Qualitative Research Practice Clive Seale, 2007 Aimed at the student reader this book demonstrates the benefits of using particular methods from the viewpoint of real life experience It contains chapters written by leading internationally distinguished qualitative researchers who recount and reflect on their own research experiences as well as others The Silent Experiences of Young Bilingual Learners Caroline Bligh, 2014-09-11 Many teachers are increasingly concerned with how to best support the learning of the rising numbers of bilingual learners in schools particularly those children who are new to English and therefore cannot yet communicate with the teacher or their peers in their first language during the silent period This book offers an alternative insight to that which is most commonly available to teachers and researchers as instead of examining language acquisition purely from a linguistic approach it explores the learning that is occurring through a sociocultural lens and even more significantly from the young child's perspective the worm's eye view Investigated through the experiences of young bilingual learners allows the reader to make sense of the making meaning that occurs when the child cannot make sense of his/her new world nor communicate verbally in the language of instruction in the classroom Remarkably learning through the silent period is revealed as both complex and messy as the bilingual child mediates his or her own learning through a synthesis of alternative learning pathways The silent period is presented as a crucial time for learning distributed through a synthesis of close observation intense listening and most significantly copying the practices of others Throughout the silent period the children are not only seen to be learning but also contributing to the classroom practices The book not only initiates new understandings of second language learning but also offers creative ideas on how to raise the achievement of children who are learning English as an additional language

Research Methods For Nurses And The Caring Professions 2/E Abbott, Pamela, Sapsford, Roger, 1998-05-01 Praise for the first edition of Research into Practice and Research Methods for Nurses and the Caring Professions These books provide a good introduction for the uninitiated to reading and doing research Abbott and Sapsford provide a clearly written and accessible introduction to social research One of their aims is to demystify research and in this they succeed admirably After reading the text and the articles in the reader and working through the various research

exercises readers should have a clear appreciation of how to evaluate other people's research and how to begin their own

David Field Journal of Palliative Medicine This book now substantially revised in its second edition is about the appreciation evaluation and conduct of social research Aimed at nurses social workers community workers and others in the caring professions the book is particularly focused on research which evaluates and contributes to professional practice The authors have provided many short practical exercises in the text and the examples are drawn mostly from projects carried out by one or two people rather than large research teams The clear accessible style will make this the ideal introductory text for those undertaking or studying research for the first time The book may be used in conjunction with *Research into Practice* Open University Press a reader of useful examples selected by the same authors
