

Philosophy Of Enlightenment

John Grier Hibben

Philosophy Of Enlightenment:

The Philosophy of the Enlightenment Ernst Cassirer, 1951 The present book aims to be both more and less than a monograph on the philosophy of the Enlightenment It is much less for the primary task of such monograph would be to offer the reader a wealth of detail and to trace the genesis and development of all the special problems of this philosophy

Descartes and the Enlightenment Peter A. Schouls, 1989 Peter Schouls examines the role played by the concepts of freedom mastery and progress in Descartes writings arguing that these ideas express a vital and fundamental feature of Descartes thought These theories also occupy a central position in the thought of the Enlightenment Since the more contentious claim is that they function centrally in Descartes works Schouls presents a careful and detailed examination of the conjunction and use of these ideas in Descartes writings This examination warrants the conclusion that they play the same role in Descartes works as they do in writings typical of the Enlightenment *An Answer to the Question* Immanuel Kant, 2009 First published in 1784 Kant's immortal essay is now a part of the Penguin Great Ideas series This series is ideal for readers who want to explore and savor the Great Ideas that have shaped our world The Philosophy of the Enlightenment John Grier Hibben, 1910 **The Enlightenment** John Robertson, 2015 This Very Short Introduction explores the history of the 18th century Enlightenment movement Considering its intellectual commitments Robertson then turns to their impact on society and the ways in which Enlightenment thinkers sought to further the goal of human betterment by promoting economic improvement and civil and political justice *The Philosophy of the Enlightenment* John Hibben, 2017-04-11 THE age of the Enlightenment has a peculiar interest and value for the student of the history of philosophy The philosophical output of this period is unusually rich and significant embracing as it does the classical writings of Locke Berkeley Hume Leibniz Rousseau and Kant and therefore may well be studied for the material which these separate contributions severally contain But more than this the eighteenth century philosophy is a period in which a great movement of thought is exhibited and that too on a large and conspicuous stage England France Germany form its settings It begins with Locke and is completed in Kant And whatever significance Kant may possess for the philosophical world to day attaches also to this period for this period served to open the way for the critical philosophy of the great master which is its appropriate culmination Moreover the practical influences of the philosophical discussions of this age are of such extent and importance as to engage the attention of the ordinary reader of history as well as that of the more special worker in the field of philosophy In England religious controversy political theory and moral standards were profoundly affected by the philosophical tendencies of the day in France the social and political doctrines became involved with the philosophical and they were not without a dominating influence upon the popular mind not only throughout the period preceding the French Revolution but also during the years of its progress as well in Germany the same tendencies manifested themselves in theological controversy on the one hand and in the quickening of poetical insight and interpretation on the other so that

poets became philosophers and philosophers became poets The movement of philosophical thought in this age moreover is typical of great movements of thought generally and in this aspect is both illuminating and suggestive as a representative historical study The tendencies which here prevail the characteristic differences in point of view as well as the complementary relation of opposed opinions are all repeated again and again in the various political social religious moral and philosophical controversies which emerge through every significant period in the history of thought

What is Enlightenment? Samuel Fleischacker, 2013 Have the courage to use your own understanding that is the motto of enlightenment Immanuel Kant The Enlightenment is one of the most important and contested periods in the history of philosophy The problems it addressed such as the proper extent of individual freedom and the challenging of tradition resonate as much today as when they were first debated Of all philosophers it is arguably Kant who took such questions most seriously addressing them above all in his celebrated short essay *An Answer to the Question What is Enlightenment* In this engaging and lucid book Samuel Fleischacker first explains and assesses Kant's philosophy of Enlightenment He then considers critics of Kant's views from Burke and Hegel to Horkheimer and Adorno and figures he regards as having extended Kant's notion of enlightenment such as Feuerbach Marx Habermas Foucault and Rawls Throughout he demonstrates how Kant holds two distinct theories of enlightenment On the one hand Kant proposes a minimal view where to be enlightened is simply to engage in critical public discussion allowing diversity of opinion to flourish On the other he argues that Kant elsewhere calls for a maximal view of enlightenment where for example an enlightened person cannot believe in a traditional religion With great skill Fleischacker shows how these two views are taken in a multitude of directions by both critics and advocates of Kant's philosophy Arguing that Kant's minimal enlightenment is a precondition for a healthy proliferation of cultures religious faiths and political movements *What is Enlightenment* is a fascinating introduction to a key aspect of Kant's thought and a compelling analysis of philosophical thinking about the Enlightenment Including helpful chapter summaries and guides to further reading it is ideal for anyone studying Kant or the philosophy of the Enlightenment as well as those in related disciplines such as politics history and religious studies

Enlightenment Contested Jonathan I. Israel, 2006-10-12 This is a managerial survey and reinterpretation of the Enlightenment The text offers an assessment of the nature and development of the important currents in philosophical thinking arguing that supposed national enlightenments are of less significance than the rift between conservative and radical thought

Radical Enlightenment Jonathan Irvine Israel, 2001 Readership Readers with an interest in the European Enlightenment intellectual and cultural historians scholars and students of philosophy
