Rails A Guide To The Rails Crakes Gallinules And Coots Of The World

H. Lee Jones

Rails A Guide To The Rails Crakes Gallinules And Coots Of The World:

Rails Barry Taylor, 2010-08-30 This is a guide to rails a relatively homogeneous family of birds spread throughout the world Barry Taylor and Ber van Perlo have described and illustrated 145 species of rails including two that are newly described and also ten that are recently extinct and two that are almost certainly extinct The book based on up to date references and on new observations is the first to give comprehensive information on field identification including voice covering all species and races for which details are known It is also the first to provide descriptions of the immature and juvenile plumages of many species The authors provide a detailed summary of current knowledge of all aspects of rail biology and their often complex behaviour social structure and family life They explain how such apparently poorly flying birds can undertake intercontinental migrations and are such widespread and successful colonists of remote oceanic islands They also discuss the remarkable ease and speed with which species on such islands have evolved into flightless forms in the absence of predators a fact that has led to the rapid extinction of numerous island taxa following the arrival of man Rail habitats are fast disappearing say the authors and many rails become endangered before enough is known about them to plan effective conservation measures The book provides information on distribution status habitat requirements and current threats and it gives conservation priorities for threatened species

Birds of Belize H. Lee Jones, 2010-03-01 Fills a major gap in the bird identification literature A must for birders planning a trip to this friendly patch of Central America The Curious Naturalist With nearly six hundred identified species of birds and an average of five new species discovered annually Belize is becoming a birding hotspot for amateur and professional birders from around the globe Thousands of birders visit the country each year to enjoy Belize s amazing abundance and variety of both temperate and tropical birds in natural habitats that remain largely unspoiled But until now despite the growing need for an authoritative identification guide birders have had to rely on regional field guides that offer only limited information on Belizean birds Birds of Belize provides the first complete guide to the identification of all currently known species 574 in all The birds are grouped by families with an introduction to each family that highlights its uniquely identifying characteristics and behaviors The species accounts include all the details necessary for field identification scientific and common names size plumage features thorough voice descriptions habitat distribution and status in Belize Full color expertly drawn illustrations by noted bird artist Dana Gardner present male and female juvenile and adult and basic and alternate plumages to aid visual identification throughout the year while 234 range maps show the birds distribution and seasonality in Belize A comprehensive bibliography completes the volume A first class book that will enable users to identify any bird they encounter in Belize Victor Emanuel President Victor Emanuel Nature Tours

Systematics and Taxonomy of Australian Birds Les Christidis, Walter Boles, 2008 Lists all those species of birds that have been recorded from the Australian mainland Tasmania island territories and surrounding waters Based on the authors original book The Taxonomy and Species of Birds of Australia and its Territories it includes any new species for

which records have been accepted by the Records Appraisal Committee of Birds Australia It also includes all extant and recently extinct post 1800 native species as well as new species accepted vagrants and introduced species that have become established and continue to survive in the wild Birds of New Guinea Thane K. Pratt, Bruce M. Beehler, Bruce McP. Beehler, 2015 Previous edition by Bruce M Beehler Thane K Pratt and Dale A Zimmerman **National Geographic Complete Birds of North America** Jonathan K. Alderfer, Jon Lloyd Dunn, National Geographic Society (U.S.), 2014 Companion to National Geographic field guide to the birds of North America Cover **Extinction and Biogeography of Tropical Pacific Birds** David W. Steadman, 2006-10-15 Publisher Description *Biogeography* C. Barry Cox, Peter D. Moore, Richard J. Ladle, 2016-05-31 Through eight successful editions and over nearly 40 years *Biogeography An Ecological and Evolutionary Approach* has provided a thorough and comprehensive exploration of the varied scientific disciplines and research that are essential to understanding the subject The text has been praised for its solid background in historical biogeography and basic biology that is enhanced and illuminated by discussions of current research This new edition incorporates the exciting changes of the recent years and presents a thoughtful exploration of the research and controversies that have transformed our understanding of the biogeography of the world It also clearly identifies the three quite different arenas of biogeographical research continental biogeography island biogeography and marine biogeography It is the only current textbook with full coverage of marine biogeography It reveals how the patterns of life that we see today have been created by the two great Engines of the Planet the Geological Engine plate tectonics which alters the conditions of life on the planet and the Biological Engine evolution which responds to these changes by creating new forms and patterns of life

and hunters **The Birds of Africa: Volume VIII** Roger Safford, Frank Hawkins, 2020-09-17 Universally recognised as by far the most authoritative work ever published on the subject The Birds of Africa is a superb multi contributor reference work with encyclopaedic species texts stunning paintings of all species and numerous subspecies informative line drawings detailed range maps and extensive bibliographies Each volume contains an Introduction that brings the reader up to date with the latest developments in African ornithology including the evolution and biogeography of African birds Diagnoses of the families and genera often with superspecies maps are followed by the comprehensive species accounts themselves These include descriptions of range and status field characters voice general habits food and breeding habits Full bibliographies acoustic references and indexes complete this scholarly work of reference This eighth and final volume covers the Malagasy region which comprises Madagascar and the various islands and archipelagos of the Indian Ocean including the Seychelles the Comoros Mauritius and Reunion Every resident and migrant species is covered in full detail comparable to other volumes in the series and with a colour map for each species Vagrants are treated in less detail All species are illustrated on a beautiful series of 64 colour plates with original artwork from John Gale and Brian Small This is a major work of reference on the birds of the region and will remain the standard text for many years to come Invasive Birds Colleen T. Downs, Lorinda A. Hart, 2020-12-07 Examining globally invasive alien birds the first part of this book provides an account of 32 global avian invasive species as listed by the Invasive Species Specialist Group ISSG It acts as a one stop reference volume it assesses current invasive status for each bird species including details of physical description diet introduction and invasion pathways breeding behaviour natural habitat It also looks at the environmental impact of each species as well as current and future control methods Full colour photographs assist with species identification and global distribution maps give a visual representation of the current known distributions of these species The second part of the book discusses the biogeographical aspects of avian invasions highlighting current and emerging invasive species across different regions of the world The third section considers the impact of invasive species on native communities problems associated with invasive bird management and the use of citizen science in the study of invasive birds Lagoa Santa Karst: Brazil's Iconic Karst Region Augusto S. Auler, Paulo Pessoa, 2020-01-22 This book discusses the Lagoa Santa Karst which has been internationally known since the pioneering studies of the Danish naturalist Peter Lund in the early 1800s It covers the speleogenesis geology vegetation fauna hydrogeology geomorphology and anthropogenic use of the Lagoa Santa Karst and is the first English language book on this major karst area The area which has been at the heart of the debate on the origin and age of human colonization in the Americas is characterized by a classical and scenic karst landscape with limestone cliffs karst lakes and karst plains in addition to numerous solution dolines More than 1 000 caves have been documented in the area many with significant archeological and paleontological value Despite its great importance the Lagoa Santa Karst faces severe environmental threats due to limestone mining and the expansion of the metropolis of Belo Horizonte and its surrounding towns The

growing recognition of the area's remarkable significance has led to increasing concern and a number of protected areas have now been established improving the conservation status of this landmark karst area

Lost Land of the Dodo

Anthony Cheke, Julian P. Hume, 2009-01-01 The Mascarene islands in the southern Indian Ocean Mauritius Reunion and Rodrigues were once home to an extraordinary range of birds and reptiles Evolving on these isolated volcanic islands in the absence of mammalian predators or competitors the land was dominated by giant tortoises parrots skinks and geckos burrowing boas flightless rails the birds and tortoises were slaughtered indiscriminately while introduced rats cats pigs and monkeys destroyed their eggs the once extensive forests logged and invasive introduced plants from all over the tropics devastated the ecosystem The now familiar icon of extinction the Dodo was gone from Mauritius within 50 years of human settlement and over the next 150 years many of the Mascarenes other native vertebrates followed suit The product of over 30 years research by Anthony Cheke Lost Land of the Dodo provides a comprehensive yet hugely enjoyable account of the story of the islands changing ecology interspersed with human stories the islands biogeographical anomalies and much else Many French publications old and new especially for Reunion are discussed and referenced in English for the first time The book is richly illustrated with maps and contemporary illustrations of the animals and their environment many of which have rarely been reprinted before Illustrated box texts look in detail at each extinct vertebrate species while Julian Hume's superb colour plates bring many of the extinct birds to life Lost Land of the Dodo provides the definitive account of this tragic yet remarkable fauna and is a must read for anyone interested in islands their ecology and the history of our relationship with the world around us

Charles Darwin's Life With Birds

Clifford B. Frith, 2016-06-01 Much of Charles Darwin's groundbreaking work as an evolutionary biologist stemmed from his study of birds It is universally acknowledged that Darwin's observation of bird groups and species like the Galapagos finches mockingbirds and rock doves was critical to the development of his theories on natural selection evolution and sexual selection The significant number of diverse birds that Darwin covered in his published works represents a most substantial ornithological contribution His major books alone contain reference to and consideration of almost 500 bird species as well as interesting and pertinent discussion of over 100 ornithological topics Charles Darwin's Birds is a comprehensive treatment

of Darwin's work as an ornithologist Clifford Frith discusses every ornithological topic and bird species that Darwin researched providing a complete historical survey of his published writing on birds Through this we learn how Darwin became an increasingly skilled and eventually exceptional ornithologist and how his relationships grew with contemporary scientists like John Gould It examines how Darwin was influenced by birds and how the major themes of his research developed through his study of them The book also features 4 appendices which contain brief accounts of every bird species Darwin wrote about basic ornithological information about each of the species and a listing of where the species appears in Darwin's work

Birds of Venezuela Steven L. Hilty, 2003 Detailed range maps plot collection localities and sight records a unique feature for almost all species Plumage descriptions are provided for each bird as is extensive information on voice behavior and status More than 800 bibliographic entries accompany the text making this book an invaluable and broad based reference to the avifauna of not only Venezuela but much of northern South America Treating nearly 40 percent of the continent's bird species *Birds of Venezuela* is the definitive resource for all birders with an eager eye on this splendid country and the surrounding region

BOOK JACKET Outer Continental Shelf Oil & Gas Leasing Program : 2002-2007, 2002 Outer Continental Shelf Oil & Gas Leasing Program : 2007-2012, 2006

Bird Coloration Geoffrey E. Hill, Kevin J. McGraw, 2006-03 In this sumptuously illustrated companion volume to *Bird Coloration Volume 1 Mechanisms and Measurements* the authors explain the function of the colorful displays of birds and examine the factors that shape the evolution of color signals

The Structure and Dynamics of Geographic Ranges Kevin J. Gaston, 2003-05-01 No species occurs everywhere Indeed the majority are absent from most places and where they do occur they are usually quite rare Gaston discusses the structure of these distributions the structure of the geographic ranges of species Gaston is particularly concerned with the factors that determine the limits to a species geographic range how the sizes of those ranges vary and patterns in that variation Also considered are the distribution of individuals amongst those sites where a species does occur and what determines that distribution and some of the practical implications of all these Both in a pure and applied context ecologists need a broader perspective on their subject matter than has historically prevailed This book provides one such perspective A must have book for any researchers and graduate students studying macroecology biogeography and conservation biology
