**Meaningful Internet Systems 2004: OTM 2004 Workshops** Zahir Tari, Angelo Corsaro, 2004-10-14 A special mention for 2004 is in order for the new Doctoral Symposium Workshop where three young postdoc researchers organized an original setup and formula to bring PhD students together and allow them to submit their research proposals for selection A limited number of the submissions and their approaches were independently evaluated by a panel of senior experts at the conference and presented by the students in front of a wider audience These students also got free access to all other parts of the OTM program and only paid a heavily discounted fee for the Doctoral Symposium itself In fact their attendance was largely sponsored by the other participants If evaluated as successful it is the intention of the General Chairs to expand this model in future editions of the OTM conferences and so draw in an audience of young researchers to the OnTheMove forum All three main conferences and the associated workshops share the distributed aspects of modern computing systems and the resulting applications created by the Internet and the so called Semantic Web For DOA 2004 the primary emphasis stayed on the distributed object infrastructure for ODBASE 2004 it was the knowledge bases and methods required for enabling the use of formal semantics and for CoopIS 2004 the main topic was the interaction of such technologies and methods with management issues

Nagel, Holger Brunst, Hartmut Mix, 2019-02-14 This book presents the proceedings of the 11th International Parallel Tools Workshop a forum to discuss the latest advances in parallel tools held September 11 12 2017 in Dresden Germany High performance computing plays an increasingly important role for numerical simulation and modeling in academic and industrial research At the same time using large scale parallel systems efficiently is becoming more difficult A number of tools addressing parallel program development and analysis has emerged from the high performance computing community over the last decade and what may have started as a collection of a small helper scripts has now matured into production grade frameworks Powerful user interfaces and an extensive body of documentation together create a user friendly environment for parallel tools

Aspects of Network and Information Security Evangelos Kranakis, Evgueni Haroutunian, Elisa Shahbazian, 2008 Understanding network vulnerabilities in order to protect networks from external and internal threats is vital to the world's economy and should be given the highest priority This volume discusses topics such as network security information security and coding      *Performance-oriented Application Development for Distributed Architectures* M. Gerndt, 2002 Annotation This publication is devoted to programming models languages and tools for performance oriented program development in commercial and scientific environments The included papers have been written based on presentations given at the workshop PADDA 2001 The goal of the workshop was to identify common interests and techniques for performance oriented program development in commercial and scientific environments Distributed architectures currently dominate the field of highly parallel computing Distributed architectures based on Internet and mobile computing technologies are important target architectures in the domain of commercial computing too The papers in this publication come from the two areas scientific computing and commercial computing      Applications, Tools and Techniques on the Road to Exascale Computing K. De Bosschere, E.H. D'Hollander, G.R. Joubert, 2012-05-09 Single processing units have now reached a point where further major improvements in their performance are restricted by their physical limitations This is causing a slowing down in

advances at the same time as new scientific challenges are demanding exascale speed This has meant that parallel processing has become key to High Performance Computing HPC This book contains the proceedings of the 14th biennial ParCo conference ParCo2011 held in Ghent Belgium The ParCo conferences have traditionally concentrated on three main themes Algorithms Architectures and Applications Nowadays though the focus has shifted from traditional multiprocessor topologies to heterogeneous and manycores incorporating standard CPUs GPUs Graphics Processing Units and FPGAs Field Programmable Gate Arrays These platforms are at a higher abstraction level integrated in clusters grids and clouds The papers presented here reflect this change of focus New architectures programming tools and techniques are also explored and the need for exascale hardware and software was also discussed in the industrial session of the conference This book will be of interest to all those interested in parallel computing today and progress towards the exascale computing of tomorrow
