Emsley, 1979 **Tropical Montane Cloud Forests** Lawrence S. Hamilton, James O. Juvik, F. N. Scatena, 2012-12-06 Until relatively recently the valuable tropical montane cloud forests hereafter usually referred to as TMCFs of the world had scarcely come under the assaults experienced by the downslope montane and lowland forests TMCFs are not hospitable environments for human occupation and their remoteness except in places near Andean high mountain settlements and in the Ethiopian Highlands and difficult terrain have given them de facto protection The adjacent upper montane rain forests have indeed been under assault for timber fuelwood and for conversion to grazing and agriculture for many decades even centuries in the Andes but true cloud forest has only come under exploitation as these lower elevational resources have disappeared They have also been nibbled at from above where there have been alpine grasslands under grazing pressure Increasingly now however these cloud forest eco systems are being fragmented reduced and disturbed at an alarming rate It is now becoming recognized that steps must be taken rapidly to increase our understanding of TMCF and to achieve their conservation because their water capture function is extremely important to society their species endemism is high they serve as refugia for endangered species being marginalized in these environments by increasingly transformed lower elevation ecosystems they are relatively little studied yet their value to science is extremely high they have low resilience to disturbance vii viii Preface and many other reasons which will be discussed subsequently in this publication **Tropical montane cloud forests** Lawrence S. Hamilton, James O. Juvik, F. N. Scatena, 1995 **Forest in the Clouds** Sneed B. Collard, 2000 Describes some of the exotic plants and animals that live in the cloud forest of Costa Rica and discusses some environmental threats faced by this region *Monteverde* Nalini M.
