Hafler, 2011-01-04 The contributing authors of this multidisciplinary text agree that workplace learning truly is extraordinary when it is marked by structural congruence and a positive synergy among the intended and formal preparation of professionals that tacit learning occurs within the hidden curriculum and that the subsequent demands both formal and tacit are embedded in subsequent workplace settings Thus for this text these authors explore research and practice literature related to curriculum instruction and assessment of professionals learning in the workplace and the implications for best practices But what makes this book truly unique is that the authors examine that literature in the context of four professions education nursing medicine and clergy at the point of those professions wherein students are learning during the degree

program stages of their education Extraordinary Learning in the Workplace is broken into four main sections Part I explores curriculum both formal and hidden Part II focuses on conceptions and theories of learning and instruction and is intended to inform the work of educators with regard to components of professional education that occur in the practice settings of the workplace Part III covers assessment using medicine as its example to argue that assessment has remained largely unchanged for years thus making the multiple choice questions tests introduced in the 1950s the de facto gold standard for quality assessment And Part IV focuses on the training of the instructors visiting the three key themes of relationships activities or tasks and work practices

Primary Care Institute of Medicine, Committee on the Future of Primary Care, 1996-10-05 Ask for a definition of primary care and you are likely to hear as many answers as there are health care professionals in your survey Primary Care fills this gap with a detailed definition already adopted by professional organizations and praised at recent conferences This volume makes recommendations for improving primary care building its organization financing infrastructure and knowledge base as well as developing a way of thinking and acting for primary care clinicians Are there enough primary care doctors Are they merely gatekeepers Is the traditional relationship between patient and doctor outmoded The committee draws conclusions about these and other controversies in a comprehensive and up to date discussion that covers The scope of primary care Its philosophical underpinnings Its value to the patient and the community Its impact on cost access and quality This volume discusses the needs of special populations the role of the capitation method of payment and more Recommendations are offered for achieving a more multidisciplinary education for primary care clinicians Research priorities are identified Primary Care provides a forward thinking view of primary care as it should be practiced in the new integrated health care delivery systems important to health care clinicians and those who train and employ them policymakers at all levels health care managers payers and interested individuals

Education Scholarship in Healthcare April S. Fitzgerald, Gundula Bosch, 2023-11-28 Academic medical centers continue to require evidence of scholarly activity for their faculty to maintain their appointment and to advance in promotion rank For some training to know how to obtain evidence of scholarship was obtained through fellowship where information was passed from mentor to mentee in an apprenticeship fashion without a formalized text to follow to obtain the information In fellowship information might flow through word of mouth or articles handed down out to a mentee Others in fellowship develop skills by taking classes as part of an additional master s degree program such as a Master of Public Health For health professionals who enter an academic institution without having gone through a fellowship program they are still expected to perform scholarly activity but don t have the benefit of having done the apprenticeship to learn the skills so unless they decide to find a course obtain a master s degree or find a fellowship they have no way to gain the necessary skills and are at risk of losing their appointment and have no hope of progressing in promotion This text provides a comprehensive toolbox for the academic who needs these skills to survive It serves as a valuable resource for health professionals physicians nurses pharmacists physical therapists and allied professionals as well as scientists and students with the steps necessary to take their educational endeavors from idea to implementation through dissemination Beginning with the concept of What is Scholarship the authors walk the reader through the concepts of how to find your niche look through the literature to check for a gap design a question consider evaluation and outcomes be aware of ethical considerations plan a project look for support find mentorship prepare an abstract present a poster disseminate a project and lead a team All chapters are written by experts in the subject matter *Dermatologic and Cosmetic Procedures in Office Practice E-Book* Richard P.
