Radio In Search Of Excellence Lessons From Americas Bestrun Radio Stations:

Radio in Search of Excellence ,1985 **Encyclopedia of Radio 3-Volume Set** Christopher H. Sterling,2004-03
Produced in association with the Museum of Broadcast Communications in Chicago the Encyclopedia of Radio includes more than 600 entries covering major countries and regions of the world as well as specific programs and people networks and organizations regulation and policies audience research and radio s technology This encyclopedic work will be the first broadly conceived reference source on a medium that is now nearly eighty years old with essays that provide essential information on the subject as well as comment on the significance of the particular person organization or topic being examined **The Concise Encyclopedia of American Radio** Christopher H. Sterling,Cary O'Dell,2010-04-12 The Concise Encyclopedia of American Radio is an essential single volume reference guide to this vital and evolving medium Comprised of more than 300 entries spanning the invention of radio to the Internet this refernce work addresses personalities music genres regulations technology programming and stations the golden age of radio and other topics relating to radio broadcasting throughout its history The entries are updated throughout and the volume includes nine new entries on topics ranging from podcasting to the decline of radio ***Routledge Revivals: Radio Broadcasting from 1920 to 1990 (1991)*** Diane Foxhill Carothers,2016-11-10 First published in 1991 this book presents a comprehensive annotated bibliography of radio broadcasting Its eleven chapter categories cover almost the entire range of radio broadcasting with the exception of radio engineering due to its technical complexity although some of the historical volumes do encompass aspects thus providing background material Entries are primarily restricted to published books although a number of trade journals and periodicals are also included Each entry includes full bibliographic information including the ISBN or ISSN where available and an annotation written by the author with the original text in hand **Future Radio Programming Strategies** David MacFarland,2013-10-18 Fundamental beliefs is what the reader will be exploring here a common understanding of what the radio enterprise should be about entertainment and information A major thrust of this book is to arrive at a set of fundamental beliefs about the values and realities of the radio business in regard to entertainment programming a set of beliefs that may or may not be right true or forever but that might at least provide a basis for developing programming strategies This second edition of Future Radio Programming Strategies seeks to answer the question What do listeners really want from radio Some of the answers are derived from users and gratifications research in the mass media Instead of focusing on what mass media do to people the users and gratifications perspective seeks to discover what people do with mass media The functionalist viewpoint of such research basically says that a medium is best defined by how people use it Having looked at some of the audience research that comes from sources other than the standard ratings companies the book then goes on to demonstrate new ways that formats production procedures and announcing styles can meet audience needs and desires Although the volume concludes with several original methods for selecting and presenting airplay music based

on the audience's moods and emotional needs it does not insist upon a singular formulaic approach for constructing or modifying a music format. Instead it attempts to involve the reader in thinking through the process of format development. Two audio tapes are also available for use with the book. The tapes contain nearly 3 hours of important detailed information and provocative points from the book. Exclusive audio examples include the sense of acoustic space in music hi fi versus lo fi listening environments, subjective perception of the announcer's distance from the listener, audio editing rates, comparison of luxury versus inexpensive car listening experiences and the components of emotions that are expressed vocally. The tapes also include new sections about the threats to traditional radio from specialized digital audio services, competition for the listener's attention from computer based media and additional proof of how music can be chosen on the basis of listeners' emotional reactions and mood needs.
