

The background of the image is a close-up of a glass surface, likely a window, covered in numerous water droplets of varying sizes. Through the glass, several out-of-focus, warm-toned lights are visible, creating a bokeh effect. The overall color palette is a mix of cool blues and greys from the glass and rain, and warm oranges and yellows from the distant lights. The text is overlaid on the lower portion of the image.

**Managerial Learning** Marilyn W. Daudelin,Kent W. Seibert,1999-09-30 Challenging work experiences are the richest source of learning for today s managers Yet lessons embedded in these experiences are not always obvious This comprehensive book describes a critical yet under researched element of how managers learn from these experiences reflection Today s workplace demands continual learning which in turn requires reflection While this book supports the prevailing view that reflection is central to experiential learning it challenges the traditional views that it is the same as contemplation that it is incompatible with management and that it is time consuming and unnatural for managers Original quantitative and qualitative research reported in this book indicates that two different yet complementary modes of managerial reflection exist active and proactive Active reflection is something that managers naturally engage in during challenging job experiences whereas managers must be prompted to engage in proactive reflection Both modes involve processes of intentional inquiry Different forces are necessary to stimulate each type of reflection Based on these findings the claim is made that the potential to learn from experience is greatest when managers intentionally engage in both modes Accordingly a holistic model that integrates active and proactive reflection is presented This model has important implications for theorists and researchers of managerial learning by identifying previously unreported aspects of reflection It

is also relevant to practitioners and companies who desire to enhance what their managers learn from their workplace experience      *COVID-19 and the Educational Response: New Educational and Social Realities* Jane McIntosh Cooper, Leslie Michel Gauna, Christine Beaudry, 2022-01-31      *Reflection and the College Teacher* Rachel Wlodarsky, Howard Walters, 2013-12-01 Higher education is facing many challenges not least of which is retaining excellent faculty and cultivating their continued professional growth This book explicitly ties the literature to the practical concerns and recommendations related to applying the reflective process in a college setting In this way the theories and empirical findings of the most recent literatures are linked to practical recommendations The reflective tools described in this book provide an important resource for faculty's reflective practice Unlike other books on the topic the model developed and presented in this book allows for the reflective process to validate faculty's previous actions or accomplishments and maintain these practices In other words the endpoint of reflective process supports self satisfaction Instead of a deficit model the focus is development In this comprehensive volume readers discover the seminal and the recent research in reflective practice drawn from a wide range of sources including the authors recent research findings on college teachers reflection Altogether Wlodarsky and Walters systematically address these critical questions a What is reflection b Of what practical use or benefit does reflection serve c How do college teachers model reflection in the workplace d What are the steps in the reflective process e How can the reflective process be harnessed for program improvement in the college setting and in individual faculty practices Wlodarsky and Walters understand and address the real needs of college teachers today They created not only a thorough academic book but also a compelling relevant read Specifically they designed the chapters to include scenarios developed from interview transcripts with college teachers These stories powerfully contextualize the types of problems and tensions which surround the professional work environment of a college campus and the roles of the college teacher
