Jeffrey Nevid, Spencer Rathus, Hannah R. Rubenstein, 1998-01-15 A popular one semester quarter course offered at both 2 year and 4 year schools and taught by either the Health Sciences division or the Physical Education department This is a survey of various health related topics such as nutrition exercise sexuality substance abuse disease etc usually with an emphasis on applying the concepts to students own lives **Radiation Survival** Victor Healey, AI, 2025-02-15 Radiation

Survival is a comprehensive guide addressing the critical need to understand and prepare for nuclear events including radiation exposure and radioactive contamination It transcends mere disaster scenarios offering insights into everyday radiation risks and empowering readers with actionable knowledge The book uniquely blends scientific understanding with

practical survival strategies emphasizing that informed preparation is crucial in mitigating the dangers of radiation This book delves into the science of radiation covering its types and effects on the human body It then progresses to preparedness measures such as shelter construction and emergency planning Finally it outlines survival tactics for navigating fallout zones and decontaminating environments Drawing from historical events like Chernobyl and Hiroshima as well as data from organizations like WHO the book ensures accessibility by avoiding technical jargon and focusing on clear concise explanations The book is structured in three parts starting with introducing the science of radiation The second part focuses on preparedness and the third part addresses survival in a contaminated environment The knowledge presented can be applied to make informed decisions about risks and protecting oneself and family in the event of a nuclear incident

Winning the Battle Against Prostate Cancer Gerald Chodak, 2010-12-07 Prostate cancer is the second most common cancer in men with almost 200 000 new cases being diagnosed each year Today increasing numbers of men and their families play a more active role in their treatment and the results can be seen in the increase of men who survive prostate cancer Yet each year over 27 000 men die from prostate cancer This makes prostate cancer the second leading cause of cancer death in men behind lung cancer The range of controversial therapies and treatments for prostate cancer is greater than that of any other cancer affecting men This makes it difficult for men and their families to determine what are the best options available Rarely do doctors agree on which treatment a patient should receive or when they should receive it And many of the current books on prostate cancer suffer from considerable bias promoting one treatment over another without good scientific evidence *Winning the Battle Against Prostate Cancer* resolves the problem of contradictory and incomplete information The book is an unbiased and up to date look at prostate cancer treatments and therapies Dr Chodak lays out the pros and cons of all reasonable treatment options including the chances that a man may have a good result or develop side effects or complications Equally important Dr Chodak recognizes that men and their families need more than just the facts They are concerned not only with their survival but also what life will be like after treatment *Winning the Battle Against Prostate Cancer* offers empathetic insight into the impact of the disease on day to day activities so that patients and family members have a clear understanding of what lies ahead and what options are available should complications arise The book does not gloss over the controversies but presents them in a clear concise easy to understand manner

Patient Centered Care in Medical Imaging and Radiotherapy Aarthi Ramlaul, Martin Vosper, 2013-03-26 Health investigation and treatment have moved from a clinician centred approach to a patient centred approach during the past few decades Patients are now rightly regarded as empowered and informed users of health services not passive recipients Motivated by this philosophical shift this new book identifies the key issues underpinning the complete delivery of good patient care and considers their application in the medical radiation sciences Taking a UK European perspective the authors examine how a

holistic approach is related to legislation human rights and perceived patient needs Medical imaging and radiotherapy are front line services experienced by vast numbers of patients with acute and chronic medical conditions including trauma and cancer The book includes coverage of behavioural science and health psychology together with practical applications such as safe manual handling infection control and radiation safety This provides the reader with a comprehensive understanding of what contributes to the patient s experience in diagnostic imaging and radiotherapy It also considers other aspects of the patient experience such as inter professional team working disability communication clinical procedures and practice Identifies the key issues underpinning the complete delivery of good patient care and considers their application in the medical radiation sciences Takes a UK European perspective Covers behavioural science and health psychology together with practical applications such as safe manual handling infection control and radiation safety Considers all aspects of the patient experience including communication clinical procedures and practice
