Reflections and Replies Tyler Burge, 2003 Essays by various philosophers on the work of Tyler Burge and Burge's extensive responses Lectures on the Science of Human Life, with a Copious Index, and a Biographical Sketch of the Author Sylvester Graham, 2025-07-14 Reprint of the original first published in 1883 The Antigonus publishing house specialises in the publication of reprints of historical books We make sure that these works are made available to the public in good condition in order to preserve their cultural heritage **Lectures on the Science of Human Life. To which is Now First Added a Copious Index** Sylvester Graham, 1854 *Lectures on the Science of Human Life* Sylvester Graham, 1839 Fostering Reflection and Providing Feedback Jane Westberg, Hilliard Jason, 2001-08-22 This book is a treasure trove of practical suggestions for promoting reflections and feedback that is based upon sound educational theory and research I recommend it highly David M Irby PhD Vice Dean for Education University of California The authors of this concise volume describe the two underlying principles of becoming a thoughtful practitioner reflection and feedback They offer strategies to assist students in developing the attitudes and skills to think about and assess their work consciously and consistently Physicians nurses psychologists social workers who are educators of students residents and practitioners in the health professions will find this an invaluable resource Graduate Employability Across Contexts Tran Le Huu Nghia, Binh Chi Bui, Jasvir Kaur Nachatar Singh, Vinh N. Lu, 2022-09-02 This book explores stakeholders' perspectives, their practices and engagement with enacting the employability agenda in the context of a rapidly changing world It explains the need for developing graduate employability under socioeconomic, cultural and political pressure exposed to the higher education sector Largely framed within Bourdieu's concepts of social field, habitus and capital it explores international stakeholders' perspectives and experiences with graduate employability agenda in different contexts which serves as a point of reference for the adoption of such initiatives Based on empirical evidence the authors develop a new graduate employability framework seeing it as a lifelong process denote the relationships between types of employability capital and shed light on the consequences of different strategies to translate employability capital to employment and career outcomes Overall this book generates both theoretical and practical insights which help to advance employability programs better prepare the future workforce and anticipate turbulence in the labour markets Reflection and the Stability of Belief Louis E. Loeb, 2010-09-15 A unifying theme of Loeb's work is epistemological that Descartes and Hume advance theories of knowledge that rely on a substantial naturalistic component adopting one or another member of a cluster of psychological properties of beliefs as the goal of inquiry and the standard for assessing belief-forming mechanisms Thus Loeb shows a surprising affinity between the epistemologies of the two figures surprising because they are often thought of as polar opposites in this respect Descartes and Hume are unique in that their philosophical texts are accessible beyond just a narrow audience in the history of philosophy their ideas continue to be a vital part of the field at large This volume will thus appeal to advanced students and

scholars not just in the history of early modern philosophy but in epistemology and other core areas of the discipline

Handbook of Research on Facilitating Collaborative Learning Through Digital Content and Learning Technologies

Keengwe, Jared, 2022-12-28 Digital content and learning technologies are now the norm at all levels of education. However, there is evidence to suggest that this digital shift is on a spectrum and the spectrum impacts learners in different ways. This means that some instructors who seek to integrate digital content may do so using traditional teaching methods while others use innovative practices to engage learners. Those who integrate innovative digital practices align their instructional practice with theories to facilitate student-centered pedagogies that support and improve the depth and scope of student learning. A primary characteristic of student-centered learning is facilitating collaborative learning using digital content and learning technologies to engage students as well as to enhance meaningful learning. The *Handbook of Research on Facilitating Collaborative Learning Through Digital Content and Learning Technologies* provides K-20 educators with alternative pedagogical and andragogical models that are innovative and incorporate digital content and learning technologies that promote constructive learning. Further, this book explores the relationship between constructivist learning, digital content, and learning technologies. A primary argument in this book is that constructivist teaching strategies such as collaborative learning coupled with digital content and purposeful learning technologies could benefit student learning in ways that are different from those practiced in traditional non-digital learning environments. Covering topics such as instructional design, self-efficacy, and library engagement, this major reference work is an essential resource for pre-service teachers, teacher educators, faculty, and administrators of K-20 education, librarians, researchers, and academicians. **Intentionality in**

Husserl and Heidegger B.C. Hopkins, 2013-04-17 1. Remarks on the Current Status of the Problematic The literature treating the relationship between the phenomenologies of Husserl and Heidegger has not been kind to Husserl. Heidegger's devastating phenomenologically ontological critique of traditional epistemology and ontology advanced under the rubric of fundamental ontology in *Being and Time* has almost been universally received despite the paucity of its references to Husserl as sounding the death knell for Husserl's original formulation of phenomenology. The recent publication of Heidegger's lectures from the period surrounding his composition of *Being and Time* lectures that contain detailed references and critical analyses of Husserl's phenomenology and which in the words of one respected commentator, Rudolf Bernet, offer at long last insight into the principal sources of fundamental ontology will, if the conclusions reached by the same commentator are any indication, serve only to reinforce the perception of Heidegger's phenomenological superiority over Husserl. This is not to suggest that the tendency toward Heidegger partisanship in the literature treating the relationship of his phenomenology to Husserl's has its basis in extra-philosophical or extra-phenomenological concerns and considerations. Rather, it is to draw attention to the undeniable fact that Heidegger's reformulation of Husserl's phenomenology has cast a spell over all subsequent discussions of the basic problems and issues involved in what has become known as their
