Philosophy, Technology, and the Environment David M. Kaplan, 2017-03-03 Contributions by prominent scholars examining the intersections of environmental philosophy and philosophy of technology Environmental philosophy and philosophy of technology have taken divergent paths despite their common interest in examining human modification of the natural world Yet philosophers from each field have a lot to contribute to the other Environmental issues inevitably involve technologies and technologies inevitably have environmental impacts In this book prominent scholars from both fields illuminate the intersections of environmental philosophy and philosophy of technology offering the beginnings of a rich new hybrid discourse All the contributors share the intuition that technology and the environment overlap in ways that are relevant in both philosophical and practical terms They consider such issues as the limits of technological interventions in the natural world whether a concern for the environment can be designed into things how consumerism relates us to artifacts and environments and how food and animal agriculture raise questions about both culture and nature They discuss among other topics the pessimism and dystopianism shared by environmentalists environmental philosophers and philosophers of technology the ethics of geoengineering and climate change the biological analogy at the heart of industrial ecology green products and sustainable design and agriculture as a bridge between technology and the environment Contributors Braden Allenby Raymond Anthony Philip Brey J Baird Callicott Brett Clark Wyatt Galusky Ryan Gunderson Benjamin Hale Clare Heyward Don Idhe Mark Sagoff Julian Savulescu Paul B Thompson Ibo van de Poel Zhang Wei Kyle Powys Whyte

Reflections on Technology for Educational Practitioners John R. Dakers, Jonas Hallström, Marc J. de Vries, 2020-03-09 Reflections on Technology for Educational Practitioners analyzes the use of philosophy of technology in technology education and unpacks the concept of reflective practitioners Donald Sch n in the field Philosophy of technology develops ideas and concepts that are valuable for technology education because they show the basic characteristics of technology that are important if technology education is to present a fair image of what technology is Each chapter focuses on the oeuvre of one particular philosopher of which a description is given and then insights are offered about technology as

developed by that philosopher and how it has been fruitful for technology education in all its aspects motives for having it in the curriculum goals for technology education content of the curriculum teaching strategies knowledge types taught ways of assessing resources educational research for technology education amongst others

The Ethics of Today's Science and Technology Wenchao Li, Hans Poser, 2008 Beneath the discussion and clarification of problems of which both sides agreed to have them in common and which are documented in this volume one of the important insights on both sides had been disagreements depending on a different way in seeing articulating and reflecting on these problems So the English term science in differing from the German Wissenschaft which includes not only sciences of nature but also humanities is meant in the Western tradition as the uninterested research for truth especially for most general laws but the Chinese understanding seems to be characterized by an immediate connection of science and its practical use

American Philosophy of Technology Hans Achterhuis, 2001-07-12 Introduces contemporary American philosophy of technology through six of its leading figures The six American philosophers of technology whose work is profiled in this clear and concise introduction to the field Albert Borgmann Hubert Dreyfus Andrew Feenberg Donna Haraway Don Ihde and Langdon Winner represent a new empirical direction in the philosophical study of technology that has developed mainly in North America In place of the grand philosophical schemes of the classical generation of European philosophers of technology including Martin Heidegger Jacques Ellul and Hans Jonas the contemporary American generation addresses concrete technological practices and the co evolution of technology and society in modern culture Six Dutch philosophers associated with Twente University survey and critique the full scope and development of their American colleagues work often illustrating shifts from earlier to more recent interests Individual chapters focus on Borgmann's engagement with technology and everyday life Dreyfus's work on the limits of artificial intelligence Feenberg's perspectives on the cultural and social possibilities opened by technologies Haraway's conception of the cyborg and its attendant blurring of boundaries Ihde's explorations of the place of technology in the lifeworld and Winner's fascination with the moral and political implications of modern technologies American Philosophy of Technology offers an insightful and readable introduction to this new and distinctly American philosophical turn Contributors are Hans Achterhuis Philip Brey Ren Munnik Martijntje Smits Pieter Tijmes and Peter Paul Verbeek

Europe, America, and Technology: Philosophical Perspectives P.T. Durbin, 2012-12-06 As Europe moves toward 1992 and full economic unity and as Eastern Europe tries to find its way in the new economic order the United States hesitates Will the new European economic order be good for the U S or not Such a question is exacerbated by world wide changes in the technological order most evident in Japan's new techno economic power As might be expected philosophers have been slow to come to grips with such issues and lack of interest is compounded by different philosophical styles in different parts of the world What this volume addresses is more a matter of conflicting styles than a substantive confrontation with the real world issues But there is some attempt to be concrete The symposium on Ivan Illich with

contributions from philosophers and social critics at the Pennsylvania State University where Illich has taught for several years may suggest the old cliché of Old World vs New World Illich's fulminations against technology are often dismissed by Americans as old world style prophecy while Illich seems largely unknown in his native Europe But Albert Borgmann born in Germany though now settled in the U S shows that this old dichotomy is difficult to maintain in our technological world Borgmann's focus is on urgent technological problems that have become almost painfully evident in both Europe and America

Technology and World Politics Daniel R. McCarthy, 2017-08-03 This edited volume provides a convenient entry point to the cutting edge field of the international politics of technology in an interesting and informative manner Technology and World Politics introduces its readers to different approaches to technology in global politics through a survey of emerging fusions of Science and Technology Studies and International Relations The theoretical approaches to the subject include the Social Construction of Technology Actor Network Theory the Critical Theory of Technology and New Materialist and Posthumanist approaches Considering how such theoretical approaches can be used to analyse concrete political issues such as the politics of nuclear weapons Internet governance shipping containers the revolution in military affairs space technologies and the geopolitics of the Anthropocene the volume stresses the socially constructed and inherently political nature of technological objects Providing the theoretical background to approach the politics of technology in a sophisticated manner alongside a glossary and guide to further reading for newcomers this volume is a vital resource for both students and scholars focusing on politics and international relations

Practical Philosophy and Action Theory Timo Airaksinen, 2023-04-14 Action theory and practical philosophy have their well grounded tradition both in Finland and in Poland This text is a collection of PRACTICAL PHILOSOPHY AND ACTION THEORY Praxiology The International Annual of Practical Philosophy and Methodology Volume 2 This volume is divided into three parts the first one being so to speak a business card of Finland's contemporary practical philosophy the second one being a business card of the Poland's present praxiology and a collection of contributions from other philosophical environments related to the topics

Persuasive Technology Yvonne de Kort, Wijnand IJsselstein, Cees Midden, Berry Eggen, B.J. Fogg, 2007-11-24 This book constitutes the thoroughly refereed post proceedings of the Second International Conference on Persuasive Technology for Human Well Being PERSUASIVE 2007 held in Palo Alto CA USA in April 2007 The 37 revised full papers presented were carefully reviewed and selected from numerous submissions for inclusion in the book The papers are organized in topical sections and cover a broad range of subjects

Philosophies of Technology Claus Zittel, 2008 The essays in the present volume attempt to historically reconstruct the various dependencies of philosophical and scientific knowledge of the material and technical culture of the early modern era and to draw systematic conclusions for the writing of early modern history of science The divisive transformation of humanist scholarly culture the Scholastic school philosophy as well as magic in the form of a philosophy of practice is always associated with the work of Francis Bacon All of these essays in this volume reflect the close

interaction between technical models and knowledge production in natural philosophy natural history and epistemology It becomes clear that the technological developments of the early modern era cannot be adequately depicted in the form of a pure history of technology but rather only as part of a broader cultural history of the sciences Contributors include Todd Andrew Borlik Arianna Borrelli Thomas Brandstetter Daniel Damler Luisa Dolza Moritz Epple Berthold Heinecke Dana Jalobeanu J rgen Klein Staffan M ller Wille Romano Nanni Jarmo Pulkkinen Pablo Schneider Andr s Vaccari Benjamin Wardhaugh Sophie Weeks and Claus Zittel
