Philosophy And Personality:

The Authentic Self Walter LaCentra, 1987 This study contends that an adequate theory of personal growth should be based upon a human striving for authenticity a striving revealed as a dynamic process of self transcendence operating on three different levels intellectual moral and religious Just as the act of questioning propels man toward ever newer horizons of wisdom so also does human and divine love explain the fullness of authentic moral and religious development Bernard Lonergan's insights into personal development are used to critically evaluate specific aspects of the psychologies of personality developed by Freud Adler and Maslow The Philosophy of Personality Radhakamal 1889-1968 Mukerjee, 2021-09-09 This work has been selected by scholars as being culturally important and is part of the knowledge base of civilization as we know it This work is in the public domain in the United States of America and possibly other nations Within the United States you may freely copy and distribute this work as no entity individual or corporate has a copyright on the body of the work Scholars believe and we concur that this work is important enough to be preserved reproduced and made generally available to the public To ensure a quality reading experience this work has been proofread and republished using a format that seamlessly blends the original graphical elements with text in an easy to read typeface We appreciate your support of the preservation process and thank you for being an important part of keeping this knowledge alive and relevant **A Philosophy of Science for Personality Theory** Joseph F. Rychlak, 1990 **Mind and Personality** William Brown, 1927 **From Personality to Virtue** Alberto Masala, Jonathan Mark Webber, 2016 Ten new essays illuminate the idea of character in relation to the findings of psychology and draw out the implications for our moral interactions education responsibility and punishment They explore the dynamic nature of character its close integration with social context and the conceptual affinity of moral philosophy and social psychology *An Essay on Personality as a Philosophical Principle* Wilfrid Richmond, 2015-06-25 Excerpt from An Essay on Personality as a Philosophical Principle The following essay is intended to illustrate a philosophical principle not to establish a philosophical conclusion The only legitimate principle of philosophy is experience of which philosophy professes to be the interpretation But it is rash to assume that we know what we mean by experience without explicit statement and discussion Some particular aspect of experience we are each of us sure to emphasize It is well to describe clearly the aspect under which we are disposed to assert that experience should prim facie be viewed This will be the philosophical principle If the principle or the aspect of experience which we wish to present happens to involve differences from the views commonly assumed in philosophical literature this full and free description of the point of view at starting is the more necessary In any case an hypothesis must be entertained before it can be proved and it must be stated before it can be entertained And a philosophical principle is such an hypothesis About the Publisher Forgotten Books publishes hundreds of thousands of rare and classic books Find more at www.forgottenbooks.com This book is a reproduction of an important historical work Forgotten Books uses state of the art technology to digitally reconstruct the

Professional Philosophy and Its Myths Rebekah Spera, David M. Peña-Guzmán, 2024-12-16 In *Professional Philosophy and Its Myths* Rebekah Spera and David M. Peña-Guzmán argue that academic philosophy is steeped in a host of myths that keep professional philosophers in a state of self ignorance Understood as unconscious schemas that shape philosophers collective imaginary these myths perform a dangerous ideological function within the discipline Not only do they contribute to the overwhelming demographic homogeneity of the profession ensuring that philosophy remains a holdout of white and male dominance but they also prevent philosophers from seeing themselves as workers who like all workers who sell their labor for a wage under capital are subject to alienation exploitation and oppression After outlining and critiquing these myths Spera and Peña-Guzmán call upon philosophers to collectively invent new myths that will enrich rather than impoverish their psychic and professional lives Through these new myths they argue a new philosophy a philosophy of the future will be born

The Psychology of Personhood Jack Martin, Mark H. Bickhard, 2012-11-29 What is a person Surprisingly little attention is given to this question in psychology For much of the past century psychology has tended to focus on the systematic study of processes rather than on the persons who enact and embody them In contrast to the reductionist picture of much mainstream theorising which construes persons as their mental lives behaviours or neurophysiological particulars *The Psychology of Personhood* presents persons as irreducibly embodied and socially situated beings Placing the study of persons at the centre of psychology this book presents novel insights on the typical everyday actions and experiences of persons in relation to each other and to the broader society and culture Leading scholars from diverse academic disciplines paint an integrative portrait of the psychological person within evolutionary historical cultural developmental and everyday contexts

Philosophy Within Its Proper Bounds Edouard Machery, 2017-07-26 In *Philosophy Within Its Proper Bounds* Edouard Machery argues that resolving many traditional and contemporary philosophical issues is beyond our epistemic reach and that philosophy should reorient itself toward more humble but ultimately more important intellectual endeavors. Any resolution to many of these contemporary issues would require an epistemic access to metaphysical possibilities and necessities which Machery argues we do not have. In effect then *Philosophy Within Its Proper Bounds* defends a form of modal skepticism. The book assesses the main philosophical method for acquiring the modal knowledge that the resolution of modally immodest philosophical issues turns on the method of cases that is the consideration of actual or hypothetical situations which cases or thought experiments describe in order to determine what facts hold in these situations. Canvassing the extensive work done by experimental philosophers over the last 15 years Edouard Machery shows that the method of cases is unreliable and should be rejected. Importantly the dismissal of modally immodest philosophical issues is no cause for despair many important philosophical issues remain within our epistemic reach. In particular reorienting the course of philosophy would free time and resources for bringing back to prominence a once central intellectual endeavor: conceptual analysis.

SHARED IDENTITY AND PHILOSOPHICAL HERITAGE: THE HISTORY OF THOUGHT IN TURKIC CULTURE MAHIRA HUSEYNOVA, ELVIN TALISHINSKY, BAHA AHMET YILMAZ, FERAHILA BABAYEVA-SHUKUROVA, SHAHISMAYIL ISMAYILOV, CIHANGIR ISHBILIR, 2025-08-25 The history of world philosophical thought is mainly based on the study and presentation of the development path of Western philosophy. There is an objective reality here. Because in Europe philosophy emerged at the level of science even before our era and developed at a great speed. The famous Plato Academy which operated in Ancient Greece played an important role in the history of world philosophical thought. The names and services of Socrates who is considered the teacher of Western philosophy and Aristotle whom Plato's Academy gave to humanity are famous in the world. For many years Aristotle has been considered the most powerful representative of world philosophical thought. The foundations of the vast majority of scientific fields that exist in the modern world today were laid by Aristotle. In the Middle Ages and later periods Western philosophy also had world renowned philosophers such as Georg Hegel, Immanuel Kant, Friedrich Nietzsche and others. Along with all this philosophical thought in the Turkic world has emerged since ancient times and has undergone its own unique development. However for several reasons the study and teaching and even the promotion of Turkish philosophical thought has remained in the background. First of all since Turkish philosophical thought in ancient times arose and developed mainly through oral folk literature and folklore examples are rightly considered examples of fiction it has not been studied from a philosophical perspective for a long time. In my opinion in the light of independence there is a sufficiently rich material for conducting research on philosophical thought in the oral folk literature of each of the Turkic peoples and writing monographs. Secondly the socio political and philosophical movements of the Turkic

peoples in ancient times and the Middle Ages were largely criticized and not included in the scope of scientific research during the Soviet era which was a strictly atheist society because they were of a religious nature. Movements such as Hurufism and Sufism which had been active for a long time in the Middle Ages were generally considered religious mystical teachings and presented as reactionary movements outside the scientific circulation. Thirdly, since the concept of national philosophy was limited during the Soviet period and only the direction of forming a unified Soviet socio-philosophical thought was considered a priority, the history of philosophical thought of the Turkic peoples was not even remembered. Only since the eighties of the 20th century have efforts been made to bring the history of philosophical thought of individual Turkic peoples including Azerbaijan to the agenda. In any case, the department of History of Azerbaijani Philosophical Thought is one of the relatively young scientific institutions of the Institute of Philosophy and Sociology of ANAS. As is known, since the period of independence along with the history of world philosophical thought, a certain revival has been observed in the field of studying the path of development of the philosophical thought of the Turkic peoples. However, this process has been developed over the past thirty years with the expansion of the tendency to study the history of philosophical thought of each of the Turkic peoples separately. Thus, dissertations, monographs, and articles dedicated to the history of philosophical thought of the Turkic, Uzbek, Kazakh, Kyrgyz, Turkmen peoples, as well as the history of philosophical thought of Azerbaijan or the scientific heritage of those who created philosophy in those peoples, have begun to appear mainly since the period of independence. This in turn has brought to mind the necessity of the emergence of the concepts of the history of all Turkic philosophical thought or Turkish philosophy.

Personal Identity between Philosophy and Psychology Vinicio Busacchi, Giuseppe Martini, 2020-12-24. What is personal identity? What forms its nature? Is there a difference between identity and personality? What makes a person an individual and what exactly is the person? What role is played by character, nature, environment, society, values, and destiny in defining and substantiating a personal identity? The dialectics of different disciplinary approaches and knowledges, as well as different theoretical, speculative perspectives and traditions, can be more productive in deepening and readdressing problems concerning human identity. It is by following this line of reasoning that this book analyses and discusses the above questions from the dialectical perspective of psychoanalysis, psychiatry, and philosophy. It offers a new point of departure for theoretical, scientific, and speculative advancement. The book also reconsiders the fundamental characteristics of a dynamic and hermeneutic vision of identity, tracing a middle way perspective and at the same time absorbing Wilfred Bion's idea of transformation and Paul Ricoeur's philosophy of translation.
