Physical Applications And Mathematical Aspects Of Geometry:

Physical Applications and Mathematical Aspects of Geometry H-D Doebner, P. Nattermann, W. Scherer, C Schulte, 1997 In the last decade the geometrisation of physics has become more and more important Group theoretical methods and related topological differential geometric and algebraic aspects have been increasingly used for the modelling and description of physical systems their understanding and their measurable properties This volume gives an overview of and a state of the art report on the different facets of geometrical modelling from quasi crystals to new formulations of quantum mechanics It contains more than 170 contributions from scientists working in physics in mathematics and in other fields Among the contributors are H Fritzsche W Greiner V Kac J Louck G Marmo R Moody P Olver L O Raifeartaigh and P Van Moerbeke Group 21 Heinz Dietrich Doebner, 1997 **Classical And Quantum Nonlocality: Proceedings Of The 16th Course Of The International School Of Cosmology And Gravitation** P G Bergmann, Venzo De Sabbata, Joshua N Goldberg, 2000-08-21 This book provides an up to date understanding of the progress and current problems of the interplay of nonlocality in the classical theories of gravitation and quantum theory These problems lie on the border between general relativity and quantum physics including quantum gravity *Einstein Equations: Physical and Mathematical Aspects of General Relativity* Sergio Cacciatori, Batu Güneysu, Stefano Pigola, 2019-11-23 This book is based on lectures given at the first edition of the Domoschool the International Alpine School in Mathematics and Physics held in Domodossola Italy in July 2018 It is divided into two parts Part I consists of four sets of lecture notes These are extended versions of lectures given at the Domoschool written by well known experts in mathematics and physics related to General Relativity Part II collects talks by selected participants focusing on research related to General Relativity *Classical and Quantum Nonlocality* J. N. Goldberg, 2000 This book provides an up to date understanding of the progress and current problems of the interplay of nonlocality in the classical theories of gravitation and quantum theory These problems lie on the border between general relativity and quantum physics including quantum gravity *Nonlinearity, Integrability And All That: Twenty Years After Needs '79 - Proceedings Of The Workshop* M Boiti, Luigi Martina, F Pempinelli, Barbara Prinari, Giulio Soliani, 2000-05-12 This book discusses achievements in the last 20 years recent developments and future perspectives in nonlinear science Both continuous and discrete systems classical and quantum are considered **Quantum Theory And Symmetries, Proceedings Of The 3rd International Symposium** Philip C Argyres, Joseph J G Scanio, Peter Suranyi, L C Rohana Wijewardhana, Freydoon Mansouri, Timothy J Hodges, 2004-10-08 The book contains the text of lectures given at the third of a series of biennial symposia in mathematical physics held in odd numbered years The subject of the symposium is the frontiers of mathematical physics It deals with quantum phenomena and includes topics such as string theory and quantum gravity particle physics and field theory non commutative geometry integrable models and infinite dimensional symmetry groups quantum computing and information processing and quantum chaos The proceedings have been selected for coverage in
