequence and have enabled large scale genotyping and gene expression profiling of human populations. Databases containing large numbers of sequences, polymorphisms and gene expression profiles of normal and diseased tissues in different clinical states are rapidly being generated for human and model organisms. Bioinformatics is thus rapidly growing in importance in the annotation of genomic sequences in the understanding of the interplay between genes and proteins in the analysis of the genetic variability of species and so on. This proceedings contains an up to date exchange of knowledge, ideas and solutions to conceptual and practical issues of bioinformatics by researchers, professionals and industrial practitioners at the 4th Asia Pacific Bioinformatics Conference held in Taipei in February 2006.
