many tropical fruits all originate in forest ecosystems But few know that such abundance is also available in the cool temperate forests of North America *Farming the Woods* covers in detail how to cultivate harvest and market high value nontimber forest crops such as American ginseng shiitake mushrooms ramps wild leeks maple syrup fruit and nut trees ornamentals and more Along with profiles of forest farmers from around the country readers are also provided comprehensive information on historical perspectives of forest farming mimicking the forest in a changing climate cultivation of medicinal crops cultivation of food crops creating a forest nursery harvesting and utilizing wood products the role of animals in the forest farm and how to design your forest farm and manage it once it s established *Farming the Woods* is an essential book for farmers and gardeners who have access to an established woodland are looking for productive ways to manage it and are interested in incorporating aspects of agroforestry permaculture forest gardening and sustainable woodlot management into the concept of a whole farm organism
