**How to Think Like a Woman** Regan Penaluna, 2023-03-14 From a bold new voice in nonfiction an exhilarating account of the lives and works of influential 17th and 18th century feminist philosophers Mary Wollstonecraft and her predecessors who have been written out of history and a searing look at the author's experience of patriarchy and sexism in academia As a young woman growing up in small town Iowa Regan Penaluna daydreamed about the big questions Who are we and what is this strange world we find ourselves in In college she fell in love with philosophy and chose to pursue it as an academician the first step she believed to becoming a self determined person living a life of the mind What Penaluna didn't realize was that the Western philosophical canon taught in American universities as well as the culture surrounding it would slowly grind her down through its misogyny its harassment its devaluation of women and their intellect Where were the women philosophers One day in an obscure monograph Penaluna came across Damaris Cudworth Masham's name The daughter of philosopher Ralph Cudworth and a contemporary of John Locke Masham wrote about knowledge and God and the condition of women Masham's work led Penaluna to other remarkable women philosophers of the era Mary Astell who moved to London at age twenty one and made a living writing philosophy Catharine Cockburn a philosopher novelist and playwright and the better known Mary Wollstonecraft who wrote extensively in defense of women's minds Together these

women rekindled Penaluna's love of philosophy and awakened her feminist consciousness In *How to Think Like a Woman* Regan Penaluna blends memoir biography and criticism to tell the stories of these four women weaving throughout an alternative history of philosophy as well as her own search for love and truth Funny honest and wickedly intelligent this is a moving meditation on what philosophy could look like if women were treated equally **Just Below the Line** Korydon H. Smith, 2010-05 With America on the brink of the largest number of older adults and persons with disabilities in the country's history the deceleration in housing production during the first decade of the twenty first century and a continued reliance on conventional housing policies and practices a perfect storm has emerged in the housing industry The lack of fit between the existing housing stock and the needs of the U S population is growing pronounced Just as housing needed to be retooled at the end of WWII the American housing industry is in dire need of change today The South with its high rates of poverty older residents residents with disabilities extensive rural areas and out of date housing policies and practices serves as a canary in the coal mine for the impending nationwide housing crisis *Just Below the Line* discusses how reworking the policies and practices of the housing industry in the South can serve as a model for the rest of the nation in meeting the physical and social needs of persons with disabilities and aging boomers Policy makers designers builders realtors advocates and housing consumers will be able to use this book to promote the production of equitable housing nationwide Published in collaboration with the Fay Jones School of Architecture **Dismantling the Public Sphere** John E. Buschman, 2003-08-30 This work presents a thorough examination of librarianship and the social and economic contexts in which the profession and its institutions operate As a basis of analysis Buschman employs critical education scholarship and the research of German philosopher Jurgen Habermas whose seminal work on the public sphere the arena in which the public organizes itself and formulates public opinion serves as a meta framework for Buschman's study of librarianship Buschman asserts that a significant shift has occurred from the library as a contributor to the public good to a model where economic rationality directs policy He challenges much of the current thinking and assumptions guiding libraries exploring the circumstances in which librarians and libraries operate and linking the profession back to democratic and public purposes as the core essence of the field Chapters include Crisis Culture and the Need for a Defense of Librarianship in the Public Sphere The New Public Philosophy and Critical Educational Analysis The Public Sphere Rounding Out the Context of Librarianship Studies in Librarianship and the Dismantling of the Public Sphere Follow the Money Library Funding and Information Capitalism Follow the Leader Library Management and the New Public Philosophy On Customer Driven Librarianship Drifting Toward the Corporate Model ALA Notes on Postmodern Technology Technocracy and Libraries The Public Sphere and Democratic Possibility Highly recommended for courses in policy and librarianship as well as for academic and public library directors this work will also be of interest to theorists in the social sciences **A New Paradigm for Global School Systems** Joel H. Spring, 2007 Publisher description **Cultural Ontology of the Self in Pain** Siby K. George, P.G. Jung, 2015-09-18 The

mainstream approach to the understanding of pain continues to be governed by the biomedical paradigm and the dualistic Cartesian ontology This Volume brings together essays of scholars of literature philosophy and history on the many enigmatic shades of pain experience mostly from an anti Cartesian perspective of cultural ontology by scholars of literature philosophy and history A section of the essays is devoted to the socio political dimensions of pain in the Indian context The book offers a critical perspective on the reductive conceptions of pain and argue that non substance ontology or cultural ontology supports a more humane and authentic understanding of pain The general ontological features of the self in pain and culturally imbued dimensions of pain experience are thus brought together in a rare blend in this Volume The essays dwell on the importance of understanding what cultural social and political forces outside our control do to our pain experience They show why such understanding is necessary both to humanely deal with pain and to rectify erroneous approaches to pain experience They also explore the thoroughly ambivalent spaces between pain and pleasure and the cathartic and productive dimensions of pain The essays in this Volume investigate pain experiences through the fresh lenses of history gender ethics politics death illness self loss torture shame dispossession and denial

**Rewriting Democracy** Elizabeth Deeds Ermarth, 2017-05-15 Illuminating and comprehensive this excellent volume addresses the problematic relationship between democratic institutions and the current critique of enlightenment and modernity Since at least the beginning of the twentieth century and across the range of practice from science to politics to art various cultural shifts have unsettled assumptions that have been fundamental to the development of democratic institutions assumptions concerning individual identity the nature of political systems and the viability of egalitarian ideals Can democracy survive these changes to the value systems upon which it has been based for over two centuries This study does not focus on the often repeated particulars of past or current events such as 9 11 or the genocide in Darfur but instead examines the terms and conditions under which it would be possible to prevent such events in the future

**Bottlenecks** Joseph Fishkin, 2014-01-10 Equal opportunity is a powerful idea and one with extremely broad appeal in contemporary politics political theory and law But what does it mean On close examination the most attractive existing conceptions of equal opportunity turn out to be impossible to achieve in practice or even in theory As long as families are free to raise their children differently no two people's opportunities will be equal nor is it possible to disentangle someone's abilities or talents from her background advantages and disadvantages Moreover given different abilities and disabilities different people need different opportunities confounding most ways of imagining what counts as equal This book proposes an entirely new way of thinking about the project of equal opportunity Instead of focusing on the chimera of literal equalization we ought to work to broaden the range of opportunities open to people at every stage in life We can achieve this in part by loosening the bottlenecks that constrain access to opportunities the narrow places through which people must pass in order to pursue many life paths that open out on the other side A bottleneck might be a test like the SAT a credential requirement like a college degree or a skill like speaking English It might be membership in a favored caste or racial group Bottlenecks are part of the opportunity structure of every society But their severity varies By loosening them we can build a more open and pluralistic opportunity structure in which people have more of a chance throughout their lives to pursue paths they choose for themselves rather than those dictated by limited opportunities This book develops this idea and other elements of opportunity pluralism then applies this approach to several contemporary egalitarian policy problems class and access to education workplace flexibility and work family conflict and antidiscrimination law

*Protecting Human Rights and Building Peace in Post-Violence Societies* Nasia Hadjigeorgiou, 2020-02-20 This book critically examines the relationship between protecting human rights and building peace in post violence societies It explores the conditions that must be present and strategies that should be adopted for the former to contribute to the latter The author argues that human rights can aid peacebuilding efforts by helping victims of past violence to articulate their grievance and by encouraging the state to respond to and provide them with a meaningful remedy This usually happens either through a process of adjudication whereby human rights can offer guidance to the judiciary as to the best way to address such grievances or through the passing and implementation of human rights laws and policies that seek to promote peace However this positive relationship between human rights and peace is both qualified and context specific Through an interdisciplinary and comparative analysis of four case studies the book identifies the conditions that can support the effective use of human rights as peacebuilding tools Developing these the book recommends a series of strategies that peacebuilders should adopt and rely on Winner of the Constantinos Emilianides Award in Law for 2020 joint conferment

The American and British Debate Over Equality, 1776-1920 James L. Huston, 2017-10-16 Historians have long contested the degree to which the central tenet of the Declaration of Independence that all men are created equal has manifested itself in American society and national policy According to James L Huston many historians have focused too

intently on class differences slavery and inequalities arising from ethnicity sexuality and gender while overlooking important areas where notions of equality flourished during the century and a half after the Declaration's signing In *The American and British Debate Over Equality 1776-1920* Huston examines the egalitarian communities in rural northern America particularly those enclaves that differed from the openly aristocratic cities and towns of the British Isles In the aftermath of the American Revolution British and American writers alike recognized that a growing philosophical rift divided the two nations whereas Great Britain continued to embrace the inequality of its hierarchical class system the United States professed allegiance to democratic ideals of equality limited though these were by racial and gender norms of the day Huston argues that the two countries engaged in an intellectual debate during the next century and a half over which ideal equality or inequality worked best in promoting social stability political hegemony and economic success Exploring the effects of equality and inequality on many aspects of American life he examines civil behavior social customs treatment of others politics education religion economic opportunity and general public optimism Drawing from decades of publications by American and British writers Huston reveals the rhetorical strategies contemporary observers employed in defending or rejecting the organization of a society around broader notions of human equality *The American and British Debate Over Equality 1776-1920* informs the modern debate over equality and inequality not by theorizing and philosophizing but by offering a glimpse into the practical applications of a functioning egalitarian society as compared to one that extolled monarchy and institutionalized inequality
