Pima Bajo Of Central Sonora Mexico Volume Ii:

Ancient Road Networks and Settlement Hierarchies in the New World Charles D. Trombold, 1991-11-28 The presence of ancient road networks in the New World is a puzzle because they predate the use of wheeled transport vehicles. But whatever their diverse functions may have been they remain the only tangible indication of how extinct American societies were regionally organised. Contributors to this volume originally published in 1991 describe past studies of prehispanic roads in the southwestern United States, Mexico, Central and South America, paying special attention to their significance for economic and political organisation as well as regional communication.

The Sonoran Desert Tortoise Thomas R. Van Devender, 2019-04-15 One of the most recognizable animals of the Southwest, the desert tortoise *Gopherus agassizii* makes its home in both the Sonoran and Mohave Deserts as well as in tropical areas to the south in Mexico. Called by Tohono O'odham people *komik c ed* or shell with living thing inside, it is one of the few desert creatures kept as a domestic pet as well as one of the most studied reptiles in the world. Most of our knowledge of desert tortoises comes from studies of Mohave Desert populations in California and Nevada. However, the ecology, physiology, and behavior of these northern populations are quite different from those of their southern Sonoran Desert and tropical cousins, which have been studied much less. Differences in climate and habitat have shaped the evolution of three races of desert tortoises as they have adapted to changes in heat, rainfall, and sources of food and shelter as the deserts developed in the last ten million years. This book presents the first comprehensive summary of the natural history, biology, and conservation of the Sonoran and Sinaloan desert tortoises, reviewing the current state of knowledge of these creatures with appropriate comparisons to Mohave tortoises. It condenses a vast amount of information on population ecology, activity, and behavior based on decades of studying tortoise populations in Arizona and Sonora, Mexico, and also includes important material on the care and protection of tortoises. Thirty-two contributors address such topics as tortoise fossil records, DNA analysis, and the mystery of secretive hatchlings and juveniles. Tortoise health is discussed in chapters on the care of captives, and original data are presented on the diets of wild and captive tortoises, the nutrient content of plant foods, and blood parameters of healthy tortoises. Coverage of conservation issues includes husbandry methods for captive tortoises, an overview of protective measures, and an evaluation of threats to tortoises from introduced grass and wildfires. A final chapter on cultural knowledge presents stories and songs from indigenous peoples and explores their understanding of tortoises. As the only comprehensive book on the desert tortoise, this volume gathers a vast amount of information for scientists, veterinarians, and resource managers, while also remaining useful to general readers who keep desert tortoises as backyard pets. It will stand as an enduring reference on this endearing creature for years to come.

The Geography of Central America and Mexico Thomas A. Rumney, 2013-04-04 Connecting the massive landscapes of North and South America are Mexico and Central America. An area of fascination and study for geographers and scholars from around the world, for millennia these lands and people have

played important roles in the discoveries and distributions of civilizations resources and nations These regions have stimulated a large amount of research and publications across the sub disciplines of geography The Geography of Central America and Mexico A Scholarly Guide and Bibliography by Thomas A Rumney collects organizes and presents as many of these publications as possible to encourage efforts in the teaching study and continuing scholarship of the geography of this area which includes Mexico Belize Guatemala Honduras El Salvador Nicaragua Costa Rica and Panama Beginning with the region as a whole each chapter that follows one per nation is divided by the specific sub disciplines of geography cultural social economic historical physical and environmental political and urban Each section is further divided by document type atlases books book chapters articles from scholarly journals master s theses and doctoral dissertations Although the majority of entries recorded focus on English language works selected entries written in Spanish as well as French German and other languages are included with entries titles translated into English and noted accordingly

Plagues, Priests, and Demons Daniel T. Reff, 2004-12-06 Drawing on anthropology religious studies history and literary theory Plagues Priests and Demons explores significant parallels in the rise of Christianity in the late Roman empire and colonial Mexico Evidence shows that new forms of infectious disease devastated the late Roman empire and Indian America respectively contributing to pagan and Indian interest in Christianity Christian clerics and monks in early medieval Europe and later Jesuit missionaries in colonial Mexico introduced new beliefs and practices as well as accommodated indigenous religions especially through the cult of the saints The book is simultaneously a comparative study of early Christian and later Spanish missionary texts Similarities in the two literatures are attributed to similar cultural historical forces that governed the rise of Christianity in Europe and the Americas

The Biodemography of Subsistence Farming James W. Wood, 2020-04-23 An exploration of preindustrial agriculture that applies insights from biodemography physiological ecology and household demography

Transactions of the American Philosophical Society , Wandering Peoples Cynthia Radding Murrieta, 1997 Throughout this anthropological history Radding presents multilayered meanings of culture community and ecology and discusses both the colonial policies to which peasant communities were subjected and the responses they developed to adapt and resist them

New Mexico and the Pimería Alta John G. Douglass, William Graves, 2017-03-01 Focusing on the two major areas of the Southwest that witnessed the most intensive and sustained colonial encounters New Mexico and the Pimería Alta compares how different forms of colonialism and indigenous political economies resulted in diverse outcomes for colonists and Native peoples Taking a holistic approach and studying both colonist and indigenous perspectives through archaeological ethnohistoric historic and landscape data contributors examine how the processes of colonialism played out in the American Southwest Although these broad areas New Mexico and southern Arizona northern Sonora share a similar early colonial history the particular combination of players sociohistorical trajectories and social relations within each area led to and were transformed by markedly diverse colonial encounters Understanding these different mixes of players history and social

relations provides the foundation for conceptualizing the enormous changes wrought by colonialism throughout the region. The presentations of different cultural trajectories also offer important avenues for future thought and discussion on the strategies for missionization and colonialism. The case studies tackle how cultures evolved in the light of radical transformations in cultural traits or traditions and how different groups reconciled to this change. A much needed up to date examination of the colonial era in the Southwest New Mexico and the Pimeria Alta demonstrates the intertwined relationships between cultural continuity and transformation during a time of immense change and highlights contemporary thought on the colonial experience. Canal Irrigation in Prehistoric Mexico William E. Doolittle, 2014-07-03. Prehistoric farmers in Mexico invented irrigation, developed it into a science and used it widely. Indeed many of the canal systems still in use in Mexico today were originally begun well before the discovery of the New World. In this comprehensive study William E. Doolittle synthesizes and extensively analyzes all that is currently known about the development and use of irrigation technology in prehistoric Mexico from about 1200 B.C. until the Spanish conquest in the sixteenth century A.D. Unlike authors of previous studies who have focused on the political, economic and social implications of irrigation, Doolittle considers it in a developmental context. He examines virtually all the known systems from small canals that diverted runoff from ephemeral mountain streams to elaborate networks that involved numerous large canals to irrigate broad valley floors with water from perennial rivers. Throughout the discussion he gives special emphasis to the technological elaborations that distinguish each system from its predecessors. He also traces the spread of canal technology into and through different ecological settings. This research substantially clarifies the relationship between irrigation technology in Mexico and the American Southwest and argues persuasively that much of the technology that has been attributed to the Spaniards was actually developed in Mexico by indigenous people. These findings will be important not only for archaeologists working in this area but also for geographers, historians and engineers interested in agriculture technology and arid lands.

Gardens of Prehistory Thomas W. Killion, 1992-09-30. *Gardens of Prehistory* details the social developments that were created by the prehistoric agricultural systems of the New World.
