Proceedings of the 1996 International Joint Power Generation Conference, 1900 **Human Reliability, Error, and Human Factors in Power Generation** B. S. Dhillon, 2014-01-07 Human reliability error and human factors in the area of power generation have been receiving increasing attention in recent years Each year billions of dollars are spent in the area of power generation to design construct manufacture operate and maintain various types of power systems around the globe and such systems often fail due to human error This book compiles various recent results and data into one volume and eliminates the need to consult many diverse sources to obtain vital information It enables potential readers to delve deeper into a specific area providing the source of most of the material presented in references at the end of each chapter Examples along with solutions are also provided at appropriate places and there are numerous problems for testing the reader's comprehension Chapters cover a broad range of topics including general methods for performing human reliability and error analysis in power plants specific human reliability analysis methods for nuclear power plants human factors in control systems and human error in power plant maintenance They are written in such a manner that the potential reader requires no previous knowledge to understand their contents Human Reliability Error and Human Factors in Power Generation will prove useful to many individuals including engineering professionals working in the power generation industry researchers instructors and undergraduate and graduate students in the field of power engineering Advanced Nuclear Systems Consuming Excess Plutonium E.R. Merz, Carl E. Walter, 2012-12-06 A survey of recent developments in the field of plutonium disposal by the application of advanced nuclear systems both critical and subcritical Current national R D plans are summarized The actinide fuelled critical reactors are associated with control problems since they tend to have a small delayed neutron fraction coupled with a small Doppler effect and a positive void coefficient Current thinking is turning to accelerator driven subcritical systems for the transmutation of actinides The book's conclusion is that the various systems proposed are technically feasible even though not yet technically mature The book presents a unique summary and evaluation of all relevant possibilities for burning surplus plutonium presented by experts from a variety of different disciplines and interests including the defence establishment The obvious issue the non proliferation of nuclear weapons is vital but the matter represents a complex technological challenge that also requires an assessment in economic terms Flow-Induced Vibration Handbook for Nuclear and Process Equipment Michel J. Pettigrew, Colette E. Taylor, Nigel J. Fisher, 2021-12-09 Explains the mechanisms governing flow induced vibrations and helps engineers prevent fatigue and fretting wear damage at the design stage Fatigue or fretting wear damage in process and plant equipment caused by flow induced vibration can lead to operational disruptions lost production and expensive repairs Mechanical engineers can help prevent or mitigate these problems during the design phase of high capital cost plants such as nuclear power stations and petroleum refineries by performing thorough flow induced vibration analysis Accordingly it is critical for mechanical

engineers to have a firm understanding of the dynamic parameters and the vibration excitation mechanisms that govern flow induced vibration Flow Induced Vibration Handbook for Nuclear and Process Equipment provides the knowledge required to prevent failures due to flow induced vibration at the design stage The product of more than 40 years of research and development at the Canadian Nuclear Laboratories this authoritative reference covers all relevant aspects of flow induced vibration technology including vibration failures flow velocity analysis vibration excitation mechanisms fluidelastic instability periodic wake shedding acoustic resonance random turbulence damping mechanisms and fretting wear predictions Each in depth chapter contains the latest available lab data a parametric analysis design guidelines sample calculations and a brief review of modelling and theoretical considerations Written by a group of leading experts in the field this comprehensive single volume resource Helps readers understand and apply techniques for preventing fatigue and fretting wear damage due to flow induced vibration at the design stage Covers components including nuclear reactor internals nuclear fuels piping systems and various types of heat exchangers Features examples of vibration related failures caused by fatigue or fretting wear in nuclear and process equipment Includes a detailed overview of state of the art flow induced vibration technology with an emphasis on two phase flow induced vibration Covering all relevant aspects of flow induced vibration technology Flow Induced Vibration Handbook for Nuclear and Process Equipment is required reading for professional mechanical engineers and researchers working in the nuclear petrochemical aerospace and process industries as well as graduate students in mechanical engineering courses on flow induced vibration

Proceedings of the ... International Conference on Nuclear Engineering ,2004 **Safety, Reliability, Human Factors, and Human Error in Nuclear Power Plants** B.S. Dhillon,2017-12-14 Each year billions of dollars are being spent in the area of nuclear power generation to design construct manufacture operate and maintain various types of systems around the globe Many times these systems fail due to safety reliability human factors and human error related problems The main objective of this book is to combine nuclear power plant safety reliability human factors and human error into a single volume for those individuals that work closely during the nuclear power plant design phase as well as other phases thus eliminating the need to consult many different and diverse sources in obtaining the desired information **Nominations of Molly O'Neill and Dale Klein** United States. Congress. Senate. Committee on Environment and Public Works,2009
